AN EXPLANATORY NOTE CONCERNING
BIBLIOGRAPHIC SERIES NO. 4

The Bibliographic Series, pertaining to food and container literature, are published by the Library Branch of the Quartermaster Food and Container Institute for the Armed Forces for the purpose of aiding our scientists in developing better foods and packaging techniques for the Armed Forces.

Realizing the importance of these bibliographies as reference tools, this office has taken every precaution to make certain the bibliographies are complete in every detail. For example, abbreviations are seldom used and journal titles are never abbreviated. The main entry is by author, and this is backed up with a detailed subject index. These, as well as other features used in the format of the Bibliographic Series, have proved very useful.

Abbreviations used are: Vol. (Volume), n.d. (where date is unknown), No. (Number) p. (Page) and SR (Special Report).

Members of the staff who assisted in the compilation of the Bibliographic Series are as follows: Dr. Gustav Weigend made the original literature search, Charles H. Hearst was responsible for the editing and proofreading duties, and typing chores were accomplished by Gladys M. Burris and Hortense L. Humble.

EDWARD W. TANKERSLEY
Chief, Library Branch
QM Food and Container Institute
For the Armed Forces

The following is a list of the names of the persons who have been appointed to the various committees of the Board of Directors of the City of New York, for the year 1901.

The Board of Directors of the City of New York, for the year 1901, has appointed the following committees:

- Committee on the Administration of the City of New York, consisting of the Mayor, the Comptroller, and the Board of Directors.
- Committee on the Finance of the City of New York, consisting of the Mayor, the Comptroller, and the Board of Directors.
- Committee on the Public Works of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Works.
- Committee on the Police of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Police.
- Committee on the Fire Department of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Fire.
- Committee on the Health of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Health.
- Committee on the Education of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Education.
- Committee on the Parks of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Parks.
- Committee on the Public Buildings of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Buildings.
- Committee on the Public Utilities of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Utilities.

The Board of Directors of the City of New York, for the year 1901, has also appointed the following committees:

- Committee on the Administration of the City of New York, consisting of the Mayor, the Comptroller, and the Board of Directors.
- Committee on the Finance of the City of New York, consisting of the Mayor, the Comptroller, and the Board of Directors.
- Committee on the Public Works of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Works.
- Committee on the Police of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Police.
- Committee on the Fire Department of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Fire.
- Committee on the Health of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Health.
- Committee on the Education of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Education.
- Committee on the Parks of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Parks.
- Committee on the Public Buildings of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Buildings.
- Committee on the Public Utilities of the City of New York, consisting of the Mayor, the Board of Directors, and the Board of Public Utilities.

THE BOARD OF DIRECTORS OF THE CITY OF NEW YORK, FOR THE YEAR 1901, HAS APPOINTED THE FOLLOWING COMMITTEES:

CONTENT OF SUBJECT INDEX

- Absorption
Acceleration
Accelerators:
 In general.
 Special types:
 betasynchrotron
 betatron
 bevatron
 capacitron
 cavitron
 colossatron
 cyclosynchrotron
 cyclotron
 electrostatic generators
 linear accelerators
 microtron
 proton synchrotron
 synchrobetatron
 synchrocyclotron
 synchrotron
 trochotron
 Van de Graaf Generator
- Acesatdehyde
Acetone
Acetylene
Acids
Adsorption
Agglutinins
Agriculture
Air
Air irradiation
Albumin
Alcohol
Aldehydes
Alpha rays
Algae
Aluminum
Amino acids
Aminobenzoic acid
Amoeba
Ammonia
Amylase
Animals
Anode rays
Anthracene
Antibiotics
Antibodies
Antigens
Argonase
Artificial radioactivity
- Ascaris
Ascorbic acid
Aspergillus
Atomic bomb
Atomic energy
Atomic Energy Commission
Atomic Energy Research
Atomic quantities
Atomic theory
Atoms
Autoradiography
Azotobacter
- Bacillus subtilis
Bacteria
Bacteriophage
Baked products
Barley
Beans
Beer
Benzene
Benzoic acid
Beta rays
Betasynchrotron
Betatron
Bevatron
Beverages
Biology
Bioses
Biscuits
Blanching
Blood
Bread
Bremsstrahlung
Butter
Butter fat
- Calcium
Callendar's Radio-Balance
Canal rays
Cannalis sativa (hemp)
Capacitron
Carbohydrates
Carbon
Carbon-14
Carotene
Cascade showers
Catalase
Cathode rays
Cavitron
Cells
Cellulose
 I
- Cellulose acetate
Cereals
Ceric sulfate
Cheese
Cherenkov radiation
Chlorine
Chloroform
Chocolate
Cholesterol
Chromates
Chromatography
Chromosomes
Cobalt-60
Cocoa
Coffee
Collagen
Colloids
Colossatron
Complex spectra
Corn
Cosmology
Cosmotron
Cottonseed
Cryostat
Cyclosynchrotron
Cyclotron
Cysteine
Cystine
Cytochromes
Cytogenic effects
Cytological effects
Cytoplasm
- DDT
Dairy industry
Dairy technology
Debye effect
Deceleration
Dehydration
Delta rays
Deutrons
Dosimetry
Drosophila
Drugs
- Egg powder
Eggs
Electronics
Electrons
Electrostatic generator
Elements

CONTENT OF SUBJECT INDEX

Emulsions	Instrumentation	Nuclear dynamics
Energy	Instruments	" energy
Enzymes	Invertase	" excitation
Ergosterol	Iodides	" fission
Escherichia coli	Ion exchange	" forces
Esterification	Ionization	" induction
	Ionizing radiation	" interactions
Fats	Ions	" physics
Fatty acids	Iron	" products
Fatty substances	Irradiation	" quantities
Fermentation	Isotopes	" radiations
Fermi-Dirac Theory	Isotopic elements	" rays
Ferric ion	Isotopic irradiation	" reactions
Ferro-ferric systems		" reactors
Ferrous sulfate	Jams and jellies	" transformation
Fiber	J - phenomena	Nucleate
Fibrinogen	J - transformation	Nuclei
Fish	Joshi - effect	Nucleic acids
Fission	Juices	Nucleons
Fission fragments		Nucleus
Fission products	Ketones	Nutrition
Flour	Lactase	
Food	Lactic acid	Oats
Fruit juices	Lead	Oils
Fruits	Legal aspects	Olive oil
Fungi	Linear accelerators	Organic compound
	Linoleic acid	Organic reactions
Gamma rays	Lipids	Organic solutions
Gases	Lipoids	Organic substances
Gels	Liquids	Organisms
Germ cells	Locust	Oxidase
Glass		Oxygen
Glucose	Maize	
Glucothione	Measurement	Packaging
Glycerides	Meat	Papain
Glycine	Medicaments	Paraffin
Graaff, Vande	Medicines	Paraffin wax
Grain	Metals	Patents
Gravitation	Methylene blue	Peanut oil
	Microorganisms	Peanuts
Hebrobracon (wasp)	Microradiography	Penicillin
Hemagglutinin	Microtron	Penicillium
Hemoglobin	Milk	Pepsin
Hemp	Millikan rays	Peptides
Histamine	Mitosis	Perchloric acid
Hydrocarbons	Molds	Permanganates
Hydrogen	Molecules	Petrolatum
Hydrogen-peroxide	Mosquitos	Pharmaceuticals
		Pharmacology
Ice	Neutrons	Phenylalanine
Indole	Nitrification	Phosphites
Inorganic compounds	Nitrogen	Plankton
Insecticides	Nitrogen compounds	Plants
Insects	Nuclear data	Plasma

Plastics
Polymerization

CONTENT OF SUBJECT INDEX

Polymers
Polystyrene
Polythene
Positron
Potassium
Potatoes
Protection
Proteins
Proton synchrotron
Protons
Protoplasm
Protozoa

Radiation
Radiation damage
Radiation pressure
Radiation problems
Radiation sickness
Radiation sterilization
Radioactive compositions
Radioactive compounds
Radioactive disintegration
Radioactive indicators
Radioactive material
Radioactive products
Radioactive standards
Radioactive substances
Radioactive tracers
Radioactivity
Radiobiology
Radiocarbon
Radiochemistry
Radiography
Radiology
Radionuclides
Radiotoxicity
Radiowaves

Radium A, B, C, D, E, F
Rays: alpha, anode, beta,
canal, cathode, delta rays,
deuterons, electrons, gamma
rays, Millikan rays, neutrons,
positrons, radium rays,
roentgen rays, Schumann rays,
ultraviolet rays, Wehnelt
Cathode rays, X-rays

Reactors
Resonance radiation
Riboflavin
Ribonuclease
Roentgen rays
Rubber
Rye

Saccharomyces
Saccharose
Salamander larvae
Sausages
Scattering
Seeds
Skin
Solids
Sonic energy
Sound waves
Spices
Shores
Standards
Staphylococcus aureus
Starch
Sterilization
Steroids

Wine
Worms
X-rays

Yeast

Ultrasonics
Ultraviolet rays
Urease

ABSORPTION

action of ultraviolet rays on
bacteria and absorption by
amino acids
p. 161 item 1611

an extremely absorbable radiation
emitted by radium C
p. 377 item 3778

analyzing radiation by means of
absorption
p. 219 item 2198

and diffusion of gamma rays
p. 240 item 2401

and electrical density of
beta rays
p. 315 item 3153

and genesis of X-rays
p. 358 item 3583

and multiple ionization of
X-rays
p. 301 item 3011

and range of beta rays of
radium E
p. 101 item 1013

and reflection by matter
p. 211 item 2112

and reflection of homogeneous
beta particles
p. 385 item 3856

and scattering of gamma rays
p. 147 item 1471, 1474
p. 274 item 2748

and secondary radiation of
cathode rays
p. 59 item 595

and velocity of slow neutrons
p. 104 item 1049

anomalous absorption and dispersion
of X-rays
p. 383 item 3836

ABSORPTION

anomalous absorption of
gamma radiations
p. 150 item 1504

by externally irradiated
liquids
p. 452 item 4522

chemical lability and
absorption of ultraviolet
rays
p. 167 item 1671

co-efficients of 0.1 A to
0.71 A X-rays
p. 10 item 102

co-efficients of 23.5
mev X-rays
p. 260 item 2601

co-efficients of gamma
radiation from radium D and
and quanta emitted
p. 49 item 498

co-efficients of gamma rays
between 0.3 and 1.5 mev
p. 391 item 3918

co-efficients of gamma rays
p. 391 item 3919

coefficient of soft X-rays
p. 255 item 2559

coefficient of X-rays
p. 38 item 386
p. 49 item 493

curves and ranges for beta
rays
p. 245 item 2450

determination of beta ray
intensity
p. 140 item 1406

differences of ultraviolet
absorption by chemical
constituents
p. 166 item 1668

ABSORPTION

distribution of intensity
of alpha rays in and absorbing
medium

p. 329 item 3291

effect of temperature on X-ray
absorption

p. 296 item 2963

energy absorption

p. 242 item 2469

energy absorption from
cathode rays

p. 136 item 1367

energy balance for X-rays

p. 45 item 455

evaluation of alpha particle
absorption

p. 8 item 80

gamma ray measurements

p. 74 item 740

p. 179 item 1791

in velocity of beta rays on
passage through matter

p. 238 item 2383

independence from temperature
in X-rays

p. 26 item 264

law for beta rays

p. 156 item 1567

law for beta rays from radium
D

p. 252 item 2525

law for short wave gamma rays

p. 252 item 2529

law for total-radiation measure-
ments

p. 31 item 311

ABSORPTION

laws for soft X-rays

p. 94 item 949

law for absorption of beta
rays

p. 386 item 3861

measurements for 1- and 2-
million volt X-rays

p. 433 item 4337

measurement of absorption of
X-rays by matter

p. 96 item 968

measurement of beta and gamma
absorption

p. 393 item 3938

measurement of beta particles

p. 211 item 2114

measurement of coefficients
for gamma rays

p. 180 item 1809

measurement of coefficients
of 17- and 6.1 mev gamma rays

p. 365 item 3653

measurement of coefficient of
X-ray absorption

p. 96 item 969

measurement of cross sections
for fast neutrons

p. 166 item 1664

measurement of gamma ray co-
efficients

p. 90 item 909

p. 91 item 910

measurement of 1- and 2-million
volt X-rays

p. 330 item 3302

ABSORPTION

measuring X-rays of range
0.7 to 2.5 million volt
p. 16 item 168

number and inner absorption
of radium D gamma rays
p. 340 item 3405

of alpha and H-particles by
matter
p. 241 item 2418

of alpha rays
p. 15 item 157
p. 241 item 2419

of alpha rays. Theory
p. 89 item 894

of beta rays
p. 148 item 1483
p. 149 item 1492

of beta particles from some
substances by air and carbon
dioxide
p. 211 item 2110

of beta rays by liquids
p. 44 item 448

of beta rays by matter
p. 125 item 1257, 1259
p. 126 item 1260, 1261
p. 219 item 2199
p. 386 item 3860

of beta rays in gases and vapors
p. 130 item 1303

of cathode rays by helium
p. 304 item 3042

of cathode rays by metallic
sheets
p. 379 item 3795

of cobalt-60 gamma rays
p. 327 item 3275
p. 438 item 4381 SR

ABSORPTION

of gamma rays
p. 7 item 71, 73
p. 66 item 663
p. 79 item 793
p. 183 item 1839
p. 197 item 1977
p. 208 item 2081
p. 271 item 2719
p. 437 item 4374SR

of 5.3, 10.3 and 17.6 mev
gamma rays
p. 306 item 3060

of 17-mev gamma rays in lead
and aluminum
p. 248 item 2485

of gamma and X-rays
p. 10 item 106

of gamma rays by air
p. 169 item 1696

of gamma rays by elements
p. 7 item 72

of gamma rays by gases
p. 64 item 642

of gamma rays by lead filters
p. 282 item 2827

of gamma rays in water
p. 98 item 987

of glycerides by X-radiation
using tracer technique
p. 426 item 4263 SR

of homogeneous beta rays
p. 367 item 3674

of homogeneous X-rays
p. 210 item 2103

of long wave X-rays and
connection with light
p. 177 item 1776

ABSORPTION

of radium gamma rays

p. 64 item 641
p. 148 item 1480
p. 207 item 2079
p. 208 item 2082
p. 330 item 3307

of radium gamma rays by lead

p. 364 item 3642

of radium B and C gamma rays by lead

p. 299 item 2997
p. 303 item 3037

of radium C gamma rays

p. 53 item 532
p. 67 item 677

of soft X-rays by water and carbon

p. 301 item 3012

of ultra-short X-rays

p. 301 item 3010

of ultraviolet rays and their disintegration

p. 394 item 3944

of ultraviolet rays by acetylene

p. 167 item 1673

of ultraviolet rays by acids of fatty acids

p. 35 item 350, 352

of ultraviolet rays by alcohol, acids, ethers, aldehydes, ketones

p. 35 item 353

of ultraviolet rays by amino acids

p. 155 item 1558

of ultraviolet rays by cells

p. 110 item 1108

of ultraviolet rays by human skin

p. 120 item 1206

ABSORPTION

of ultraviolet rays by nucleic acids

p. 74 item 747

of ultraviolet rays by organic substances

p. 199 item 1998
p. 242 item 2428

of ultraviolet rays by pepsin

p. 134 item 1346

of very penetrating gamma rays

p. 136 item 1368, 1369

of X-rays

p. 40 item 407
p. 178 item 1787
p. 324 item 3241

of X-rays (theory)

p. 178 item 1785

of X-rays by gases

p. 324 item 3240, 3241

of X-rays by gases and vapors

p. 145 item 1456

of X-rays. Effect of a magnetic field

p. 28 item 283

of X-rays in various materials

p. 187 item 1873

of X-rays with wave lengths down to 0.08 A. U

p. 10 item 101

relation between absorption and wavelength for X-rays

p. 328 item 3285

relation to wave lengths of X-rays

p. 48 item 489

ABSORPTION

resonance absorption of
X-rays

p. 286 item 2866

shape, wavelength and width
of an X-ray absorption limit

p. 301 item 3013

self-absorption in gamma ray
sources

p. 113 item 1135

slow neutron absorption cross
sections of elements

p. 306 item 3067

standard curves for qualifying
X-ray radiation

p. 354 item 3545

studies on extended gamma ray
sources

p. 369 item 3697

theory of X-ray absorption

p. 178 item 1785

table of critical X-ray absorption
energies

p. 172 item 1722

temperature coefficient of gamma
rays

p. 24 item 249

total energy absorption in bio-
logical objects

p. 247 item 2470

total linear absorption coefficients
for gamma radiation

p. 432 item 4323 SR

ultraviolet absorption in plastic
foils

p. 227 item 2271

ultraviolet absorption of cells

p. 48 item 481

ABSORPTION

ultraviolet spectra of
biologically important
compounds

p. 54 item 541

ultraviolet spectra of
compounds derived from cells

p. 171 item 1716

X-ray absorption edges

p. 78 item 786

X-ray absorption limits

p. 13 item 136

p. 346 item 3468

X-ray measurements from 500
to 1,000 and 10 to 250 kv

p. 362 item 3626, 3627

ACCELERATION

and cross drift of electrons
in a magnetic field

p. 333 item 3332

apparatus for accelerating
particles

p. 4 item 47

p. 87 item 870

p. 171 item 1712

p. 217 item 2177

p. 222 item 2229

p. 250 item 2505

artificial acceleration of
atomic particles

p. 130 item 1305

current loading in ion accel-
erating tubes

p. 249 item 2495

electron loading in accel-
erating tubes

p. 39 item 393

electron loading in ion tubes

p. 364 item 3643

ACCELERATION

electron mechanics of
induction acceleration
p. 293 item 2936

linear acceleration of
electrons
p. 70 item 705

Millikan rays and acceleration
of radioactive change
p. 253 item 2532

of charged particles
p. 4 item 49

of electrons
p. 26 item 262
p. 362 item 3624

of electrons by cylindrical
cavities
p. 255 item 2558

of electrons by magnetic
induction
p. 200 item 2008

of electrons to energies
above 10^9 e.v.
p. 301 item 3016

of heavy ions to high energies
p. 370 item 3703

of ions
p. 26 item 261

of multiply charged nuclei
p. 360 item 3600
p. 403 item 4037 SR

of nitrogen-14 ions in a 60-inch
cyclotron
p. 307 item 3071

of partially stripped heavy ions
p. 232 item 2325

ACCELERATION

of stripped C-12 and C-13
nuclei in cyclotron
p. 256 item 2562

of stripped light nuclei
in the cyclotron
p. 393 item 3936

optimum parameters by cylindrical
cavities
p. 255 item 2555, 2558

radiation of an electron in the
Compton effect
p. 348 item 3480

relativity of accelerated motion
p. 253 item 2533

resonance acceleration
p. 250 item 2506

ACCELERATORS - IN GENERAL

1.2-mev accelerator at Australian
National University
p. 395 item 3956

2.3 mev electron accelerator
(positive ions)
p. 216 item 2167

6 mev electron accelerator
p. 209 item 2099

20 mev induction accelerator
p. 200 item 2007

100-kev positive ion accelerator
p. 393 item 3935

120-kev positive ion accelerator
p. 216 item 2163

125-kv accelerator
p. 31 item 312

200-kv accelerator with gas
recovery
p. 11 item 112

ACCELERATORS - IN GENERAL

250-kv accelerator (portable)

p. 31 item 313

a 600 kv ion accelerator

p. 188 item 1888

800-kv acceleration tube

p. 367 item 3678

1 million volt accelerator at
the Cavendish Laboratory in
Cambridge

p. 188 item 1887

1.5-million accelerator for heavy
particles

p. 255 item 2552

2 to 6 million volts

p. 237 item 2376

six million volt accelerator

p. 77 item 770, 771

p. 154 item 1546

billion volt electron reactions
(Stanford)

p. 427 item 4274 SR

3-bev proton accelerator

p. 232 item 2323

100 billion-volt accelerator

p. 78 item 788

Australia

p. 451 item 4518

Berkeley

p. 196 item 1961

Cavendish Laboratory

p. 57 item 575

European electron induction
accelerators

p. 194 item 1941

University of California

p. 68 item 684

ACCELERATORS - IN GENERAL

United States and outside

p. 436 item 4365 SR

U. S. A.

p. 438 item 4389 SR

apparatus for multiply
acceleration

p. 222 item 2229

apparatus of the Ivry Atomic-
Synthesis Laboratory in France

p. 336 item 3360

application of resonant cavity

p. 168 item 1686

axial motion of an electron in
accelerator

p. 61 item 618

axial motion of electrons in a
accelerator with beta equal to
1

p. 350 item 3506

bibliography, 1951

p. 436 item 4365 SR

bibliography of particle
accelerators

p. 327 item 3274

electron accelerator, biological
effect

p. 199 item 1999

cavity accelerator for electrons

p. 321 item 3214

cavity resonators (3000
megacycles)

p. 80 item 805

characteristics of electron
accelerator targets

p. 449 item 4492

currents in an accelerator tube

p. 183 item 1832

ACCELERATORS - IN GENERAL

effect of starting phase on
acceleration

p. 87 item 872

effect of the electron beam
on voltage distribution

p. 373 item 3730

electron accelerator development

p. 423 item 4238 SR

electronic orbits in induction
accelerator

p. 201 item 2011

energy and phase distributions
of electrons

p. 350 item 3507

energy doubling in direct-current
machines

p. 11 item 117

energy loss and damping in accelera-
tors

p. 322 item 3224

experimental electron accelerator

p. 172 item 1720

focusing method for large accelerators

p. 204 item 2046

for heavy particles

p. 133 item 1332

p. 314 item 3149

for nuclear physics investigation

p. 424 item 4246 SK

"Gigator", a proposed circular
accelerator

p. 382 item 3826

high energy accelerator conference
1952

p. 399 item 3994 SR

high velocity protons by repeated
accelerations

p. 94 item 941

ACCELERATORS - IN GENERAL

importance of gas scattering

p. 301 item 3018

ion acceleration tube
(van de Graaff)

p. 55 item 554

ion optics in accelerator
tubes

p. 108 item 1084

ion source equipment for
Berkeley generator

p. 120 item 1204

machines for acceleration

p. 4 item 47

p. 87 item 873

machines for high energy
particles

p. 131 item 1311

methods for producing irra-
diation effects

p. 393 item 3934

microwave accelerator for
high intensity gamma rays

p. 209 item 2095

modulation and other techniques
used with ion accelerators

p. 248 item 2483

multiple cavity electron
accelerator

p. 255 item 2557

new accelerators of charged
particles

p. 152 item 1525

of subatomic particles

p. 241 item 2415

operation of a radio-frequency
ion source

p. 258 item 2585

ACCELERATORS - IN GENERAL

optical focusing in constant
radius accelerator
p. 276 item 2760

particle accelerators
p. 369 item 3696

particle injection into accelerators
p. 191 item 1918

production of 4.8 million volt
hydrogen ions
p. 232 item 2322

production of high-speed hydrogen
ions without high voltages
p. 223 item 2232

production of high-speed ions
without high voltages
p. 223 item 2230

production of high-speed protons
without high voltages
p. 223 item 2231

production of positive ions by
multiply accelerations
p. 356 item 3567

progress in accelerators
p. 69 item 690

progress reports, 1952
p. 424 item 4245 SR

pulse technique for acceleration
p. 47 item 474

radiation by electrons in circular
accelerators
p. 205 item 2055, 2058

radiation from induction accelerator
p. 200 item 2009
p. 201 item 2010

radiation intensity from accelerators
p. 223 item 2234

ACCELERATORS - IN GENERAL

radiation losses in accelerator
p. 39 item 396

recent development (England)
p. 383 item 3831

reciprocity calibration of
accelerometers
p. 161 item 1614

resonance accelerator for
neutrons
p. 166 item 1661

resonant cavity accelerator
p. 70 item 706, 714

spiral accelerator for heavy
particles
p. 87 item 871

study of a proton accelerator
p. 275 item 2751

synchronization of pulsed high-
energy beams
p. 88 item 889

target
p. 373 item 3738

three-stage resonant cavity
accelerator
p. 82 item 824

wave guide acceleration of
particles
p. 180 item 1806

voltage distribution in
accelerating tube
p. 163 item 1630

ultraviolet rays as accelerators
of the velocity of reaction
p. 287 item 2871

with air-cored field
p. 172 item 1721

ion optics

p. 108 item 1085

nuclear research

p. 430 item 4309 SR

production of high voltages

p. 146 item 1461

regulator for stability

p. 132 item 1324

nuclear research

p. 430 item 4309

regulator for stabilization

p. 132 item 1324

theory of ion optics

p. 108 item 1085

van de Graaff injector for
Brookhaven cosmotron

p. 168 item 1682

ACETALDEHYDE

formation in irradiation of proteins

p. 174 item 1741

ACETONE

absorption of ultraviolet rays

p. 35 item 351

ACETYLENE

absorption of ultraviolet rays

p. 167 item 1673

ACIDS

see also: fatty acids, etc.

absorption by ultraviolet rays

p. 35 item 353

ACIDS

absorption of fatty acids by
ultraviolet rays

p. 35 item 350, 352

absorption of ultraviolet rays
by nucleic acids

p. 74 item 747

action of ultraviolet rays on bacteria
and absorption by amino acids

p. 161 item 1611

action of X-rays on benzoic acid

p. 344 item 3442

action of X-rays on nucleic acid
metabolism

p. 7 item 70

action of X-rays on perchloric acid

p. 257 item 2570

biological assay of nucleic acid
constituents produced by radiation
injury

p. 412 item 4122 SR

biological significance of ionizing
radiations of nucleic acids

p. 375 item 3756

chemical action of ionizing radiations
on nucleic acids

p. 319 item 3196

chemical action of X-rays on nucleic
acids

p. 319 item 3195, 3197

decomposition of fatty acids by alpha
particles

p. 381 item 3816

decomposition of lactic acid by ultra-
violet rays

p. 112 item 1127

dispersion and absorption of ultra
waves

p. 378 item 3786a

ACIDS

disturbance of nucleic acid
metabolism by X- and gamma
radiation

p. 258 item 2582

effect of cathode rays on C-14
acids

p. 78 item 782

effect of irradiation on for-
mation of nucleic acids

p. 198 item 1981

effects of radioactivity on
fatty acids

p. 326 item 3264

effect of ultraviolet rays on
alkylcoumaric acids

p. 345 item 3459

effect of ultraviolet rays on
nucleic acids

p. 79 item 792

effect of X-radiation on thymus
nucleic acid

p. 353 item 3533

effect of X-rays on incorporation
of C-14 into nucleic acid

p. 170 item 1701

effect of X-rays on nucleic acids

p. 5 item 59

p. 87 item 876

p. 276 item 2762

effect of X-rays on synthesis of
fatty acids in bone marrow
homogenates

p. 11 item 116

formation of hydrocarbons from
fatty acids by alpha particle
bombardment

p. 326 item 3266

formation of phosphate esters
by X-irradiated nucleic acids

p. 319 item 3194

ACIDS

irradiation

p. 133 item 1339

irradiation induced auto-
oxidation of linoleic acid

p. 251 item 2510

radiation induced changes in
nucleic acids

p. 398 item 3987 SR

radiochemical changes in fatty
acids

p. 177 item 1778

rearrangement of unsaturated acids
by ultraviolet rays

p. 346 item 3460

reflected X-ray spectra

p. 53 item 531

synthesis of nucleic acid in
irradiated escherichia coli

p. 198 item 1983

X-ray identification of higher
fatty acids

p. 260 item 2608

X-ray induced oxidation of fatty
acids

p. 362 item 3621

X-ray investigation of fatty acids

p. 137 item 1377

p. 264 item 2644

X-ray reflections from fatty acids

p. 289 item 2890

X-ray studies on nucleic acids

p. 15 item 159

ADSORPTION

effect of X- and gamma radiation

p. 160 item 1606

experiments with radium D and E

p. 249 item 2490

AGGLUTININS

preservation in ultraviolet
killed bacteria

p. 343 item 3430

AGRICULTURE

progress report of research program
1952 (University of Tennessee)

p. 430 item 4304 SR

use of isotopes

p. 74 item 741

AIR

absorption of gamma rays

p. 169 item 1696

disinfection with ultraviolet
rays

p. 306 item 3066

effect on ultraviolet bacteria
in air

p. 325 item 3256, 3258

electrical conductivity imparted
to liquid air by alpha rays

p. 250 item 2503

irradiation by ultraviolet rays

p. 323 item 3238, 3239

sterilization by ultraviolet rays

p. 94 item 947

p. 253 item 2539

AIR IRRADIATION

p. 19 item 199

p. 135 item 1351

p. 222 item 2222

p. 245 item 2459

bactericidal action of ultraviolet
rays

p. 299 item 2991, 2992

by ultraviolet rays

p. 318 item 3183

control of respiratory illness
caused by ultraviolet lights

p. 101 item 1015

AIR IRRADIATION

effect of ultraviolet rays on
influenza virus

p. 351 item 3519

efficacy of ultraviolet rays in
killing bacteria

p. 380 item 3806

for industrial fermentations

p. 342 item 3427

sterilization of caverns with
ultraviolet rays

p. 362 item 3623

with ultraviolet rays

p. 344 item 3445

ALBUMIN

action of ultraviolet rays

p. 207 item 2073

alpha-irradiated

p. 63 item 630

coagulation by ultraviolet rays

p. 71, item 710

denaturation by ultraviolet rays

p. 70 item 709

denaturation of X-rayed egg albumin

p. 127 item 1279

inactivation with low voltage electrons

p. 18 item 1828

polymerization by X-rays

p. 62 item 629

stabilization during ultraviolet
irradiation of plasma

p. 172 item 1728

ALCOHOL

absorption by ultraviolet rays

p. 35 item 353

ALDEHYDES

absorption by ultraviolet rays

p. 35 item 353

ALPHA RAYS

abnormal scattering

p. 155 item 1557

absolute velocity measurements

p. 306 item 3065

absorption

p. 241 item 2419

acceleration

p. 191 item 1919

absorption by matter

p. 241 item 2418

action on bacteriophage

p. 43 item 432

action on dielectric solids

p. 34 item 343

action on glass

p. 311 item 3116

action on protoplasm

p. 119 item 1193

action on protoplasm of plant
cell

p. 346 item 3463

alpha-alpha scattering from 12.88
to 21.62 mev

p. 343 item 3438

and atomic nucleus

p. 388 item 3886

analysis by an annular magnetic
field

p. 312 item 3129

analysis of an emission in the
rare earth region

p. 245 item 2451

analysis of long-range particles
from Radium C

p. 313 item 3130

ALPHA RAYS

anomalous dispersion
p. 92 item 926
p. 332 item 3327

anomalous scattering
p. 160 item 1602

artificial disintegration
p. 64 item 649

artificial radioactivity of
atomic nuclei after alpha
bombardment
p. 253 item 2538

binding energy of particles
p. 183 item 1837

biological action
p. 183 item 1833

blackening law
p. 45 item 459
p. 314 item 3148

bombardment of elements
p. 312 item 3120

calculation of the ground state
of the particles
p. 349 item 3499

capture and loss of electrons
p. 165 item 1656

change on the alpha particles
p. 327 item 3278

chemical effects
p. 390 item 3903, 3904

chemical effects in liquids
p. 92 item 928

collision with light atoms
p. 89 item 892

comparison of rays produced by
different substances
p. 38 item 384

ALPHA RAYS

counting from solids sources
p. 197 item 1978

counting of particles
p. 223 item 2237

correlation of decay rates
p. 295 item 2954

deamination of glycine
p. 86 item 866

decomposition of fatty acids
p. 381 item 3816

decomposition of water
p. 103 item 1032

decomposition of water,
oxidation of ferrous sulfate
p. 271 item 2716

decrease of energy on passing
through matter
p. 165 item 1657

decrease in velocity of
particles from radium C
p. 51 item 518

decrease in velocity on
passing through matter
p. 121 item 1216
p. 244 item 2447

detector for dosimetry in
cell irradiation
p. 305 item 3050

deterioration of anthracene
p. 36 item 369

detonation action
p. 286 item 2860

distribution of alpha ray in-
tensity in an absorbing medium
p. 329 item 3291

ALPHA RAYS

distribution of lengths
p. 82 item 825

effect of oxygen on chromosome
aberrations
p. 357 item 3574

effect on color of solids
p. 99 item 998

effect on nucleus and plasma of the
cell
p. 281 item 2810

effect on organic compounds
p. 404 item 4046 SR

effect on plant cells
p. 395 item 3958

effect on water
p. 43 item 430, 435-437

electrical charges
p. 88 item 884, 883

electrical conductivity imparted
to liquid air
p. 250 item 2503

electrical method of enumeration
p. 257 item 2579

emission of neutrons by action on
light elements
p. 82 item 829

energies
p. 384 item 3846-3849

energies and periods of disintegration
p. 32 item 323

energy in radium family and radiothorium
p. 24 item 248

energy measurements
p. 53 item 536

ALPHA RAYS

energy of particles from
nuclei
p. 292 item 2925

evaluation of absorption
p. 8 item 80

evaluation of counting
instruments
p. 411 item 4117 SR

evidence of rays of long
range by the Wilson fog
method
p. 252 item 2526

excitation of gamma radiation
by alpha particles from radium
p. 331 item 3317

excitation of gamma rays
p. 64 item 645, 646
p. 65 item 651

exciting the electron emission
p. 27 item 276

fine structure
p. 133 item 1337

fine structure of magnetic
spectrum
p. 306 item 3061

forged ray tracks
p. 37 item 377

formation of gamma rays
p. 7 item 78

formation of hydrocarbons
from fatty acids
p. 326 item 3266

formation of particles in
nuclei
p. 182 item 1829

ALPHA RAYS

from radium C

p. 385 item 3850

fundamental state of nuclear
partioles

p. 133 item 1335

homogeneous groups of long-
range particles from radium C

p. 282 item 2822, 2823

inactivation of peptidase

p. 86 item 868

influencing the rate of
transformations

p. 88 item 886

inhibiting the cell division

p. 419 item 4193 SR

ion concentration and biological
effectiveness

p. 395 item 3957

ionization current curve

p. 229 item 2298

ionization produced

p. 61 item 613

p. 135 item 1357, 1359

p. 263 item 2636

ionization tracks in hydrogen

p. 250 item 2504

ionizing by alpha radiation

p. 297 item 2971

ionizing radiations and mechanism
of action

p. 23 item 235

interaction of hydrogen and
chlorine

p. 353 item 3538

irradiation of albumin

p. 63 item 630

ALPHA RAYS

irradiation of albumin

p. 63 item 630

joint chemical action of alpha
and beta rays

p. 366 item 3663

kinetics of ionization

p. 264 item 2649

laws of deflexion through large
angles

p. 136 item 1361

lethal effects on escherichia
coli

p. 99 item 996

p. 404 item 4040 SR

life history

p. 310 item 3107

long range particles

p. 25 item 251

long-range particles and the
origin of gamma rays

p. 312 item 3128

mass and velocities

p. 310 item 3108

measurement

p. 80 item 802

measurement of range

p. 135 item 1354

mechanism of atomic disintegration
by alpha rays

p. 204 item 2043, 2044

mechanism of bactericidal action

p. 225 item 2254

mechanism of emission

p. 238 item 2384

method of registering the range

p. 351 item 3513

ALPHA RAYS

motion of particles

p. 302 item 3020

natural curvature of their
tracks

p. 37 item 376

nature of chemical action and
role of ions

p. 230 item 2304

nature of ionization

p. 378 item 3789

new effect

p. 140 item 1409

new theory of disintegration

p. 195 item 1955

number emitted by radium

p. 169 item 1697

number of ions produced from
radium C

p. 123 item 1238

of radium C and A and range
distribution

p. 83 item 831

origin of rays of 2 cm range

p. 317 item 3179

oxidation and reductions induced
by alpha and X-rays

p. 157 item 1574

ozonization and interaction of
oxygen with nitrogen

p. 230 item 2306

passage through gases

p. 45 item 451

passage through hydrogen

p. 244 item 2443, 2445

passage through matter

p. 384 item 3840

ALPHA RAYS

particles of radium

p. 15 item 156

phosphorescence produced

p. 244 item 2444

photographic action

p. 314 item 3145

photographic counting

p. 185 item 1853

photographic registration of
particles

p. 136 item 1364

possible errors in measurements

p. 342 item 3422

possible relation to the quantum
hypothesis

p. 295 item 2955

probability variations in dis-
tribution

p. 334 item 3344

producing delta rays

p. 64 item 648

production at Princeton
cyclotron

p. 381 item 3812

production of artificial
radioactivity

p. 203 item 2031

quantitative theory of emission

p. 168 item 1687

radiation dosimetry in single
cells

p. 437 item 4370 SR

radiation induced by particles in
thin films

p. 270 item 2704

radiation of thick layers

p. 121 item 1215

p. 322 item 3220

ALPHA RAYS

radiochromism of organic
substances

p. 154 item 1543

range and absorption

p. 15 item 157

range and chemical binding

p. 125 item 1252

range and ionization in gases

p. 354 item 3547

range-energy relation for protons
and alpha particles

p. 307 item 3076

range in air at different
temperatures

p. 211 item 2111

range in liquids

p. 254 item 2549

range in various media

p. 6 item 62

range in water

p. 154 item 1544

p. 168 item 1689

ranges of particles from
uranium

p. 136 item 1362

ranges of particles from
various substances

p. 136 item 1363

rate of emission from radium

p. 372 item 3723

recombination of ions

p. 272 item 2723

relation between alpha and
beta disintegration constants

p. 213 item 2136

ALPHA RAYS

relation between ranges and periods
of transformation of bodies

p. 385 item 3853

relation between ray activities and
ranges of radium and its products

p. 248 item 2480

relation of range and charges during
disintegration

p. 52 item 523 A

relation to beta and gamma emission

p. 118 item 1189

relation to gamma rays

p. 83 item 832

relationships between elements
emitting alpha rays

p. 350 item 3509

resonance scattering

p. 305 item 3058

retardation by matter

p. 306 item 3062, 3063

retardation by metals

p. 244 item 2446

p. 368 item 3681

retardation in hydrogen

p. 242 item 2420

reversed fine structure

p. 284 item 2849

saturation curve for ionization

p. 186 item 1867

scattering

p. 135 item 1356

p. 246 item 2467

p. 298 item 2986

scattering and the law of force

p. 310 item 3106

ALPHA RAYS

scattering and the structure
of the atom
p. 311 item 3113

scattering by gases
p. 312 item 3122

scattering by light nuclei
p. 35 item 355

scattering by matter
p. 135 item 1358

scintillations in organic compounds
p. 74 item 742

secondary particles induced by
375-mev particles
p. 96 item 965

secondary radiation
p. 34 item 344, 345

simple counting system
p. 306 item 3064

simple method of counting particles
p. 135 item 1355

a singular observation on ionization
p. 283 item 2831

spectra of radium C
p. 66 item 662

spectrum of radium
p. 24 item 247

sphere of action
p. 103 item 1030

splitting of protein molecules
p. 451 item 4154

spontaneous fission versus
alpha decay
p. 211 item 2118

ALPHA RAYS

standards
p. 346 item 3466

stopping in liquids and vapors
p. 282 item 2824

stopping power of water
p. 14 item 143

straggling

publications

p. 436 item 4361 SR

work and cost of research

p. 445 item 4453

ATOMIC ENERGY RESEARCH

bibliography of aspects

p. 1 item 17

ATOMIC ENERGY RESEARCH

in England

p. 0 item 2

at Harwell, England

p. 1 item 16

engineering problems

p. 330 item 3301

in France

p. 4 item 46

in India

p. 0 item 3

glossary of terms

p. 2 item 25

ATOMIC QUANTITIES

integral relations to nuclear
quantities

p. 387 item 3871

ATOMIC THEORY

numerical methods and computing

p. 101 item 1012

ATOMS

multiple X-ray ionization of
light atoms

p. 364 item 3646

AUTORADIOGRAPHY

p. 1 item 11

p. 46 item 467

AZOTOBACTER

mutants produced by beta irradiation

p. 421 item 4217 SR

BACILLUS SUBTILIS

effect of X-radiation
p. 38 item 383

BACTERIA

action of cold on repair of radio
lesions
p. 218 item 2189

action of electrons
p. 361 item 3616

action of ionizing radiation
p. 218 item 2183

action of longwave monographic
X-rays
p. 177 item 1771

action of radiations
p. 224 item 2245
p. 225 item 2253
p. 236 item 2369

action of ray energy of growth of
tubercle bacilli
p. 129 item 1295

action of ultraviolet rays
p. 57 item 571, 576
p. 133 item 1331
p. 155 item 1556
p. 232 item 2329

action of ultraviolet rays
and technique
p. 242 item 2426, 2427

action of ultraviolet rays
in relation to absorption by
amino acids
p. 161 item 1611

action of ultraviolet rays
in relation to chemical
constitution of media
p. 367 item 3672

BACTERIA

action of ultraviolet rays
in relation to chemical
constitution of media
p. 367 item 3672

action of ultraviolet rays on
antigenic, toxic and immuni-
zation characteristics
p. 362 item 3625

action of ultraviolet rays on
organisms in brewery
p. 318 item 3189

action of ultraviolet rays on
yeast-like fungi
p. 120 item 1201

action of X-rays and sulfan-
ilamide on staphylococcus
aureus
p. 122 item 1225

action of X and ultraviolet
rays on paradysentery bacillus
p. 219 item 2190

action of X-rays on antigens
p. 361 item 3610

action of X-rays on certain
bacteria
p. 292 item 2927

action of X-rays on euplotes
taylori
p. 54 item 543

action of X-rays on Puogenes
aureus
p. 134 item 1345

adapted enzyme formation in
ultraviolet irradiated
escherichia coli
p. 195 item 1952

BACTERIA

agglutinability after ultraviolet irradiation

p. 134 item 1341

antibacterial action of surface active cations

p. 366 item 3668, 3669

as a source of ultraviolet rays

p. 44 item 449

auxotrophic mutations in salmonella and relation to X-ray dosage

p. 284 item 2848

azotobacter mutants produced by beta irradiation

p. 421 item 4217 SR

bacterial cell

p. 103 item 1033

bactericidal action of different rays

p. 6 item 60

bactericidal action of ultraviolet rays

p. 25 item 257

p. 134 item 1347, 1348, 1350

p. 224 item 2247

p. 369 item 3694

bactericidal action of ultraviolet rays on air-borne organisms

p. 299 item 2991, 2992

bactericidal action of X-rays

in the presence of dyes

p. 179 item 1797

bactericidal action of X-rays, neutrons and radioactive emanations

p. 225 item 2252, 2254

BACTERIA

bactericidal effect of disinfecting lamps

p. 189 item 1892

bactericidal effect of ultraviolet rays on escherichia coli

p. 175 item 1752

bactericidal effect of X-rays

p. 258 item 2588

p. 278 item 2781

p. 361 item 3618

bactericidal effects of high-frequency sound waves

p. 384 item 3842

bactericidal fluorescence excited by X-rays

p. 269 item 2691

bactericidal power of ultraviolet rays

p. 190 item 1902

bactericidal properties of ultraviolet irradiated petrolatum

p. 323 item 3232

bactericidal radiation

p. 94 item 943

bactericidal uses of ultraviolet radiation

p. 357 item 3579

bacteriophage in X-ray inactivated bacteria

p. 214 item 2148, 2149

behavior of fungi with radioactive isotopes

p. 278 item 2787

BACTERIA

biologic action and killing effects
of X-rays on achromobacter
p. 234 item 2349

changes in escherichia coli after
X-irradiation
p. 36 item 363, 364, 365

characteristics of ultraviolet
induced mutation in aspergillus
p. 295 item 2951

chemical and biological action of
radiation
p. 375 item 3758, 3759

chemical changes in pigments by
light
p. 107 item 1076

chemical restoration in irradiated
microorganisms
p. 218 item 2185

comparative bacteriocidal effects of
ionizing radiations
p. 142 item 1425

comparison of mutants produced by X
and ultraviolet irradiation of
chaetomium globosum
p. 124 item 1242

control of reproduction in cation-
exchange layers
p. 206 item 2062

curbed by rays
p. 268 item 2681

cytogenic effects of radiations
p. 444 item 4443 SR, 4445 SR,
4446 SR

destruction by light
p. 25 item 258

destruction by sound waves
p. 161 item 1619

destruction by ultraviolet rays
in meat
p. 30 item 306

BACTERIA

different sensitivity to radiation
p. 218 item 2181

dissociation by X-rays
p. 156 item 1562, 1563,
1564

effect of biological factors on
X-ray survival curves
p. 18 item 185

effect of cathode rays on catalase
activity of micrococcus aureus
p. 292 item 2922

effect of cathode rays of flora
of spices and other dry food
materials
p. 292 item 2923

effect of cathode rays on spices
and other dry food
p. 450 item 4502

effect of cathode rays on certain
bacteria
p. 392 item 3925

effect of certain X-rays on
mobility of escherichia coli
p. 334 item 3340

effect of different agents on
irradiated escherichia coli
p. 111 item 1116

effect of electromagnetic waves
p. 190 item 1904

effect of gamma irradiation on
drosophila
p. 63 item 632

effect of gamma rays in radiation
sterilization
p. 352 item 3528
p. 400 item 4008 SR

BACTERIA

effect of ionizing radiations on
aspergillus niger

p. 31 item 314

effect of irradiated media on
escherichia coli

p. 56 item 562

effect of irradiation

p. 43 item 439

p. 104 item 1040

p. 411 item 4110 SR

effect of irradiation on
escherichia coli

p. 90 item 904

p. 101 item 1016

p. 231 item 2316

effect of irradiation on
recombination in escherichia coli

p. 156 item 1560

effect on mutation of neurospora
conidia

p. 17 item 170

effect of oxygen on X-ray irradiated
Escherichia coli

p. 12 item 127

effect of oxygen tension on X-ray
sensitivity of cells

p. 176 item 1762, 1761

effect of radiation and temperature
on fusarium

p. 333 item 3333

effect of radioactive phosphorus on
escherichia coli

p. 318 item 3184

BACTERIA

effect of radioactive phosphorus
on escherichia coli

p. 318 item 3184

effect of radium emanation

p. 105 item 1058

effect of radium ionizations
on fungi

p. 31 item 316

effect of radium

p. 338 item 3384

effect of radium on citric acid
aspergillus

p. 212 item 2123, 2124

effect of radium rays on colon
bacillus

p. 288 item 2880

effect of salts on germicidal
action of cathode rays

p. 104 item 1046

effect of sub-lethal ultra-
violet doses

p. 175 item 1753, 1754

effect of "super-soft" X-rays

p. 317 item 3170

effect of ultraviolet irradiation
in a fluorescent medium

p. 228 item 2281

effect of ultraviolet rays in air

p. 325 item 3256, 3258

effect of ultraviolet rays on
bacteria content of milk and water

p. 368 item 3688

BACTERIA

effect of ultraviolet rays on
bacteriophage action against
streptococcus lactis

p. 151 item 1511

effect of ultraviolet rays on
escherichia coli

p. 175 item 1750

effect of ultraviolet rays on
escherichia coli and its reversal

p. 287 item 2878

effect of ultraviolet rays on
fungus spores and decay in cherries

p. 111 item 1113

effect of ultraviolet rays on milk

p. 18 item 180, 181

effect of ultraviolet rays on
resistance to antibiotics

p. 316 item 3163

effect of ultraviolet rays on
saccharomyces

p. 274 item 2744

effect of ultraviolet rays on
spores

p. 99 item 990

effect of ultraviolet rays on
spores of aspergillus

p. 394 item 3940

effect of ultraviolet, X- and
cathode rays on spores of
mucoraceae

p. 237 item 2373

effect of visible light on
recovery of irradiated streptomyces
griseus

p. 198 item 1985

BACTERIA

effect of X-rays

p. 18 item 189

p. 22 item 228

p. 69 item 699

p. 190 item 1909

p. 206 item 2060

p. 257 item 2573

p. 302 item 3026, 3027

p. 348 item 3485

p. 387 item 3875

effect of X-rays (bibliography)

p. 304 item 3044

p. 398 item 3984 SR

effect of X-rays at 50 kv

p. 126 item 1266

effect of X-rays on aphthous
virus

p. 43 item 433

effect of X-rays on bacillus
subtilis

p. 38 item 383

effect of X-rays on bacteria
count of ground meat

p. 289 item 2897

p. 415 item 4156 SR

effect of X-rays on bacterial
cells

p. 436 item 4368 SR

effect of X-rays on bacterial
growth and phage production

p. 228 item 2285

effect of X-rays on bacterial
vaccine

p. 325 item 3253

effect of X-rays on bacteriophage

p. 43 item 432

BACTERIA

effect of X-rays on diseases
of bacterial origin
p. 199 item 1991

effect of X-rays on eberthella
typhosa
p. 146 item 1465

effect of X-rays on formation of
hydrogen lyase in escherichia coli
p. 36 item 362
p. 436 item 4369 SR

effect of X-rays on formation of
lactase in escherichia coli
p. 393 item 3931

effect of X-rays on microbes
p. 228 item 2284

effect of X-rays on microsporum
audouini
p. 234 item 2340

effect of X-rays on neurospora
crassa
p. 315 item 3154

effect of X-rays on nuclease of
tetrahymena
p. 107 item 1073

effect of X-rays on pandorina
colonies
p. 158 item 1581

effect of X-rays on staphy-
lococcus aureus and micro-
sporon audouini
p. 33 item 330

effect of X-rays on toxemia
p. 37 item 370

effect of X-rays on tubercle
bacilli
p. 156 item 1561
p. 217 item 2172

effect of X-rays on typhus
bacilli
p. 124 item 1243

BACTERIA

effectiveness of radiation on
tradescantia chromosomes
p. 76 item 760

efficacy of ultraviolet rays
in air irradiation
p. 380 item 3806

effectiveness of ultraviolet
rays in milk in terms of
energy adsorbed
p. 57 item 579

electron bombardment of spores
p. 90 item 906

elimination from meat with
ultraviolet rays
p. 72 item 726

elimination of salmonella in
egg powder by cathode rays
p. 291 item 2919

examination by X-ray diffraction
p. 125 item 1256

excitation of fluorescence by
beta and gamma rays
p. 278 item 2784

excitation of fluorescence by
X-rays
p. 278 item 2785

fungicidal action of ultraviolet
radiation
p. 132 item 1321

genetic and biochemical effects
of radiation
p. 430 item 4308 SR

genetics of resistance to radia-
tion in escherichia
p. 386 item 3869

germicidal action of ultraviolet
rays
p. 72 item 728
p. 333 item 3334

BACTERIA

germicidal lamps
p. 137 item 1372

growth and mutation during
continuous irradiation
p. 308 item 3087

growth in presence of radio-
active phosphorus
p. 69 item 696

growth of virus T2 on ultra-
violet-killed host cells
p. 13 item 133

habituation of bacillus
prodigiosus to light rays
p. 254 item 2545

heat reactivation of ultra-
violet inactivated bacteria
p. 12 item 128

inactivation by cathode rays
in haddock
p. 292 item 2924

inactivation of malarial
parasites by X-rays
p. 30 item 305

inactivation of toxic
filtrates by X-rays
p. 62 item 623

increased bactericidal effect
of inorganic compounds in
presence of X-rays
p. 270 item 2706

induced biochemical mutations
p. 353 item 3531

induced mutations and speciation
p. 175 item 1755, 1756

induced biochemical mutations in
bacillus subtilis
p. 58 item 580

induced resistance to gamma
irradiation in escherichia coli
p. 132 item 1327

BACTERIA

induction of sterility mutation
in drosophila by ultraviolet rays
p. 106 item 1063

influence of host on radiation
sensitivity
p. 129 item 1296

influence of light upon ultra-
violet action on papamecium
p. 202 item 2026

influence of temperature on
activation of a bacterial
virus by X-rays
p. 397 item 3975 SR

influence of 24-hour gamma
irradiation on drosophila
p. 439 item 4398 SR

influence of ultraviolet rays
on pigment production
p. 271 item 2711

influence of X-radiation on
agglutination
p. 72 item 724

inherited differences in
sensitivity to radiation in
escherichia
p. 387 item 3870

interference between inactivated
and active virus
p. 237 item 2370

internal organization of bacteria
cells with reference to phage
infection by ultraviolet radiation
p. 422 item 4223 SR

investigation of ultraviolet action
p. 245 item 2455

ionization effects on a bacterial
virus
p. 6 item 65

irradiation with ultraviolet rays
p. 36 item 367

BACTERIA

killing effect of various parts
of spectrum
p. 34 item 347,348,349

killing of certain bacteria
by X-rays
p. 392 item 3922

killing of bacterium coli in
6-mev betatron
p. 97 item 979

killing of colon bacilli by
ultraviolet rays
p. 392 item 3920

killing of colon bacilli by
X-rays
p. 392 item 3921

killing with ultraviolet
radiation
p. 59 item 598

lethal action of ultraviolet
rays on pathogenic bacteria
p. 325 item 3257

lethal and sublethal effects
of X-rays on escherichia coli
p. 304 item 3045

lethal effect of sonic energy
p. 28 item 287

lethal effect of ultraviolet
radiation by mercury lamp
p. 209 item 2091

lethal effects of X-rays,
alpha rays and deuterons on
escherichia coli
p. 99 item 996

lethal effects of X-rays,
deuterons and alpha rays on
escherichia coli
p. 404 item 4040 SR

lethal effects of X-rays on
bacillus coli
p. 72 item 720

BACTERIA

lethal mutations and bactericidal
action of ionizing radiation
p. 435 item 4358 SR

lethal mutations by radium
irradiation in drosophila
p. 160 item 1601

lethal mutations produced by
ultraviolet and X-rays in spores
p. 124 item 1241

liberation of bacteriophage by
staphylococci after ultraviolet
irradiation
p. 230 item 2301

light reactivation of ultraviolet
inactivated bacteria
p. 271 item 2714

low bacteria count milk by ultra-
violet irradiation
p. 269 item 2692

mechanism of bactericidal action
of alpha and beta rays
p. 225 item 2254

mechanism of bacteriocidal action
of ultraviolet rays
p. 107 item 1071

microbicidal action of X-rays
p. 218 item 2182

micrographs of X-irradiated
escherichia cells
p. 107 item 1075

mitotic effects of gamma rays on
chortophaganeuroblast
p. 62 item 622

mode of action of X-rays on
bacteriophage
p. 177 item 1775

modification of radiation damage
after X-irradiation
p. 175 item 1759

BACTERIA

modification of X-ray action
on paramecium

p. 437 item 4371 SR

modification of X-ray induced
mutation in fungi

p. 175 item 1758

molecules against microbes

p. 105 item 1053

mortality of X-irradiated
bacteria

p. 215 item 2159, 2160, 2161

mutations and bactericidal effect
by radiation

p. 17 item 172

mutations by radiation

p. 17 item 171

mutations in staphylococcus by
irradiation of substrate

p. 346 item 3467

mutations induced by irradiation

p. 93 item 935, 936, 937

nature of action of ultraviolet
rays

p. 272. item 2724

new forms of eutorulpsis dubia by
X-radiation

p. 77 item 776

new method for control in canning
industry

p. 304 item 3047

O2 consumption on X-irradiation

p. 126 item 1263

origin of biological effect of
X-rays on singlecelled organisms

p. 319 item 3190

BACTERIA

oxygen removal in protection against
X-inactivation

p. 342 item 3420

penetrating power of ultraviolet
rays emitted by carbon

p. 369 item 3695

point of attack of rays

p. 30 item 301

preservation of agglutinins in
ultraviolet killed bacteria

p. 343 item 3430

primary effects following action
of X-rays and electrons on tissue
cultures

p. 134 item 1340

probability curve of X-ray effect
on bacilli

p. 83 item 833

production of phencopies in
aerobacter aerogenes

p. 403 item 4034 SR

protection by pyrovate against
radiation effects

p. 357 item 3577

radiation damage to drosophila
during X-radiation

p. 130 item 1306

radiation effects on heat
resistance of bacterial spores

p. 406 item 4061 SR, 4063 SR

radiation induced mutations

p. 396 item 3968 SR

radiation induced mutations in
chemical requirements in salmonella

p. 284 item 2847

BACTERIA

radiation mutants of aspergillus
niger
p. 31 item 315

radiosensibility of bacillus
prodigiosus in soft X-rays
p. 177 item 1774

rapid temperature changes
in therman death time studies
p. 345 item 3450

ray biology
p. 192 item 1922

"Ray Table" unit curbs bacteria
p. 38 item 381

reaction to ultraviolet
irradiation
p. 134 item 1349

reactivation of ultraviolet
inactivated bacteria
p. 227 item 2272

reactivation of ultraviolet
irradiated escherichia by
pyruvate
p. 440 item 4407 SR

reactivation of ultraviolet
sterilized bacteria
p. 259 item 2594

reactivation of X-irradiated
colon bacteria
p. 217 item 2173

recovery from ultraviolet
irradiation in echerichia
coli
p. 303 item 3038

recovery of irradiated
bacteria at suboptimal
temperatures
p. 341 item 3419

relation to reactivation
after ultraviolet irradiation
p. 190 item 1903

BACTERIA

resistance to potassium hydroxide
after irradiation
p. 134 item 1342

resistance of spores to gamma
radiation
p. 297 item 2975

resistance to ultraviolet rays
p. 7 item 75

restoration in irradiated
microorganisms by catalase
p. 219 item 2195

restoration induced by catalase
in irradiated bacteria
p. 255 item 2553

restoration of viability by
metabolites
p. 164 item 1646

restorative action of
peroxidase on irradiated bacteria
p. 218 item 2186

sensitivity to radium beta and
gamma rays
p. 338 item 3385

sensitization by beta radiation
to temperature and repeated
radiation
p. 146 item 1463

sensitizing spores to heat by
ultraviolet rays
p. 83 item 837

survival in dust: bacteriocidal
action of ultraviolet irradiation
p. 229 item 2295

stimulating effect of irradiated
bacterial cells
p. 93 item 931

stimulating effect of ultra-
violet rays on recombination in
bact. coli
p. 163 item 1636

BACTERIA

stimulation of growth in
aspergillus niger by
oathode rays

p. 56 item 566

temperature dependence of
inactivation by X-rays

p. 341 item 3417

theory and practice of
killing by ultraviolet rays

p. 226 item 2269

theory on the killing by
irradiation

p. 192 item 1921

thermal inactivation of
bacterial viruses

p. 285 item 2854

transformation of escherichia
from virus sensitive to virus
resistant

p. 413 item 4130 SR

transmission of radiation
through glass

p. 341 item 3416

ultraviolet induced mutations
in aspergillus

p. 176 item 1762a

ultraviolet irradiation of
escherichia coli and
streptomyces griseus

p. 198 item 1984

ultraviolet lamps to control
fungi

p. 266 item 2669

ultraviolet rays as germicidal
agents

p. 114 item 1145

BACTERIA

use of radioactive isotopes
for study

p. 159 item 1592

variants of streptomyces
griseus induced by ultraviolet
radiation

p. 283 item 2839

viability of X-irradiated
drosophila

p. 145 item 1457, 1458

vitamin D potency of germicidal
radiation

p. 286 item 2863

volume increase from X-irradiation

p. 98 item 986

X- and ultraviolet induced
mutation in streptomyces and
actinomyces flaveolus

p. 198 item 1987, 1988

X-ray diffraction pattern given
by bacterial flagella

p. 375 item 3750

X-ray diffraction study of the
structure

p. 16 item 160

X-ray inactivation of saccharomyces

p. 236 item 2360

X-ray induced growth factor
requirements

p. 150 item 1506

X-ray induced mutant strains of
escherichia coli

p. 25 item 252

X-ray induced mutations

p. 97 item 970

BACTERIA

X-ray irradiation of phytomonas
p. 230 item 2303

BACTERIOPHAGE

action of alpha rays
p. 43 item 432

action of ultraviolet rays
p. 249 item 2498

bacteriophage and radiation
mechanism
p. 407 item 4072 SR

behavior on ultraviolet
irradiation in a fluorescent
medium
p. 227 item 2279

development in X-ray in-
activated bacteria
p. 214 item 2148, 2149

effect of oxygen on X-ray
inactivation
p. 171 item 1710

effects of radiation
p. 314 item 3147
p. 389 item 3891

effect of radioactivity on
biological activity
p. 443 item 4434 SR to 4438 SR

effect of radium emanation
p. 105 item 1058

effect of X-rays
p. 28 item 288
p. 199 item 1992

effect of X-rays on bacterial growth
and phage production
p. 228 item 2285

inactivation after irradiation
p. 11 item 113

BACTERIOPHAGE

inactivation by radiations
p. 224 item 2248

inactivation by ionizing
radiation

p. 11 item 115
p. 285 item 2852

inactivation by long wave length
radiations
p. 370 item 3701

inactivation by ultraviolet rays
p. 219 item 2193, 2194

inactivation by soft X-rays
p. 153 item 1537

inactivation by X-rays
p. 237 item 2371

intercellular growth by X-
irradiation
p. 218 item 2187

law of reciprocity in
irradiation
p. 219 item 2191

liberation by staphylococci
after ultraviolet irradiation
p. 230 item 2301

microscopy of ultraviolet
irradiated bacteria
p. 215 item 2150

new effect of X-rays
p. 11 item 114

protection against X-rays by
neutral salts
p. 421 item 4212 SR

reactivation after ultraviolet
irradiation
p. 104 item 1042, 1043

BACTERIOPHAGE

resistance to ultraviolet rays
p. 121 item 1210

temperature effect on
irradiation damage
p. 421 item 4213 SR

ultraviolet irradiation of
cheese molds and bacteriophage
p. 349 item 3497

X-radiation-catalase-nitrite
relationship
p. 18 item 184

BAKED PRODUCTS

effects of ultraviolet radiation
on chemical and nutritive
properties
p. 296 item 2966

BARLEY

biological action of X-rays and
neutrons
p. 201 item 2017

comparison of effects of X-rays
and neutrons on barley seeds
p. 400 item 4000 SR

effect of oxygen on sensitivity
to gamma radiation
p. 352 item 3520

neutron and X-ray experiments
p. 237 item 2379

radiation induced mutation
p. 14 item 149

BEAMS

of high energy particles
p. 385 item 3855

BEER

sterilization by radiation
p. 1 item 14

BENZENE

action of X-rays
p. 344 item 3442

BENZENE

effect of cobalt gamma radiation
p. 351 item 3511

BENZOIC ACID

action of X-rays
p. 344 item 3442

effect of X-irradiation
p. 355 item 3550

BETA RAYS

beta rays
p. 148 item 1481

absence of electrons of multiple
mass in radiation of radium E
p. 157 item 1577

absolute beta-counting
p. 59 item 590

absolute calibrations of weak
emitters
p. 254 item 2548

absolute counting
p. 140 item 1402

absolute energies of the spectra
lines
p. 109 item 1092

absorbed energy around a point
source of radiation
p. 233 item 2338

absorption
p. 148 item 1483
p. 149 item 1492
p. 367 item 3674

absorption and diffusion in
gases and vapors
p. 130 item 1303

absorption and range of radium
E rays
p. 101 item 1013

absorption and reduction in
velocity on passage through
matter
p. 238 item 2383

BETA RAYS

absorption and reflection by matter
 p. 211 item 2112
 p. 385 item 3856

absorption by air of radium C rays
 p. 113 item 1139

absorption by matter
 p. 125 item 1257, 1259
 p. 126 item 1260, 1261
 p. 219 item 2199
 p. 386 item 3860

absorption curves and ranges
 p. 245 item 2450

absorption from some substances
 by air and carbon dioxide
 p. 211 item 2110

absorption law
 p. 156 item 1567

absorption method for energy
 measurement
 p. 39 item 391

action on protoplasm
 p. 119 item 1193

action on protoplasm of plant
 cell
 p. 346 item 3463

activity
 p. 3 item 35

activity induced by gamma rays
 p. 295 item 2953

allowed and forbidden decay
 p. 391 item 3911

analysis of radium B and C rays
 p. 312 item 3125

analysis of soft X-rays
 p. 28 item 282

and structure of the atom
 p. 52 item 523

BETA RAYS

and X-rays

p. 52 item 524

angular correlation between beta
 and gamma rays in beta transition
 p. 146 item 1462

angular correlation of electrons
 in beta decay
 p. 288 item 2885

applications of spectroscopy
 p. 177 item 1779

associated with scattered X-rays
 p. 271 item 2717

asymmetric emission
 p. 350 item 3502

atomic-binding-energy in
 negative beta decay
 p. 321 item 3218

atomic excitation in beta decay
 p. 321 item 3216

beta decay of radium E and the
 pseudoscalar interaction
 p. 281 item 2817

beta-gamma-angular correlation
 p. 33 item 336, 337
 p. 117 item 1170
 p. 271 item 2712
 p. 301 item 3019

beta-gamma angular correlation
 in beta decay
 p. 134 item 1343

beta-gamma polarization
 correlations
 p. 159 item 1591

beta disintegration of radium E
 p. 394 item 3942

beta type of disintegration
 p. 110 item 1105

BETA RAYS

biological effectiveness as shown
by the radiotoxicity of Na-24
p. 334 item 3345

blackening law

p. 45 item 459
p. 314 item 3148

bremssstrahlung of radium E rays
p. 102 item 1024

calculations on spectra
p. 285 item 2855

calibrations of beta emitters
p. 178 item 1788

changes in beta radiation of
certain radium preparations
p. 227 item 2276

changes in protoplasm of
nereis eggs
p. 123 item 1239

characteristic spectra
p. 357 item 3570

cloud-chamber geometry
p. 283 item 2838

coloring of organic substances
with radium rays
p. 269 item 2698

Compton's theory and the
radiations of radioactive
substances
p. 83 item 834

connection with gamma ray spectra
p. 311 item 3110

continuous gamma radiation during
beta decay
p. 371 item 3717

continuous spectrum
p. 110 item 1104

corpuscular hypothesis of gamma,
X- and beta rays
p. 49 item 491

BETA RAYS

correlation between beta electron
and gamma quantum
p. 100 item 1006

cross terms in beta decay
p. 207 item 2074

curved tracks of particles
p. 195 item 1951

decay at low energies
p. 426 item 4267 SR

decrease of velocity in passing
through matter
p. 295 item 2956
p. 385 item 3859

detection from radium A
p. 240 item 2405

determination of endpoint
energies
p. 196 item 1963

determination of energy of
primary rays from radium E
p. 253 item 2530

determination of maximum
energy
p. 124 item 1245

determination of mean energy
of radium D rays
p. 396 item 3961

determination of range
p. 251 item 2517

determination of rate of emission
from substances
p. 149 item 1499

deviation by nitrogen nuclei
p. 216 item 2162

disintegrations
p.

distribution of velocity
p. 148 item 1486

BETA RAYS

dosage measurements

p. 398 item 3988 SR

dosimetry for biological experiments

p. 115 item 1152

dosimetry of radium rays by the biological method

p. 19 item 193

dosimetry of the beta radiation of isotopes

p. 336 item 3361

double decay

p. 120 item 1207, 1208
147 item 1417
184 item 1841

effect of deBroglie wavelength in beta decay

p. 305 item 3059

effect of irradiation of melanoplus (locust)

p. 351 item 3516

effect of isotopes in fruit trees

p. 106 item 1066

effect of nuclear charge on beta-gamma correlations

p. 131 item 1317

effect of radium rays on density of liquids

p. 13 item 138

effect of screening on beta ray spectra

p. 292 item 2990

effect on biochemical oxidation in polluted waters

p. 415 item 4151 SR

effect on color of solids

p. 99 item 998

BETA RAYS

effect on color of solids

p. 99 item 998

effect on habrobracon

p. 12 item 122
p. 94 item 944

effect on organic compounds

p. 404 item 4046 SR

effect on protoplasma

p. 275 item 2756

effect on protoplasmic viscosity of cells

p. 368 item 3685

effective range

p. 148 item 1487

emitted by radioactive isotopes and their energy

p. 243 item 2435

electric charges

p. 88 item 883, 884

electrical density and absorption

p. 315 item 3153

emergent from materials of different weights and thicknesses produced by gamma rays

p. 210 item 2108

emission and conservation laws

p. 27 item 271

emission from a metallic film and relation to quantum theory of X-ray scattering

p. 329 item 3299

emission of light positive particles from beta ray emitting substances

p. 375 item 3753

BETA RAYS

emission of positive electrons
p. 27 item 272
p. 24 item 248

emission rate
p. 71 item 717, 718

emitted by artificially produced
radioactive substances
p. 214 item 2147

energies
p. 384 item 3847, 3848

energies of radioactive isotopes
p. 256 item 2564

energy determination by absorption
p. 140 item 1406

energy distribution in forbidden
transitions
p. 209 item 2097

energy groups in spectrum of
radium C beta rays
p. 109 1093

energy of secondary rays produced
by gamma rays
p. 35 item 359

energy of spectra
p. 63 item 633

energy of the radium group
p. 311 item 3111

energy relations with X-rays
p. 147 item 1477

energy spectrum of radium
E rays
p. 322 item 3226

BETA RAYS

estimation of activities from
bremsstrahlung measurements
p. 360 item 3609

evaluation of radium rays due
to extended linear sources
p. 113 item 1133

excitation of bacterial
fluorescence
p. 278 item 2784

excitation of characteristic
X-rays
p. 106 item 1064

excitation of gamma rays
p. 300 item 3001
p. 342 item 3428
p. 351 item 3514

explanation of activity
p. 314 item 3143

explanation of continuous
spectrum
p. 252 item 2520

external irradiation and bio-
logical and comparative lethal
effects
p. 295 item 2950

energy distribution from
particle sources
p. 233 item 2337

failure of beta-decay theory
p. 77 item 774

Fermi theory
p. 209 item 2096

Fermi theory of decay
p. 120 item 1203
p. 144 item 1447
p. 285 item 2856

BETA RAYS

film measurement of depth dose
p. 360 item 3602

first-forbidden beta-decay matrix elements
p. 7 item 74

forbidden spectra
p. 333 item 3330

from radium B and C comparison
p. 64 item 644

from radium D
p. 19 item 198
p. 146 item 1467
p. 300 item 3000, 3009

from radium D and absorption law
p. 252 item 2525

from radium E. Study from
absorption measurements
p. 89 item 895

from radium, absorption by liquids
p. 44 item 448

from radium, producing secondary
radiation
p. 10 item 105

gamma induced beta disintegration
p. 288 item 2886

gamma radiation in beta decay
p. 40 item 401
p. 42 item 428

gamma radiation of beta emitters
p. 238 item 2381

gamma rays excited by gamma rays
p. 143 item 1484, 1485

half-life for double beta decay
p. 228 item 2286

BETA RAYS

heat of radium radiation
p. 100 item 1009

heavy rays
p. 80 item 800
p. 187 item 1877

heavy rays from radium E
p. 187 item 1878

helical method of focusing
p. 361 item 3617

heterogeneity of rays from
radium E
p. 149 item 1494

higher order effects in
decay
p. 253 item 2535

high speed scintillation
counters for
p. 96 item 963

identification with atomic
electrons
p. 143 item 1431

identifying beta-active
particles in heterogeneous
mixture
p. 217 item 2178

identity with electrons
p. 90 item 903

influence on the permeabi-
lity of cells
p. 281 item 2811

intensities of the groups
in the spectra of radium
B and C
p. 110 item 1102

BETA RAYS

intensity and energy measurements

p. 406 item 4067 SR

intensity distribution in
beta ray spectra of radium B
and C

p. 64 item 647

p. 84 item 846

intensity of activity
from thick sources

p. 371 item 3716

p. 409 item 4096 SR

inactivation of pepsin
by radium rays

p. 270 item 2708

interaction

p. 38 item 385

interaction of radium
rays with matter

p. 208 item 2087

interaction of phosphorus-
32 rays with matter

p. 446 item 4464

internal scattering of
radium E rays

p. 187 item 1876

interpretation of spectra

p. 109 item 1094

1095

investigations by the cloud
methods

p. 384 item 3844

investigation of spectrum
of radium B and C

p. 109 item 1099

BETA RAYS

ionization in air

p. 71 item 719

ionization in an air-alcohol-
water vapor mixture

p. 29 item 292

ionization produced

p. 122 item 1227

ionizing by beta radiation

p. 297 item 2971

ionizing radiations and
mechanism of action

p. 23 item 235

joint chemical action of
alpha and beta rays

p. 366 item 3663

Joshi effect

p. 34 item 341

law of absorption

p. 386 item 3861

line of beta stability

p. 150 item 1509

loss of energy and its
distribution between
collisions

p. 383 item 3837

loss of energy in passing
through matter

p. 383 item 3838

low energy rays of radium
E

p. 299 item 2999

magnetic line spectra

p. 19 item 195

BETA RAYS

magnetic spectra of radium
D and E rays
p. 211 item 2113

magnetic spectra of
radium E
p. 82 item 827

magnetic spectra of
radium rays
p. 19 item 197

materialization of
energy from radium C
p. 329 item 3294

measurement of absorption
and reflection
p. 211 item 2114

measurement of beta
decay lifetimes
p. 176 item 1765

measurement of energy
of a radium B ray
p. 322 item 3227

measurement of low-energy
particles and allied
phenomena
p. 83 item 838

measurement of radiation
dosage
p. 103 item 1036

measurement of rays
associated with X-rays
p. 75 item 757

measurement of three
radium B particle
energies
p. 304 item 3049

BETA RAYS

measurement with scin-
tillation counter
p. 189 item 1899

measurements in radium C
p. 46 item 465

measuring the absorption
of beta and gamma radiation
p. 393 item 3938

measuring low-energy
spectra
p. 271 item 2710

measuring short beta
decay lifetimes
p. 358 item 3589

mechanism of bacteriocidal
action
p. 225 item 2254

mechanism of emission
p. 238 item 2384

merits of food irradiation
p. 142 item 1421
1422

monitor for low intensity
radiations
p. 315 item 3151

monitor for measuring A-41
beta radiation dosage
p. 400 item 4006 SR

natural spectrum of rays
from radium C
p. 258 item 2584

new method for determination
p. 79 item 796

BETA RAYS

new type of radioactivity
p. 8 item 89

nucleon-lepton interaction of
beta disintegration
p. 267 item 2677

number of ions produced
by radium C beta radiation
p. 113 item 1138

number of ions produced from
radium
p. 262 item 2627

number of ions produced
from various substances
p. 136 item 1360

number of particles emitted
in transformation of radium
p. 262 item 2622

number of particles from
radium E
p. 110 item 1109

number of particles in
radium B and C
p. 153 item 1535

number of rays associated
with scattered X-rays
p. 188 item 1884

number of secondary rays
from radium
p. 340 item 3404

of great velocity from
substances
p. 393 item 3937

of high energy
p. 148 item 1488

BETA RAYS

of induced radioactivity
of slow evolution
p. 88 item 885

of radium at its minimum
activity
p. 209 item 2094

of radium D
p. 340 item 3403

of radium family
p. 87 item 878
p. 88 item 881, 882

origin from radioactive
substances
p. 311 item 3112

origin of fast rays
p. 388 item 3887

origin of spectrum
p. 252 item 2524

palladium-109 as a
multiourie source
p. 251 item 2516

passage through gases
p. 45 item 451

passage through matter
p. 192 item 1928
p. 384 item 3840

performance from beta
gages
p. 396 item 3963

phosphorescence produced
p. 244 item 2444

photographic action
p. 110 item 1103
p. 314 item 3145

BETA RAYS

photographic action

p. 110 item 1103

p. 314 item 3145

precision spectrometry

p. 413 item 4132 SR

preparation of standards

p. 183 item 1835

principles of decay
theory

p. 452 item 4526

produced by collision

p. 17 item 174

produced by polarized X-rays

p. 56 item 564

produced by X-rays

p. 17 item 175, 176
177

producing delta rays

p. 61 item 611

production of azotobacter
mutants

p. 421 item 4217 SR

production of branches in
passing through matter

p. 383 item 3839

primary and secondary rays

p. 147 item 1478

properties and measurement

p. 54 item 544

protection

p. 14 item 144

quantum theory

p. 332 item 3328

BETA RAYS

radiation from rocks

p. 164 item 1640

radiochromism of organic
substances

p. 154 item 1543

radiography with beta
rays

p. 378 item 3783

radium D, E, F, sources
for disintegration rate

p. 271 item 2713

range of rays from
radium D by the Wilson
cloud-chamber method

p. 280 item 2809

ranges of secondary
rays

p. 271 item 2718

rapid measurement of
beta ray dosages

p. 212 item 2127

ratio e/m for primary
rays from radium E

p. 394 item 3940

recoil

p. 266 item 2666

recoil from radium C
and B

p. 24 item 245

reflected by sheets
of different thicknesses

p. 385 item 3857

reflection of particles
of different velocities

p. 211 item 2115

BETA RAYS

relation between alpha
and beta disintegration
constants

p. 213 item 2136

relation between energy
and range

p. 121 item 1217

p. 140 item 1408

relation to alpha and
gamma emission

p. 118 item 1189

relation to gamma rays

p. 252 item 2523

relations in beta trans-
formations and the
neutrino theory

p. 299 item 2998

research at the Bose
Institute in India

p. 0 item 3

response of Geiger-
Mueller survey instruments

p. 360 item 3603

retardation in passage
through matter

p. 19 item 194

p. 88 item 880

p. 91 item 917

scattering

p. 45 item 458

65 650

BETA RAYS

scattering and the nature
of the atom

p. 311 item 3113

scattering and the number
of electrons

p. 81 item 812

scattering from radium by
air

p. 81 item 816

scattering of fast rays
by electrons

p. 330 item 3309

p. 331 item 3315

scattering of radium
rays

p. 238 item 2385

scintillation counter

p. 308 item 3080

secondary gamma rays
excited by the radium
beta rays

p. 334 item 3348

secondary radium
radiation

p. 49 item 492

secondary rays

p. 325 item 3255

secondary rays from
gamma rays

p. 208 item 2083

sensitivity of bacteria
to radium rays

p. 338 item 3385

sensitization of bacteria
to temperature and repeat
ed beta irradiation

p. 146 item 1463

BETA RAYS

shape of "allowed" spectra
p. 223 item 2236

shape of spectrum from
radium E
p. 217 item 2174

shapes of spectra at the
low-energy end
p. 321 item 3217

studies
p. 422 item 4221 SR

spectroscopy
p. 441 item 4415 SR

spectroscopy on decay schemes
of radioactive isotopes
p. 441 item 4419 SR

spectrum of radium
p. 238 item 2382

spectrum of UX-1
p. 252 item 2521

spectrum and its relation
to gamma radiation
p. 252 item 2522

stimulation of secondary
rays by gamma rays
p. 287 item 2879

a source
p. 294 item 2949

single scattering of
particles by protons
p. 296 item 2960

spectrum of rays excited
in metals by X-rays
p. 304 item 3041

spectrum excited by
gamma rays
p. 313 item 3131

BETA RAYS

spectra of artificial
radioactive elements
p. 8 item 87

spectrum of radium D
p. 182 item 1826

spectrum of radium D
p. 183 item 1834

survey meter for betas
in air
p. 40 item 404

spectrum of radium D
p. 84 item 845

spectrum of rays of
radium B plus C
p. 91 item 918

spectrum of gamma-
excited rays
p. 109 item 1096

stability of nuclei
against disintegration
p. 127 item 1277

simple method of
counting particles
p. 135 item 1355

study with scintillation
counter
p. 143 item 1438

spectroscopy
p. 163 item 1639

spectrography of
secondary rays
p. 356 item 3568

spectrum
p. 412 item 4125 SR

spectrum from radium E
decay
p. 371 item 3714

BETA RAYS

study of radium D beta
spectrum

p. 355 item 3554

spectrum of the natural
L-radiation from radium B

p. 37 item 375

theories of distribution
and correlation of beta
and gamma radiation

p. 153 item 1530

theory

p. 119 item 1197

p. 388 item 3888

theory of backward diffusion

p. 377 item 3775

theory of beta decay

p. 39 item 398

p. 100 item 1005

p. 133 item 1334

p. 153 item 1531

p. 330 item 3306

theory of distribution and
polarization

p. 360 item 306, 307

theory of forbidden
transitions

p. 143 item 1439

theory of primary rays

p. 388 item 3885

theory of radiation

p. 27 item 273

theory of scattering

p. 377 item 3776

transformation of energy
into X-ray energy

p. 147 item 1473

transmission

p. 81 item 815

BETA RAYS

transmission through
matter

p. 318, item 3185, 3186

transmission through
thin windows

p. 348 item 3484

type of interaction in
decay

p. 262 item 2629

typical radiation from
radium

p. 156 item 1568

upper limit of beta ray
spectrum of radium E

p. 371 item 3718

usefulness of Geiger
counter for velocities
and number of rays from
radium E and D

p. 302 item 3029

variation of ionization
with velocity

p. 385 item 3858

visible radiation of
liquids

p. 67 item 679

weak lines in spectrum
of radium C

p. 449 item 4497

effects on human erythrocytes

p. 438 item 4388 SR

effect on insects in wheat and
flour

p. 415 item 4156-4157 SR

effect on microorganisms

p. 260 item 2600

p. 261 item 2611, 2612

effect on niacin

p. 291 item 2911

effect on nonenzymatic browning
reaction of dried fruits

p. 290 item 2909

effect on packages made of poly-
ethylene-coated paper

p. 432 item 4320a SR

effect on riboflavin and carotene

p. 142 item 1424

effect on spores of mucoraceae

p. 237 item 2373

effect on various products

p. 223 item 2238

effect on yeast

p. 392 item 3924

CATHODE RAYS

ejected by substances ex-
posed to radium gamma rays

p. 205 item 2054

elimination of salmonella
in egg powder

p. 291 item 2919

energy absorption

p. 136 item 1367

equipment for sterilization

p. 2 item 23

p. 320 item 3201, 3202

evaluation of procedures
for food irradiation

p. 142 item 1427

excitation of light

p. 176 item 1766

experiments

p. 294 item 2945

experiments on slow rays

p. 358 item 3584

fatigue effects of cathode
tubes

p. 380 item 3804

food and drug sterilization
after packaging

p. 363 item 3631

Goldstein's invisible rays

p. 374 item 3749

in dairy industry

p. 450 item 4501

in electrodeless ring discharge

p. 169 item 1691

inactivation of bacteria in
haddock

p. 292 item 2924

CATHODE RAYS

influence on living tissue

p. 278 item 2780

ionization of metals

p. 60 item 607, 608

irradiation of biological materials

p. 363 item 3630

loss of velocity in matter

p. 356 item 3561

magnetic field

p. 189 item 1896

mutants

p. 237 item 2375

method for measuring e/m and v

p. 191 item 1915

operation cathode ray

p. 294 item 2947

origin

p. 254 item 2543

polarization of X-rays compared with their power of exciting cathode rays

p. 368 item 3680

preservation of food and drugs

p. 180 item 1800, 1801

pressure

p. 13 item 137

processing and packaging of irradiated beef slices and ground beef

p. 433 item 4338SR, 4339 SR

processing and packaging beef slices treated with cathode rays

p. 290 item 2901

p. 291 item 2918

CATHODE RAYS

processing irradiated fruits and vegetables

p. 292 item 2920

produced by X-rays. Dissymmetry in emission

p. 26 item 268, 269

producing X-rays

p. 216 item 2165

production

p. 105 item 1050

production of characteristic X-radiations

p. 26 item 266

production of slow rays

p. 296 item 2967

production of X-radiation by impact with positive rays

p. 358 item 3585

properties

p. 257 item 2577

rate of death of irradiated fungus spores

p. 379 item 3792

relation of energy loss to ionization

p. 139 item 1398

relation to X-rays

p. 379 item 3796

researches

p. 241 item 2410

secondary emission

p. 20 item 207

p. 76 item 769

p. 185 item 1851

secondary rays in gases

p. 246 item 2466

CATHODE RAYS

specific charge of
slow rays
p. 33 item 332

sterilization of food
p. 1 item 18
p. 291 item 2917
p. 432 item 4320 SR

sterilization of organic
tissues
p. 251 item 2513

stimulation of growth in
aspergillus niger
p. 56 item 566

total ionization produced in
gases
p. 205 item 2051

transformation of energy into
X-ray energy
p. 147 item 1473
p. 120 item 1200

transmission through matter
p. 379 item 3794
p. 380 item 3800

treatment of raw ground beef
p. 291 item 2918

use for food and drug sterilizing
p. 4 item 42

use for polymerization
p. 233 item 2339

use for sterilization
p. 3 item 33

variation of inertia as a function
of velocity
p. 155 item 1559

variation of ionization power with
velocity of rays
p. 139 item 1399

CATHODE RAYS

velocities of electrons set
free by light
p. 19 item 196

velocity losses on passage
through matter
p. 227 item 2274

velocity of particles ejected
by characteristic X-radiations
p. 379 item 3798, 3799

velocity of secondary radiation
p. 27 item 275
p. 184 item 1840

verification of law of varia-
tion of Mass with velocity of
rays
p. 191 item 1914

X-ray radiation from cathode
particles traversing a gas
p. 379 item 3797

CAVITRON

SEE: ACCELERATOR

CELLS

absorption of ultraviolet
rays by cells
p. 110 item 1108

action of ionizing radiations
p. 23 item 239

action of ionizing radiation
on nucleoproteins
p. 111 item 1117, 1118

action of irradiation on
protoplasm
p. 164 item 1645

action of irradiation on
viruses
p. 43 item 431

CELLS

- action of radiation on living cells
 - p. 224 item 2244
- action of radium on growing cells
 - p. 389 item 3894
- action of rays on growing
 - p. 191 item 1911
- action of radium on plant cells

- cause of action of X- and gamma rays
 - p. 95 item 957

CELLS

- change in permeability of protoplasm by radiation
 - p. 169 item 1690
- changes in volume by total body X-radiation
 - p. 437 item 4375 SR
- changes in yeast cells by X-rays
 - p. 112 item 1128
- chemical aspects of radiation sensitivity
 - p. 436 item 4367 SR
- cytologic and histochemical studies of radiation on reaction
 - p. 404 item 4044 SR
- cytological effects of X-radiation and colchicine combined
 - p. 403 item 4039
- detector for alpha dosimetry in cell irradiation
 - p. 305 item 3050
- development of damage by ionizing radiations
 - p. 149 item 1496
- distribution of ions resulting from irradiation
 - p. 150 item 1500
- division in giant amoeba after X-irradiation
 - p. 406 item 4064 SR
- division with X-rays
 - p. 167 item 1675
- effects of alpha radiation
 - p. 395 item 3958
- effects of alpha rays on nucleus and plasma
 - p. 281 item 2810

CELLS

- effect of beta and gamma rays
on protoplasmic viscosity of
helodea cells
p. 368 item 3685
- effect of gamma radiation
p. 337 item 3375
- effect of gamma irradiation
on cell division in tissue
p. 61 item 617
- effect of gamma rays
p. 141 item 1415
- effect of hydrogen peroxide
on cell metabolism in ionizing
radiations
p. 397 item 3976 SR
- effect of internal irradiation
on metabolism
p. 430 item 4302 SR
- effect of ionizing radiation on
enzyme activities of yeast cells
p. 326 item 3268, 3269
- effect of ionizing radiation on
lymphocytes
p. 292 item 2928
- effect of oxygen tension on
X-ray sensitivity of bacteria
p. 176 item 1762
- effect of irradiation on enzymes
in cell nuclei
p. 411 item 4115 SR
- effect of radiation
p. 222 item 2226
- effect of radiation with
isotopes
p. 194 item 1947
- effect of radiation of specific
energies on mitosis
p. 420 item 4206 SR

CELLS

- effect of radium radiations on
division
p. 275 item 2757
- effect of ultraviolet and gamma
rays on lipids
p. 409 item 4093 SR
- effect of ultraviolet radiation
phosphate turnover of yeast
cells
p. 414 item 4143 SR
- effect of X-radiation
p. 298 item 2983
- effect of X-rays
p. 233 item 2335
p. 237 item 2372
- effect of X-rays and ultraviolet
rays
p. 18 item 187
- effect of X-rays on bacterial
cells
p. 436 item 4368 SR
- effect of X-rays on cells of
different ploidy
p. 262 item 2620
- effect of X-rays on division
p. 7 item 76
p. 170 item 1703
- effect of X-rays on metabolism
p. 130 item 1301
- effect of X-rays on mitosis
p. 347 item 3470
- effect of X-rays on nucleus
p. 390 item 3902
- effect of X-rays on structure
and growth
p. 69 item 697
- effect of X-rays on survival
p. 320 item 3204

CELLS

electron micrographs of X-irradiated escherichia cells

p. 107 item 1075

factors modifying the sensitivity to radiation

p. 437 item 4379 SR

genetic and cytological effects of radiation

p. 402 item 4024 SR

p. 408 item 4089 SR

inactivation of viruses

p. 5 item 51

influence of beta rays on the permeability

p. 281 item 2811

influence of X-rays on isolated nuclei

p. 112 item 1123

influence of X-rays on yeast cells

p. 112 item 1124

lethal action of radiant energy

p. 171 item 1715

mathematical theory of lethal action of radiation

p. 382 item 3828

p. 403 item 4032 SR

microscopy of its response lethal to X-radiation

p. 259 item 2596

mechanism of action of ultraviolet rays

p. 354 item 3549

normal and virus-infected cells before, during and after radiation

p. 423 item 4232 SR

of microorganisms. Resistance to ultraviolet rays

p. 27 item 270

CELLS

observations on the irradiated nucleus

p. 376 item 3767

permeability changes on irradiation

p. 354 item 3548

physical methods of breaking down cells and tissues

p. 310 item 3100

physiology of ion accumulation and electrolyte balance

p. 421 item 4214 SR

point of attack of rays

p. 30 item 301

protection against X-rays by chemical means

p. 124 item 1246

radiation

p. 5 item 50

p. 167 item 1676

radiation and aqueous solutions

p. 5 item 52

radiation effects and studies of tumors

p. 413 item 4137 SR

radiation effects of ultraviolet rays

p. 9 item 92

radiation on germ cells

p. 5 item 53

radiation sensitivity of enzymes in intact cells

p. 287 item 2874

radiations and cell divisions

p. 138 item 1380

radium and X-rays

p. 74 item 746

CELLS

recovery of ultraviolet irradiated
cells by light
p. 41 item 411

relative effects of neutron and
X-rays on cells in same organism
p. 395 item 3959

respiration and division in
ionizing radiation
p. 397 item 3977 SR

sensitivity of colloids to irradiation
p. 212 item 2125

the information content of living
systems
p. 261 item 2614

ultraviolet absorption
p. 48 item 481
p. 55 item 556

ultraviolet absorption spectra
of compounds derived from cells
p. 171 item 1716

ultraviolet microscopy of the
response to lethal X-radiation
p. 404 item 4045 SR

CELLULOSE

effect of cathode rays
p. 314 item 3142

CELLULOSE ACETATE

X-ray irradiation
p. 386 item 3866

CEREALS

comparison of effects of heat
and X-rays on cereal seeds
p. 333 item 3336

heat and X-ray effects on seeds
p. 431 item 4318 SR

irradiation and control of vitamin
D in cereals
p. 154 item 1547

CEREALS

radiation cereal research in
Brookhaven
p. 209 item 2098

radiation in cereal research
p. 399 item 3998 SR

radio-frequency sterilization
p. 373 item 3733

CERIC SULFATE

used in chemical dosimetry
p. 375 item 3754

CHEESE

pasteurization of cheddar cheese
by irradiation
p. 210 item 2101

radiation effect on heat resis-
tance of spores, staphylococcus
enterotoxin in spreads
p. 406 item 4063 SR

ultraviolet irradiation of molds
and bacteriophage
p. 349 item 3497

CHERENKOV RADIATION

p. 409 item 4095 SR

energy loss of a fast charged
particle
p. 345 item 3451

CHLORINE

interaction with hydrogen under
influence of alpha particles
p. 353 item 3538

nuclear reactions with neutrons
p. 137 item 1378

CHLOROFORM

effect of X-rays
p. 155 item 1552

CHOCOLATE

biological effect of ultraviolet
radiation
p. 302 item 3024

CHOCOLATE

ultraviolet irradiation

p. 211 item 2119

p. 273 item 2738

p. 302 item 3025

CHOLESTEROL

action of X-rays

p. 304 item 3046

CHROMATES

effect of X-rays

p. 128 item 1285

CHROMATOGRAPHY

ion exchange chromatography

p. 408 item 4081 SR

CHROMOSOMES

aberrations induced by X-rays

p. 316 item 3162

aberrations produced by X-rays
in tradescantia

p. 343 item 3437

action of irradiated cytoplasm

p. 267 item 2671

action of radiation

p. 5 item 50

biological effect of radiation
on tradescantia

p. 76 item 760

breakage in drosophila by ultra-
violet radiation

p. 258 item 2589

CHROMOSOMES

effect of certain chemicals on
radiation damage

p. 303 item 3034

effect of neutron radiation in
plants

p. 425 item 4259 SR

CHROMOSOMES

effect of oxygen on aberration
produced by alpha rays

p. 357 item 3574

effect of radiation

p. 63 item 634

effect of X-rays

p. 44 item 444

effect of ultraviolet radia-
tion on gamma induced aberra-
tions in tradescantia chromoso-

p. 235 item 2353

intensity of radiation and
breakage

p. 411 item 4119 SR

loss in drosophila by X-rays

p. 114 item 1148

modification of the frequency
of changes induced by X- and
ultraviolet rays

p. 413 item 4131 SR

protective effect of chemical
on sensitivity to ionizing
radiation

p. 413 item 4138 SR

radiation induced aberrations

p. 196 item 1966

relation between ionizing radi-
tion and chromosome breakage

p. 336 item 3367

relation of X-ray induced leth-
to breakage

p. 168 item 1688

X- and gamma ray induced aberr-
tions in tradescantia

p. 203 item 2034-2036

X-ray induced aberrations in
drosophila

p. 392 item 3929

CHROMOSOMES

X-ray induced chromosome
breaks in drosophila
p. 236 item 2368

X-ray sensitivity of meta-
phase and interphase chromosomes
p. 337 item 3370

COBALT-60

a 10-curie telegamma unit
p. 229 item 2294

absorption of gamma rays
p. 327 item 3275
p. 438 item 4381 SR

an 800,000 r/hr gamma source
p. 399 item 3999 SR

degradation of gamma rays in a
water medium
p. 376 item 3762

dosimetry and bactericidal effects
of gamma radiations
p. 142 item 1426

dosimetry of the kilocurie cobalt-60
source

p. 415 item 4150 SR
p. 90 item 108

dosimetry research on the kilocurie
cobalt-60 source
p. 290 item 2902

effect of gamma radiation on benzene
p. 351 item 3511

effect of gamma rays on microorganisms
p. 222 item 2227
p. 416 item 4167 SR
p. 418 item 4181 SR

effect of irradiation of trichina
larvae
p. 143 item 1436

effect on infection and immunity
p. 430 item 4303 SR

COBALT-60

effect on microorganisms
p. 449 item 4491

food sterilization
p. 415 item 4152 SR

half-life
p. 196 item 1962

hydrogen peroxide formation
by gamma radiation
p. 351 item 3510

irradiation chamber
p. 151 item 1514

large-angle scattering of
gamma rays
p. 347 item 3475

penetration and diffusion of
gamma rays in water
p. 380 item 3808

physiologic and pathologic
effect of radioactive cobalt
p. 409 item 4092 SR

precision measurement of
radiation
p. 231 item 2312

preparation of half-life
p. 197 item 1970

radiography with cobalt-60
p. 261 item 2616

relative biological effective-
ness of neutrons and gamma
rays
p. 368 item 3687

relative energies of gamma
radiation from cobalt and
Zinc-65
p. 439 item 4391 SR

COBALT-60

telecurie unit

p. 226 item 2260

tolerance of tradescantia to
gamma rays

p. 336 item 3369

utilization as a radium substitute

p. 398 item 3982 SR

COCOA

treatment with ultraviolet rays

- effect of X-rays
 - p. 86 item 862
 - p. 299 item 2995
- effects of X-rays on arginase
 - p. 451 item 4517

ENZYMES

effect of X-rays on catalase
in peas

p. 450 item 4506

effect of X-rays on aminoacid
oxidase

p. 86 item 861

effect of X-rays on enzyme systems
of tissues

p. 120 item 1209

electron bombardment

p. 332 item 3324

inactivation by irradiation

p. 142 item 1429

inactivation by soft X-rays

p. 153 item 1538

inactivation of peptidase by
X- and alpha rays

p. 86 item 868

inactivation of ribonuclease

p. 74 item 745

inactivation of substrates by
X-rays

p. 247 item 2476

influence of ionizing radiation

p. 420 item 4200 SR

influence of monochromatic lights
on enzyme action

p. 265 item 2653 to 2659

p. 266 item 2660 to 2665

influence of purification on sensi-
tivity to irradiation

p. 283 item 2834

influence of vitamin C on inacti-
vation by ultraviolet rays

p. 139 item 1390

inhibition by X-rays

p. 24 item 241

ENZYMES

mechanism of action of X-
rays

p. 124 item 1247

mechanism of inactivation by
neutrons

p. 185 item 1856

radiation, genes, enzymes

p. 44 item 442

radiation sensitivity in
intact cells

p. 287 item 2874

treating oils, fats or emulsions
with ultraviolet rays to
produce enzymes

p. 198 item 1982

treating with radiations

p. 229 item 2299

ERGOSTEROL

effect of irradiation
conditions on activation

p. 243 item 2438

irradiation

p. 230 item 2302

ESCHERICHIA COLI

action spectra for reactivation
after ultraviolet irradiation

p. 198 item 1984

adaptive enzyme formation
after ultraviolet irradiation

p. 195 item 1952

bactericidal effect of ultra-
violet rays

p. 175 item 1752

comparison of spontaneous and
induced mutations to
streptomycin resistance

p. 268 item 2688

ESCHERICHIA COLI

delayed appearance of radiation
induced mutants
p. 268 item 2689

effect of certain X-rays on
mobility
p. 334 item 3340

effect of different agents on
irradiated bacteria
p. 111 item 1116

effect of growth in a radio-
active culture on mutation rate
p. 437 item 4378 SR

effect of irradiated media
p. 56 item 562

effect of irradiation on
agglutinability, lysis and pH
p. 231 item 2316

effect of irradiation on re-
combination
p. 156 item 1560

effect of oxygen on mutation
induction by X-rays
p. 12 item 127

effect of radioactive
phosphorus
p. 318 item 3184

effect of ultraviolet
irradiation and its reversal
p. 287 item 2878

effect of ultraviolet rays
p. 175 item 1750

effect of X-radiation on
formation of hydrogen lyase
p. 36 item 362
p. 436 item 4369 SR

effect of X-rays on formation
of lactase
p. 393 item 3931

ESCHERICHIA COLI

effect of X-rays on migration
velocity, viability and pH
p. 101 item 1016

genetics of resistance to
radiation
p. 386 item 3869

inherited differences in
sensitivity to radiation
p. 387 item 3870

lethal and sublethal effects
of X-rays
p. 304 item 3045

lethal effects of X-rays,
alpha rays and deuterons
p. 99 item 996

lethal effects of X-rays,
deuterons and alpha particles
p. 404 item 4040 SR

nucleic acid synthesis in
ultraviolet irradiated and re-
activated bacteria
p. 198 item 1983

photoreversal of ultraviolet
induced effects
p. 269 item 2690

physiological and cytological
changes after X-irradiation
p. 36 item 363, 364, 365

protection against ultraviolet
radiation by carbon monoxide
p. 251 item 2514

reactivation after ultraviolet
irradiation
p. 198 item 1986

reactivation by pyrovate after
ultraviolet irradiation
p. 440 item 4407 SR

ESCHERICHIA COLI

recovery from ultraviolet
irradiation

p. 303 item 3038

reduction of X-ray sensitivity

p. 58 item 581, 582

resistance to gamma irradiation

p. 132 item 1327

transformation from virus sensitive
to virus resistant

p. 413 item 4130 SR

ultraviolet induced mutations

p. 56 item 563

X-ray induced mutant strains

p. 25 item 252

ESTERIFICATION

by ultraviolet rays

p. 345 item 3458

FATS

- activation by ultraviolet rays
p. 329 item 3295
- after-effect of electron-irradiation in butter fat
p. 159 item 1599
- after-effect of x-irradiation
p. 159 item 1598
- behavior in ultraviolet light
p. 157 item 1578
- biological effect of ultra-violet radiation
p. 302 item 3024
- effect of different radiation levels on chemical changes
p. 396 item 3965 SR
- effect of irradiation
p. 159 item 1597
- effect of radiation on intestinal absorption and metabolism
p. 426 item 4262 SR
- energy loss of fat charged particles passing through matter
p. 351 item 3512
- irradiation
 - p. 216 item 2168 & 2169
 - p. 302 item 3021 & 3023
- stability of vitamin A in butter fat to ultraviolet radiation
p. 343 item 3436
- treating with ultraviolet rays to produce vitamins or enzymes
p. 198 item 1982

FATTY ACIDS

- absorption of ultra-violet rays by acids
p. 35 item 350 & 352
- decomposition by alpha particles
p. 381 item 3816
- dispersion and absorption of ultra waves
p. 378 item 3786 a
- effect of different radiation levels on chemical changes
p. 396 item 3965 SR
- effects of radioactivity
p. 326 item 3264
- effect of x-rays on synthesis in bone-marrow homogenates
p. 11 item 116
- formation of hydrocarbons by alpha particle bombardement
p. 3266 item 3266
- radiochemical changes
p. 177 item 1778
- reflected x-ray spectra
p. 53 item 531
- X-ray identifications of higher acids
p. 260 item 2608
- X-ray induced oxidation of non-saturated acids
p. 362 item 3621
- X-ray investigation
 - p. 137 item 1377
 - p. 264 item 2644

FATTY ACIDS

x-ray reflections
p. 289 item 2890

FATTY SUBSTANCES

influence of ultraviolet rays
on flour
p. 238 item 2389

FERMENTATION

action of ultraviolet rays
p. 231 item 2310

FERMI-DIRAC THEORY

x-ray energy levels
p. 301 item 3015

FERRIC ION

reduction in aqueous solution by
gamma rays
p. 12 item 120

FERROUS-FERRIC SYSTEMS

radiation chemistry
p. 12 item 121

FERROUS SULFATE

decomposition by alpha rays
p. 271 item 2716

oxidation by X- and gamma
radiation
p. 256 item 2565 & 2566

used in chemical dosimetry
p. 375 item 3754

FIBER

effects of irradiation on angora
fiber and its injurious insects
p. 365 item 3655

FIBRINOGEN

action of x-rays
p. 317 item 3171
p. 448 item 4489

FISH

capacitron for fish preservation
p. 453 item 4532

electronic sterilization
p. 453 item 4530 & 4531

FISH

inactivation of bacteria by
cathode rays in haddock
p. 292 item 2924

ionization radiations for control
of spoilage

p. 269 item 2694
p. 291 item 2913 & 2915

preservation without heat
p. 269 item 2696

ultraviolet rays for preservation
p. 352 item 3529

FISSION

asymmetry of nuclear fission
p. 171 item 1718

capture and loss by fission
fragments
p. 30 item 300

distribution of nuclear charge
p. 78 item 784
p. 140 item 1407

energy distributions of fragments
p. 370 item 3700

high energy fission
p. 337 item 3376

metabolism of radionuclides
derived from fission
p. 415 item 4158 SR

nuclear closed-shell effects
p. 140 item 1405

of medium weight elements
p. 25 item 253

range and straggling of
fragments
p. 53 item 538

some comments
p. 323 item 3230

time limit between fission and
neutron emission
p. 334 item 3347

FISSION

velocity-range relation for
fragments
p. 42 item 422

FISSION FRAGMENTS

velocity distributions
p. 318 item 3187

FISSION PRODUCTS

aspects
p. 55 item 559

beta ray applicator
p. 127 item 1278

conference on utilization
p. 400 item 4001 SR

contribution by chemical ele-
ment to beta activity
p. 448 item 4488

economic feasibility of their
use
p. 409 item 4099 SR

effect of gamma radiation on
chemical reactions
p. 407 item 4075 SR

effect of gamma rays on drugs
p. 76 item 764

effect of radiation on chemical
reactions
p. 444 item 4448 SR

effect on chemical reactions
p. 425 item 4242

emission of light charged particles
p. 9 item 99

fission products
energy distribution of fragments
p. 270 item 2707

gamma sterilization of food
packaging material
p. 198 item 1989

FISSION PRODUCTS

hazards of use
p. 366 item 3666

in industry
p. 76 item 765
p. 178 item 1782

industrial application of
gamma radiation
p. 401 item 4014 SR

in industry
p. 76 item 765
p. 178 item 1782

industrial application
p. 442 item 4422 SR
4423 & 4424 SR

industrial use
p. 163 item 1637
p. 426 item 4269 SR

ionization fields of fragments
p. 225 item 2257

metabolism in animals
p. 430 item 4305 SR

method of mounting separated
fission products safely
p. 410 item 4102 SR

methods of Stanford fission
product study
p. 427 item 4271 SR

nomogram for calculating
activities
p. 451 item 4512

polymerization of vinyl and
styrene monomers by gamma
radiation
p. 399 item 3995 SR,
3996 & 3997 SR

possible use for sterilization
p. 163 item 1638

FISSION PRODUCTS

potential of commercial reactors

p. 103 item 1037

problems

p. 445 item 4455

progress report

p. 54 item 549

prospects and possible industrial
uses

p. 427 item 4272 SR

radiation fields around two gamma
sources

p. 229 item 2293

radiation sensitivity of spoilage
micro-organisms in meat

p. 396 item 3967 SR

rate of decay

p. 373 item 3734

research at the Univ. of Michigan

p. 54 item 546

review of research at the
University of Michigan

p. 418 item 4180 SR

separation of long-lived products

p. 410 item 4100 SR

slide rule for computation of
radiation dose

p. 336 item 3365

specific activity of separated
products from reactor fuels

p. 410 item 4108 SR

technical feasibility of use

p. 410 item 4107

ten-kilocurie gamma radiation

p. 55 item 551

FISSION PRODUCTS

use and management

p. 427 item 4270

use of radiation

p. 409 item 4098 SR

uses

p. 235 item 2354

use in sterilization of
foods, pharmaceuticals and
tissues

p. 414 item 4145 SR

use for food preservation

p. 396 item 3964

p. 405 item 4059

use for food sterilization

p. 171 item 1714

use for insect control

p. 162 item 1623

utilization

p. 55 item 552

p. 411 item 4114 SR

p. 419 item 4194 SR

p. 425 item 4257 SR

utilization in food processing

p. 242 item 2423

utilization of gross, mixed
and separated products

p. 427 item 4273 SR

utilization of radiation

p. 371 item 3715

utilization of waste products
in chemical reaction

p. 407 item 4076 SR &
4077

utilization of x- and gamma
radiation for food preservation

p. 408 item 4085 SR

FISSION PRODUCTS

utilization report
(food, microorganisms,
pharmaceuticals, enzymes)

p. 416 item 4164,
4165 & 4169 SR

velocities of fragments from
U-233, U-235 and Pu-239

p. 225 item 2256

FLOUR

effect of electrons and cathode
rays on insects

p. 415 item 4156a & 4157 SR

influence of ultraviolet rays on
baking value and fatty substances

p. 238 item 2388 & 2389

p. 239 item 2390, 2391,
2392 & 2393

FOOD

action of ultraviolet rays on butter

p. 235 item 2357

action of ultraviolet rays on cane
sugar

p. 85 item 850

action of ultraviolet rays on
vegetable oils

p. 126 item 1267

action of ultraviolet rays on
wine

p. 167 item 1674

action of X-rays

p. 51 item 514

activities induced by thermal-
neutron exposure

p. 280 item 2806

apparatus for irradiation

p. 36 item 360 & 361

p. 187 item 1870

FOOD

arrangements for irradiating
with ultraviolet rays

p. 226 item 2267

bacteriocidal irradiation
of milk

p. 298 item 2989

biochemistry of irradiated
milk

p. 12 item 124

biological action of X-rays
and neutrons on barley and
wheat

p. 201 item 2017

biological effect of ultra-
violet irradiation of fats
and chocolate

p. 302 item 3024

blanching of vegetables by
electronics

p. 264 item 2640

calculations for sterilization
in final containers

p. 415 item 4155 SR

cathode ray sterilization

p. 291 item 2917

p. 432 item 4320 SR

changes in soybean oil by
ultraviolet irradiation

p. 183 item 1831

chemical effect of irradiation

p. 142 item 1420

cold sterilization by gamma
rays

p. 416 item 4166 SR

p. 418 item 4185 SR

color grading by electronics

p. 94 item 948

FOOD

- comparison of effects of heat
and x-rays on cereal seeds
p. 333 item 3336
- defrosting frozen foods with
high frequency
p. 63 item 637 & 638
- destruction of bacteria in meat
by ultraviolet rays
p. 30 item 306
- destruction of mold spores on bread
by ultraviolet radiation
p. 296 item 2966
- destruction of riboflavin in milk
during processing on ultraviolet
irradiation
p. 394 item 3948
- detection of substitutes by
ultraviolet rays
p. 261 item 2615
- destruction of vitamin A in ultra-
violet irradiated milk
p. 359 item 3597
- dielectric heating for dehydrating
and thawing frozen food
p. 350 item 3505
- dispute on effect of milk irradiation
p. 213 item 2133
- effect of cathode rays on bacterial
flora of spices and other dry food
materials
p. 292 item 2923
- effect of cathode rays on fluid foods.
p. 449 item 4497
- effect of cathode rays on spices and
other dry food
p. 450 item 4502
- effect of different radiation levels
on meat, enzymes and flavor
p. 396 item 3966 SR

FOOD

- effect of different radi-
ation levels on meat, enzymes
and flavor
p. 396 item 3966 SR
- effect of eating irradiated
food
p. 0 item 6
- effect of electron bursts on
vegetable and fish oils
p. 16 item 162
- effect of electrons and
cathode rays on insects in
wheat and flour
p. 415 item 4156a &
4157 SR
- effect of gamma irradiation
on milk
p. 214 item 2141
- effect of gamma radiation on
mutation rate
p. 330 item 3303
- effect of gamma rays on
vitamins and enzymes in milk
p. 181 item 1814
- effect of ionizing radiation
on respiration and oxidases
of potato tuber
p. 400 item 4003 SR
- effect of irradiation
p. 106 item 1068
- effect of irradiation of
milk on vitamin A
p. 61 item 616
p. 136 item 1366
- effect of irradiation on
maize pollen
p. 130 item 1309

FOOD

- effect of irradiation on olive oil
p. 210 item 2105
- effect of sterilization on organoleptic changes
p. 180 item 1802
- effect of ultraviolet irradiation on vitamin A, carotene and riboflavine in milk
p. 131 item 1318
- effect of ultraviolet irradiation on milk
p. 18 item 180 & 181
p. 27 item 274
- effect of ultraviolet radiation on baked products
p. 296 item 2966
- effect of ultraviolet rays on citric acid in milk
p. 98 item 981
- effect of ultraviolet rays on keeping qualities
p. 127 item 1275
- effect of ultraviolet rays on keeping quality of frozen pork
p. 369 item 3693
- effect of ultraviolet rays on pathogene germs in milk
p. 348 item 3481
- effect of ultraviolet rays on processing and storage
p. 143 item 1433
- effect of ultraviolet rays on soybean oil
p. 183 item 1830
- effect of ultraviolet rays on spores and decay in cherries
p. 111 item 1113

FOOD

- effect of ultraviolet rays on vitamin A in butter
p. 327 item 3279
- effect of x-irradiated food on mice
p. 267 item 2675
- effect of x-irradiation on vitamin A content in milk
p. 42 item 425
- effects of x-ray, neutron and gamma irradiation on growth of potatoes
p. 337 item 3371
- effect of x-rays on bacterial count of ground meat
p. 289 item 2897
p. 415 item 4156 SR
- effect of x-rays on wheat grains
p. 6 item 68
- electronic color sorting of fruits and vegetables
p. 287 item 2876
- electronic food conditioning
p. 376 item 3765
- electronic grading of eggs
p. 305 item 3054
- electronic heat in industry
p. 327 item 3270 & 3271
- electronic pasteurization of wine
p. 393 item 3930
- electronic preservation
p. 112 item 1121
p. 349 item 3490

FOOD

electronic preservation with
cathode rays
p. 180 item 1800 & 1801

electronic processing
p. 138 item 1389

electronic regulation of processes
in industries
p. 366 item 3662

electronic sterilization
p. 106 item 1061
p. 453 item 4530 & 4531

electronic sterilization of canned
foods
p. 184 item 1848

electronic treatment
p. 165 item 1652

electronics, a new coffee roasting
control
p. 332 item 3323

electronics and cranberries
p. 343 item 3439

electronics in food industry
p. 346 item 3469

electronics in processing
p. 386 item 3867

elimination of salmonella in egg
powder by cathode rays
p. 291 item 2919

English report on irradiation of
food in U. S. A.
p. 411 item 4112 SR

evaluation of cathode ray irradiation
procedures
p. 142 item 1427

evaluation of safety of irradiated
food
p. 226 item 2265

FOOD

fission products for pre-
servation
p. 405 item 4059 SR

fluorescence and conservat-
ion of irradiated food
p. 339 item 3397

freeze-drying with radiant
energy
p. 452 item 4528
p. 444 item 4442 SR

gamma radiation suppresses
crown-gall formation in
tomatoes
p. 98 item 988 & 989

gamma rays for preservation
p. 2 item 26

growth promoting effect of
irradiated food
p. 339 item 3399

high frequency heating in
meat processing
p. 449 item 4498

increasing the stability of
butter
p. 283 item 2833

industrial sterilization by
radiation
p. 3 item 30

influence of ultraviolet
rays in accessory food
substances
p. 394 item 3949
p. 395 item 3950

influence of ultraviolet
irradiation on nutritive value
of hardened oils
p. 365 item 3654

influence of ultraviolet
rays on nutrition
p. 165 item 1659

FOOD

inspection and nuclear energy
p. 310 item 3102

ionizing radiations for fish
spoilage control
p. 291 item 2913 & 2915

irradiated polythene for packaging
p. 0 item 8

irradiation

p. 53 item 539
p. 201 item 2019
p. 302 item 3022
p. 307 item 3074
p. 341 item 3414

irradiation and associated studies

p. 407 item 4078 SR
p. 408 item 4082 SR

irradiation and relation to vitamin D
p. 164 item 1644

irradiation by ultraviolet rays
p. 186 item 1868 & 1869

irradiation does not destroy
vitamin A or B-1
p. 319 item 3193

irradiation of biscuits
p. 189 item 1890

irradiation of fats, etc.
p. 302, item 3021 & 3023

irradiation of fats, sterols, etc.
p. 302 item 3023

irradiation of fruits and vegetables
p. 112 item 1120

irradiation of liquid foods
p. 48 item 486

irradiation of milk
p. 361 item 3611
p. 374 item 3747
p. 390 item 3900

FOOD

irradiation of milk, etc.
for vitamin D production
p. 101 item 1010

irradiation of milk, fruit
juices, etc.
p. 32 item 321

irradiation of pork to
control trichinosis
p. 143 item 1435

irradiation of sausages with
ultraviolet rays
p. 87 item 877

irradiation of vitamin D
in cereals
p. 154 item 1547

irradiation of wine with
ultraviolet rays
p. 239 item 2394

irradiation to increase
vitamin content
p. 338 item 3386

irradiation with ultraviolet
rays
p. 73 item 730
p. 279 item 2793
p. 338 item 3387

irradiation with ultraviolet
rays and the antirachitic
vitamin
p. 305 item 3056

interesting phenomenon on
irradiating maize seed
p. 321 item 3215

keeping orange juice fresh
with ultraviolet rays
p. 390 item 3906

lethal effectiveness of
ultraviolet rays applied to
milk
p. 349 item 3495

FOOD

literature of radiations in food
and pharmaceutical fields
p. 290 item 2900

literature pertaining to irradiation
p. 414 item 4149 SR

low bacteria count milk on ultra-
violet irradiation
p. 269 item 2692

merits of beta and gamma
radiations
p. 142 item 1421 & 1422

milk and ultraviolet rays
p. 315 item 3150

milk irradiation in U. S.
p. 387 item 3877

milk sterilization by ionization
p. 97 item 973
p. 98 item 980

mold free bread with high frequency
heating
p. 63 item 636

neutron and X-ray experiments in
barley
p. 237 item 2379

new findings in sterilization of
milk
p. 93 item 938

new method for bacteriological con-
trol in canning industries
p. 304 item 3047

odor control with ultraviolet
radiation
p. 348 item 3487

pasteurization of cheddar cheese
by irradiation

preservation by ionizing
radiations
p. 447 item 4479

preservation by x-
irradiation
p. 79 item 797

preservation of milk by
irradiation
p. 132 item 1328

preservation of milk by other
than usual methods
p. 295 item 2959

preservation with fission
materials
p. 54 item 545

preservation with ionizing
radiations
p. 0 item 9

prevention of flavor and
chemical changes in irradiated
foods
p. 292 item 2921

process calculations for
food sterilization in final
containers
p. 290 item 2906

FOOD

side effects in food and
drug sterilization
p. 290 item 2903

stability of vitamin A in butter
fat to ultraviolet radiation
p. 343 item 3436

sterilization by cathode rays
p. 3 item 33

sterilization
p. 1 item 15

sterilization by electrons
p. 4 item 43, 44, 45
p. 50 item 502, 504
p. 58 item 583
p. 184 item 1849

sterilization by irradiation
p. 3 item 37

sterilization by isotopic sources
p. 80 item 804

sterilization of beer
p. 1 item 14

sterilization of fruit juices and
sirups with ultraviolet rays
p. 99 item 999

sterilization of liquid egg material,
milk and other food with chlorine and
ultraviolet rays
p. 361 item 3615

sterilization of milk by ultraviolet
rays
p. 305 item 3055

sterilization of packaged food by cathode
rays
p. 363 item 3631

sterilization using cobalt-60 source
p. 415 item 4152 SR

sterilization with gamma rays
p. 55 item 550

FOOD

Sterilization with X- and
cathode rays
p. 1 item 18

study of milk formation by
radioactive compounds
p. 419 item 4190 SR

substances responsible for
activated flavor of
irradiated milk
p. 121 item 1212 & 1213

symposium on radiation
sterilization
p. 419 item 4195 SR

the egg and electronics
p. 295 item 2952

toxic action of ultra-
irradiated milk and other
substances
p. 299 item 2993

treated with radioactivity
p. 1 item 13

treatment of chocolate with
ultraviolet rays
p. 273 item 2736

treatment of milk in higher
frequency fields
p. 449 item 4494

UHF heating of frozen foods
p. 261 item 2619

ultrasonics
p. 348 item 3488

ultrasonic treatment of
milk
p. 451 item 4519

ultraviolet action on
wine in fermentation
p. 265 item 2652

FOOD

ultraviolet irradiated chocolate
p. 211 item 2119

ultraviolet irradiation
p. 159 item 1595

ultraviolet irradiation of cheese
molds and bacteriophage
p. 349 item 3497

ultraviolet irradiation of milk
p. 316 item 3168
p. 359 item 3591

ultraviolet irradiation of milk or
constituents
p. 349 item 3492, 3493

ultraviolet radiation in food
industry
p. 293 item 2934

ultraviolet rays for preservation
of fish
p. 352 item 3529

ultraviolet treatment of beverages
p. 265 item 2651

use of cathode rays
p. 4 item 42

use of electronics
p. 84 item 841

use of electronics in food technology
p. 263 item 2639

use of fission products for preservation
p. 408 item 4085 SR

use of fission products for
sterilization
p. 171 item 1714
p. 414 item 4145 SR

use of ultraviolet rays against
molds
p. 315 item 3157

FOOD

use of ultraviolet rays
in food and drug inspection
p. 341 item 3415

use of ultraviolet rays
for improvement of cheese
p. 141 item 1416

use of ultraviolet light
in food storage
p. 114 item 1146

use of van de Graaf
accelerators for sterilization
p. 125 item 1254

utilization of fission
products for canned meat
products
p. 54 item 548

utilization of fission
products for preservation
p. 396 item 3964 SR

utilization of fission
products in food processing
p. 242 item 2423

vegetable extracts treated
with ultraviolet rays
p. 279 item 2794

vitamin D and irradiation
of food
p. 122 item 1221

vitamin D in ultraviolet
irradiated milk
p. 98 item 982
p. 316 item 3167
p. 369 item 3699

vitamin loss by irradiation
p. 3 item 32

vitamins A and B-1 not destroyed
in irradiated milk
p. 443 item 4439 SR

FOOD

whole wheat irradiated biscuit
containing vitamins and minerals
p. 359 item 3595

x-ray and neutron effects on
cereal seeds
p. 4 item 40

x-ray illumination of eggs
p. 220 item 2205

x-irradiated milk stays fresh
p. 445 item 4456

FRUIT JUICES, ETC.

irradiation and sterilization
p. 32 item 321

FRUITS

bombarding fruits and vegetables
with electrons
p. 112 item 1120

effect of cathode rays on
nonenzymatic browning
p. 290 item 2909

effects of irradiation on blue-
berry and peach
p. 425 item 4254 SR

effects of irradiation on
peanuts
p. 420 item 4204 SR

electronic color sorting
p. 287 item 2876

electronics and cranberries
p. 343 item 3439

processing of fruits treated by
cathode rays

p. 292 item 2920
p. 434 item 4340 SR

quality boosted by rays
p. 268 item 2681

retention of vitamin C in canning
by ultraviolet irradiation

p. 240 item 2409

FRUITS

treating with ultraviolet
rays to facilitate ripening
or to destroy microorganisms
p. 249 item 2497

ultraviolet absorption of
polyphenolic substances
p. 190 item 1905

FUNGI

action of ultraviolet rays
on yeast-like fungi
p. 352 item 3522

behavior with radioactive
isotopes
p. 278 item 2787

controlled by ultraviolet
lamps
p. 266 item 2669

disruption of *saccharomyces*
by ultraviolet irradiation
p. 426 item 4264 SR

effect of electromagnetic
waves
p. 190 item 1904

effects of radiation
p. 353 item 3530

effect of radiation and
temperature on *fusarium*
p. 333 item 3333

effect of ultraviolet rays
p. 345 item 3454

effect of ultraviolet rays
on *glomerella*
p. 345 item 3453

effect of ultraviolet,
x- and cathode rays on spores
of *mucooraceae*
p. 237 item 2373

fungicidal action of ultraviolet
radiation
p. 378 item 3784

GAMMA RAYS

p. 148 item 1481
p. 215 item 2155, 2156

absorption
p. 79 item 793
p. 197 item 1977
p. 208 item 2081
p. 271 item 2719
p. 437 item 4374 SR

absorption and scattering
p. 7 item 71, 73
p. 274 item 2748

absorption and scattering in water
p. 98 item 987

absorption by air
p. 169 item 1696

absorption by elements
p. 7 item 72

absorption by gases and high elements
p. 64 item 642

absorption by lead
p. 299 item 2997

absorption by lead filters
p. 282 item 2827

absorption coefficients
p. 391 item 3919

absorption coefficients of rays from 0.3 to 1.5 mev
p. 391 item 3918

absorption from cobalt-60
p. 327 item 3275

absorption in comparison with X-rays
p. 10 item 106

GAMMA RAYS

absorption law for short wave rays
p. 252 item 2529

absorption measurements
p. 74 item 740
p. 179 item 1791

absorption method for energy measurement
p. 39 item 391

absorption of cobalt gamma rays
p. 438 item 4381 SR

absorption of radium B plus C rays
p. 303 item 3037

absorption of radium C rays
p. 67 item 677

absorption of radium rays
p. 207 item 2079
p. 208 item 2082
p. 330 item 3307

absorption of radium rays by lead
p. 364 item 3642

absorption of 5.3, 10.3 and 17.6 mev
p. 306 item 3060

absorption of 17-mev gamma rays in lead and aluminum
p. 248 item 2485

absorption of very penetrating rays
p. 136 item 1368, 1369

action on cysteine
p. 350 item 3501

GAMMA RAYS

action on protoplasm of
plant cell

p. 346 item 3463

action on seeds of cannabis
sativa (hemp)

p. 263 item 2637

activity

p. 3 item 35

abnormal efficiencies in
scintillation counting

p. 29 item 298

absolute measurement of
gamma ray energy

p. 150 item 1502

analysis of radium B and
C rays

p. 312 item 3123

analysis of radium D and
E rays

p. 312 item 3124

analysis of radium E rays

p. 148 item 1489

p. 149 item 1490, 1491

and structure of the atom

p. 52 item 523

and X-rays

p. 53 item 530

angular correlation

p. 48 item 483, 484

p. 141 item 1418, 1419

angular correlation between
beta and gamma rays in beta
transition

p. 146 item 1462

angular correlation of first
and third rays

p. 14 item 146

GAMMA RAYS

angular correlation of
successive and internally
converted radiations

p. 231 item 2313

angular distribution

p. 195 item 1959

angular distribution from
polarized nuclei

p. 343 item 3435

angular distribution from
stripping reactions

p. 315 item 3155, 3156

angular distribution in
nuclear disintegrations

p. 144 item 1440

angular distribution in
showers

p. 305 item 3057

anisotropy of radiation
from cobalt-60 nuclei

p. 87 item 875

anomalies in photographic
recording

p. 261 item 2618

anomalous absorption of
gamma radiation

p. 150 item 1504

artificial production of
nuclear radiation

p. 374 item 3746

artificial radiation.

Tube for 2.4 million volt

p. 50 item 505

artificial radioactivity

p. 46 item 463

p. 347 item 3479

GAMMA RAYS

assessment of dosage with radio
isotopes in mock-ups
p. 439 item 4395 SR

atom transformation with gamma
rays
p. 46 item 461, 462

atomic number of materials for
gamma ray interactions
p. 172 item 1725

attenuation
p. 117 item 1174

automatic recording spectrometer
p. 347 item 3476

beta activity induced by gamma
rays
p. 295 item 2953

beta-gamma-angular correlation
p. 33 item 336, 337
p. 117 item 1170
p. 271 item 2712
p. 301 item 3019

beta-gamma angular correlation
in beta decay
p. 134 item 1343

beta-gamma polarization correlations
p. 159 item 1591

beta spectrum and its relation to
gamma radiation
p. 252 item 2522

biological action
p. 322 item 3225
p. 382 item 3820
p. 439 item 4396 SR

biological activity of irradiated
amino acids
p. 34 item 346

biological effects on phycomyces
p. 125 item 1250, 1251

GAMMA RAYS

biological measurement in
X-rays
p. 167 item 1677

calculation of variation
p. 56 item 567

calibration of actinometer
p. 173 item 1734

cause of action on cells
p. 95 item 957

cause of second radiation
from radium
p. 111 item 1111

chemical action of radium
rays
p. 332 item 3325

cobalt gamma ray used in
radiation chemistry
p. 137 item 1376

coherent scattering by
bound electrons
p. 54 item 540

coincidence efficiency
p. 22 item 229

coincidences with protons
p. 83 item 836

correlation between beta
electron and gamma quantum
p. 100 item 1006

comparison of air and
tissue doses
p. 451 item 4516

comparison of effects
produced by 200-kv and
700-kv X-rays and gamma rays
p. 116 item 1160

GAMMA RAYS

comparison of nuclear and gamma
ray energy scales
p. 191 item 1913

comparison of ray intensities
from radium preparations
p. 355 item 3551

comparison of X- and gamma
ionization
p. 113 item 1137

comparison of X- and gamma
ray dosage
p. 354 item 3543

comparison with 700,000-volt X-rays
p. 116 item 1161

complexity of radium D rays
p. 363 item 3637

Compton effect
p. 173 item 1739

connection with beta ray spectra
p. 311 item 3110

constant-sensitivity detector
p. 283 item 2835

continuous gamma radiation
during beta decay
p. 371 item 3717

continuous gamma spectrum
accompanying beta radioactivity
p. 178 item 1780

continuous spectrum with
electron capture
p. 238 item 2386

contradiction in experiments
with radium C rays
p. 207 item 2075

conversion of gamma and X-rays
from radium D
p. 11 item 119

GAMMA RAYS

corpuscular hypothesis of
gamma, X- and beta rays
p. 49 item 491

correlations of successive
gamma rays
p. 212 item 2120

coupling effect between
gamma rays and electrons
p. 340 item 3402

cysteine protection against
irradiation
p. 277 item 2777

decomposition of water and
aqueous solutions
p. 9 item 96

degradation of polymers
p. 370 item 3704

degradation of cobalt-60
rays in a water medium
p. 376 item 3762

degradation in water
p. 376 item 3761

detection in the presence
of neutrons
p. 78 item 783

dependence of ionization
on temperature
p. 387 item 3878

beta-gamma angular
correlation in beta decay
p. 134 item 1343

detection of polarization
by pair production
p. 382 item 3825

detector for fast neutrons
p. 37 item 371

GAMMA RAYS

determination of absolute intensity
by ionization method
p. 316 item 3160

determination of energies from beta
spectroscopy
p. 172 item 1722

determination of energy by
photographic method
p. 202 item 2028

determination of rate of emission
from substances
p. 149 item 1499

device for measurement of rays from
a limited region
p. 298 item 2981

diamond as a counter
p. 84 item 847

diamond counters
p. 278 item 2786

diffusion and absorption
p. 240 item 2401

diffusion experiments in water
p. 172 item 1724
p. 447 item 4470

diffusion through matter.
Diffusion equations
p. 123 item 1234, 1235

direct measurement with counter
p. 240 item 2400

distinction from neutrons
p. 27 item 279

distributed type source for
biological material
p. 438 item 4385 SR

distribution and wave length of
radium rays
p. 331 item 3310

GAMMA RAYS

distribution of energy in
the different types
p. 351 item 3515

distribution of intensity in
absorbing media
p. 129 item 1299

distribution of intensity in
spectrum
p. 331 item 3311

disturbance of nucleic acid
metabolism
p. 258 item 2582

dosimetric study of gamma
sources
p. 400 item 4002 SR

dosimetric study of high
intensity source
p. 399 item 3993 SR

dosimetry
p. 273 item 2731

dosimetry and bactericidal
effects from a cobalt-60
source
p. 142 item 1426

dosimetry with organic
scintillators
p. 446 item 4466

dosimetry with polyvinyl
chloride films
p. 166 item 1666

effect of absorption on
projection of radiation
p. 83 item 830

effect of alcohols on gamma
ray oxidation of ferrous
sulfate solution
p. 97 item 974

GAMMA RAYS

- effect of cobalt gamma radiation on benzene
 - p. 351 item 3511
- effect of cobalt-60 radiation on microorganisms
 - p. 449 item 4491

p. 381 item 3819

destruction by electronic
treatment in packaged
rations and packaging
materials
p. 291 item 2916

effect of a new form of
X-ray on tobacco beetle
p. 309 item 3092

effect of beta radiation
on habrobracon
p. 94 item 944

effect of beta, gamma and
X-rays on habrobracon
p. 12 item 122

effect of beta irradiation
on melanoplus (locust)
embryos
p. 351 item 3516

effects of gamma rays on
recombination and crossing
over in drosophila
p. 382 item 3822

effects of electrons and
cathode rays on insects in
wheat and flour
p. 415 item 4156a, 4157

effects of irradiation on angora
fiber and its injurious insects
p. 365 item 3655

effects of irradiation on
drosophila
p. 370 item 3705

INSECTS

effects of low voltage cathode
rays on aspergillus

p. 379 item 3790

effect of oxygen on X-ray induced
mutations in drosophila

p. 437 item 4377 SR

effect of radial energy

p. 92 item 921

effect of supplementary factors
on mutations in aspergillus

p. 350 item 3503

effect of temperature during
X-radiation on drosophila

p. 203 item 2030

effect of temperature on X-ray
induced translocations in
drosophila

p. 255 item 2550

effect of ultrahard radiation
(31 mev betatron) on
drosophila eggs

p. 318 item 3180

effect of X-radiation on
mosquitos

p. 440 item 4403 SR

effect of X-rays on drosophila

p. 5 item 55

effects of X-rays upon
habrobracon

p. 69 item 693

electronic destruction in
packaged rations and
packaging materials

p. 431 item 4319 SR

electronic treatment of
packaged materials

p. 414 item 4148 SR

INSECTS

genetic changes in drosophila
by X-irradiation

p. 370 item 3706

genetic changes induced by
gamma rays

p. 370 item 3708

genetic effects of X-rays on
drosophila

p. 392 item 3928

histological nad physiological
effects of irradiation on
drosophila

p. 425 item 4256 SR

influence of radiation
on mutations in drosophila

p. 412 item 4126 SR

killing of drosophila eggs
by X-irradiation

p. 365 item 3657

lethal injuries of drosophila
eggs by X-rays and neutrons

p. 118 item 1185

loss of chromosomes in
drosophila by X-rays

p. 114 item 1148

mutations induced by X- and
gamma rays in drosophila

p. 370 item 3707

modification of X- and ultra-
violet induced mutation rate
in aspergillus

p. 350 item 3504

new method for killing insects
in commodities

p. 393 item 3932

protection against mutagenic
affects of radiation in
drosophila and mice

p. 195 item 1953

INSECTS

radiation effects on
habrobracon
p. 409 item 4090 SR

radiation genetics of
habrobracon
p. 431 item 4316 SR

radiation induced lethals in
drosophila
p. 117 item 1178
396 3968 SR

radiation tolerance of a wasp
p. 348 item 3486

radiosensitivity of
habrobracon
p. 69 item 694

reduction in Facet number
in drosophila by X-rays
p. 235 item 2358
2359

response of drosophila to
X-rays
p. 168 item 1680

response of melanoplus
(locust) to X-irradiation
p. 351 item 3517

sterilization and lethal
mutation after X-radiation
in drosophila
p. 400 item 4009 SR

sterilization with X- and
gamma rays
p. 59 item 593
594

INSECTS

tolerance of tradescantia
to cobalt-60 gamma rays
p. 336 item 3369

treatment of flies with
radioactive phosphorus
p. 173 item 1737

ultraviolet induced lethal
mutations in drosophila
p. 274 item 2743

use of fission products
p. 162 item 1623

use of X-rays for detection
of infestation of grain
p. 257 item 2572

use of X-rays in infestation
control
p. 190 item 1906

X-ray induced chromosome
aberrations
p. 392 item 3929

X-ray induced chromosome
breaks in drosophila
p. 236 item 2368

X-ray induced eye color
mutation in wasp
p. 381 item 3818

X-ray induced lethal
mutations in drosophila
p. 347 item 3478

X-ray induced lethals in
habrobracon
p. 164 item 1641, 1642,
1643

INSECTS

X-rays and parasite
wasps
p. 452 item 4525

INSTRUMENTATION

basic program
p. 432 item 4328 SR

nuclear physics studies
p. 441 item 4416 SR

INSTRUMENTS

development in England (1953)
p. 451 item 4515

maintenance and servicing
p. 99 item 995

process instrumentation in
nuclear field
p. 277 item 2771

INVERTASE

effect of radium radiations
p. 182 item 1823

IODIDES

influence of radium rays
on iodides of alkaline
earth metals
p. 193 item 1935
194 1940

ION EXCHANGE

chromatography
p. 408 item 4081 SR

IONIZATION

see also: ionizing radiation

a singular observation on
the ionization of alpha
particles
p. 283 item 2831

IONIZATION

analogies in alpha and electron
ionizations
p. 294 item 2943

and the absorption of X-rays
p. 301 item 3011

bactericidal effect and
mutations in bacteria
p. 17 item 172

biological effects
p. 413 item 4133 SR

by gamma and X-rays in argon
p. 72 item 721, 722

by gamma rays in a closed
thick-walled vessel
p. 279 item 2791

by neutral atoms in 200 to
8000-ev range
p. 32 item 322

by radiation as a function of
pressure and temperature
p. 75 item 758

by X-rays
p. 225 item 2258

by X-rays crossing the walls
of a small sphere
p. 264 item 2648

comparison of X-ray and gamma
ionization
p. 113 item 1137

density effect for the
ionization loss
p. 345 item 3452

density of X-ray produced
electrons
p. 369 item 3698

IONIZATION

dependence of ionization
power gamma rays on
temperature

p. 387 item 3878

distribution in materials
irradiated by 2 and 3
million-volt cathode
rays

p. 363 item 3632

distribution of ions in
irradiated cells

p. 150 item 1500

effect of temperature

p. 81 item 817

energy consumption of
ionization of air by X-rays

p. 150 item 1508

energy loss of secondary
electrons per ionization

p. 117 item 1176

energy transfer from
ionizing particles to
an aqueous medium

p. 149 item 1498

fluctuation due to gamma
rays

p. 57 item 573

fluctuations in gamma
produced ionization

p. 215 item 2153

in various carbon compounds
by X-radiation

p. 259 item 2597

IONIZATION

kinetics of ionization by
alpha particles

p. 264 item 2649

loss and straggling of fast
electrons

p. 143 item 1432

loss of energy of neutrons
in condensed matter

p. 233 item 2333

measurements by a Wilson
Cloud Chamber

p. 29 item 293

measurements of radiations
from substances

p. 259 item 2595

measurements of gamma rays

p. 65 item 653

mechanism of action on water

p. 219 item 2192

method for absolute gamma ray
dose measurements

p. 434 item 4345 SR

multiple X-rays ionization
of light atoms

p. 364 item 3646

nature of ionization produced
in a gas by gamma rays

p. 204 item 2048, 2049

of alpha rays

p. 61 item 613

of beta particles in an air-
alcohol-water vapor mixture

p. 29 item 292

IONIZATION

of heavy gases by X-rays

p. 26 item 267

50 509

of hydrogen by X-rays

p. 326 item 3262

of metals with cathode
rays

p. 60 item 607, 608

of molecules by electron
bombardement

p. 441 item 4414 SR

of alpha particles in gases

p. 354 item 3547

pH and biological activity

p. 389 item 3895

physical basis of biological
effects

p. 247 item 2471

preservation of food

p. 0 item 9

produced by alpha particles

p. 135 item 1357, 1359

263 2636

378 3789

produced by beta and gamma
rays

p. 122 item 1227

produced by gamma rays

p. 367 item 3679

produced in gases by

X-ray produced cathode rays

p. 205 item 2051

IONIZATION

radiobiological importance

of energy distribution

p. 395 item 3955

relation of energy loss to
ionization by cathode rays

p. 139 item 1398

relation of photographic and
ionizing effects of X-rays

p. 32 item 329

specific ionization produced
positrons and electrons

p. 308 item 3084

theory and biological reactions

p. 271 item 2715

tracks of alpha rays in
hydrogen

p. 250 item 2504

variation of power with
velocity of cathode rays

p. 139 item 1399

variation with velocity for
beta particles

p. 385 item 3858

with gamma rays from ground
or atmosphere

p. 169 item 1693

with X-rays of different wave
lengths

p. 213 item 2139

yields of heavy particles

p. 206 item 2064

IONIZATION

yields of radiations,
fluctuations of ions
p. 117 item 1177

IONIZING RADIATION

see also: ionization

action of X-rays on
ammonia solution
p. 303 item 3030

action on bacteria
p. 218 item 2183

action on aqueous enzyme
solutions
p. 85 item 858

action on aqueous solutions
p. 85 item 855

action on carotene and
vitamin A
p. 65 item 654

action on colloidal solutions
p. 157 item 1572

action on nucleoproteins of
cell
p. 111 item 1117, 1118

altering of response
p. 324 item 3244

attempts to alter the
response to radiations
p. 403 item 4038 SR

biochemical effects
p. 85 item 857

biological action

395 3953
413 413 6 SR

biological indicators and
mechanism of action
p. 426 item 4260 SR

biological significance of
action on nucleic acids
p. 375 item 3756

cellular respiration and cell
division
p. 397 item 3977 SR

chemical changes in mackerel
tissues
p. 269 item 2693, 2697

chemical action on aqueous
solutions
p. 118 item 1182, 1183

chemical action on nucleic acids
p. 319 item 3196

chemical action on solutions
p. 344 item 3441, 3442

chemical dosimeter
p. 194 item 1948, 1949

chemical dosimetry
p. 91 item 913

chemical effects
p. 344 item 3444

IONIZING RADIATION

chemical effects in some
gels

p. 91 item 915

chemical measurement

p. 91 item 916

chemical reactions

p. 232 item 2326

446 4469

chemistry of biological
after-effects

p. 183 item 1836

comparative bactericidal
effects

p. 142 item 1425

decomposition of hydrogen
peroxide

p. 375 item 3755

development of cellular
damage

p. 149 item 1496

effect of hydrogen peroxide
on cell metabolism, enzymes
and proteins

p. 397 item 3976 SR

effect on barley

p. 106 item 1068

effect on biochemical
compounds

p. 425 item 4250 SR

effect on biological systems

p. 23 item 233

IONIZING RADIATION

effects on enzyme activities
of yeast cells

p. 326 item 3268, 3269

effect on enzyme activity

p. 401 item 4017 SR

effect on enzymes

p. 23 item 234

24 242

effects on high polymers

p. 410 item 4105 SR

effects on ice and frozen
solutions

p. 345 item 3455

effect on lymphocytes

p. 292 item 2928

effects on mammalian blood

p. 442 item 4420 SR

effects on phosphites

p. 78 item 787

effect on protein denaturation

p. 128 item 1280, 1282

effect on respiration and
oxidases of potato tuber

p. 349 item 3496

400 4003 SR

effects on ribosenucleoprotein
fibres

p. 308 item 3085

effect on spores of aspergillus
niger

p. 31 item 314

IONIZING RADIATION

effect on vitamin B-12
p. 243 item 2437

energy measurement
p. 68 item 688

errors in study of micro-
bicidal power of rays
p. 218 item 2184

extremely absorbable radiation
emitted from radium C
p. 377 item 3778

food processing
p. 290 item 2905

for fish spoilage control
p. 291 item 2913, 2915

free atoms and radicals in
irradiated water and aqueous
solutions
p. 85 item 851

from radium and polonium,
effects on fungi
p. 31 item 316

hematological and biochemical
effects
p. 416 item 4160 SR

hydrogen peroxide formation
in water
p. 43 item 430, 435, 436
437

inactivation of bacteriophage
p. 11 item 115
285 2852

influence of light on sulfhydryl
content of yeast after irradiation
p. 432 item 4327 SR

IONIZING RADIATION

influence of oxygen and
temperature on effects
p. 409 item 4094 SR

influence on enzyme systems
p. 420 item 4200 SR

instrumentation for dosimetry
p. 408 item 4080 SR

lethal microbiological
effects
p. 434 item 4347 SR

lethal and mutagenic action
on aspergillus
p. 341 item 3418
342 3421

lethal mutations and
bactericidal action
p. 435 item 4358 SR

literature of radiations in
food and pharmaceutical fields
p. 290 item 2900
414 4149 SR

making visible the distribution
of activity
p. 247 item 2473

mechanism of action

LACTASE

effect of X-rays on
formation of lactase in
escherichia coli

p. 393 item 3931

LACTIC ACID

decomposition by ultra-
violet rays

p. 112 item 1127

LEAD

absorption of gamma rays from
radium B and C

p. 299 item 2997

absorption of radium gamma rays

p. 364 item 3642

absorption of 17-mev gamma rays

p. 248 item 2485

LEGAL ASPECTS

p. 453 item 4536

LINEAR ACCELERATORS: see accelerators

LINOLEIC ACID

irradiation induced autoxidation

p. 251 item 2510

LIPIDS

absorption and metabolism in
radiation injury

p. 441 item 4417 SR

effect of the diet on lipid
metabolism using carbon-14

p. 420 item 4205 SR

effects of ultraviolet and gamma
rays on cell lipids

p. 409 item 4093 SR

LIPOIDS

activation by ultraviolet rays

p. 329 item 3295

LIQUIDS

radiolysis

p. 288 item 2882

chemical effects of alpha rays

p. 92 item 928

diffraction of X-rays

p. 197 item 1976

p. 294 item 2942

p. 345 item 3457

diffraction of X-rays in long-
chain liquids

p. 372 item 3724

LIQUIDS

distributions of H and OH in
irradiated aqueous solutions

p. 224 item 2243

energy absorption on external
irradiation

p. 452 item 4522

intensity of gamma radiation

p. 67 item 678

ionization by X-rays

p. 354 item 3544

irradiation

p. 41 item 419

range of alpha rays

p. 254 item 2549

solubility of radium emanation

p. 294 item 2946

sterilization by radiation

p. 36 item 366

sterilization by ultraviolet
rays

p. 25 item 256

p. 296 item 2969

sterilizing sugar liquids with
ultraviolet rays

p. 105 item 1051, 1052

stopping of alpha rays

p. 282 item 2824

target assembly for cyclotron
irradiation

p. 449 item 4495

ultraviolet irradiation

p. 315 item 3158

use of X-rays for determination
of structure

p. 92 item 927

LIQUIDS

visible radiation by beta rays
p. 67 item 679

LINEAR ACCELERATORS

see: accelerators

LOCUST (MELANOPLUS)

effect of beta irradiation
p. 351 item 3516

response to X-irradiation
p. 351 item 3517

MAIZE

an interesting phenomenon on
irradiation
p. 321 item 3215

effect of gamma radiation on
mutation rate
p. 330 item 3303

MEASUREMENT

a chemical for measurement of
ultraviolet radiation
p. 201 item 2014

absolute measurements of
alpha rays
p. 306 item 3065

absolute wave length measurements
of X-rays
p. 289 item 2891

absorption law for total-radiation
p. 31 item 311

absorption method for measurement
of beta and gamma energies
p. 39 item 391

absorption X-ray measurements
from 500 to 1000 and 10 to 250 kv
p. 362 item 3626, 3627

and biological action of X-rays
of different wave lengths
p. 100 item 1002

and detection of ionizing
radiations
p. 133 item 1338

MEASUREMENT

and detection of ionizing
radiations
p. 133 item 1338

and standards of radioactivity
in biological investigations
p. 234 item 2341

beta radiation dosage measure-
ments
p. 398 item 3988 SR

biological measurement of
gamma rays in X-rays
p. 167 item 1677

biological measurement of
radiations
p. 275 item 2753

calculation of penetrations
and diffusions of X-rays
p. 337 item 3377, 3378, 3379
p. 338 item 3380, 3382

calibrations of beta emitters
p. 178 item 1789

calorimetric radioactivity
measurements
p. 266 item 2667

chemical measurement of
radiations
p. 91 item 916

colorimetric dosimeter for
qualitative measurements
p. 438 item 4383 SR

committee report on standard-
ization of X-ray measurements
p. 351 item 3511

comparison of physical and
biological methods
p. 275 item 2758

Compton effect and measure-
ment of X-rays
p. 141 item 1412

MEASUREMENT

correction of measurements
of X-ray scattering

p. 154 item 1545

counting of the particles
in cathode rays

p. 297 item 2979

p. 298 item 2980

depth dose measurements at
400 kv

p. 185 item 1859

depth dose measurements for
X-rays

p. 48 item 485

depth dose measurements of
beta isotopes

p. 441 item 4412 SR

determination of beta ray
energies

p. 79 item 796

determination of e/m and v by
measurement of helix of Wehnelt
cathode rays

p. 267 item 2678

deviations in X-ray ionization
measurements

p. 338 item 3383

diamond as gamma ray counter

p. 84 item 847

dosimeter for qualitative
measurement of radiations

p. 352 item 3524, 3525

efficiency of gamma counters

p. 161 item 1616

for the production of
activities by 14 mev neutrons

p. 124 item 1240

MEASUREMENT

gamma ray measurement of
radium

p. 272 item 2722

german and french units

p. 184 item 1844

intensity and energy
measurements of beta
radiation

p. 506 item 5067 SR

international comparison of
X-ray standards

p. 354 item 3542

ionization chamber method for
gamma dose measurements

p. 434 item 4345 SR

ionization measurement of
gamma radiation

p. 197 item 1971

low energy counting with
liquid scintillation solute

p. 163 item 1635

low energy radiations in
proportional counters

p. 159 item 1596

methods for determining
ultraviolet intensity

p. 138 item 1386

methods for total radiation

p. 145 item 1452

method of measuring e/m and v
for cathode rays

p. 191 item 1915

multiplier phototube

p. 38 item 387

neutron velocity

p. 163 item 1631

new method for X-ray
intensities

p. 140 item 1403

MEASUREMENT

new units for measuring
radioactivity
p. 75 item 759

of A-41 beta radiation dosage
p. 400 item 4006 SR

of absolute intensity of gamma
rays by ionization method
p. 316 item 3160

of absolute intensity of X-rays
p. 343 item 3434

of absolute intensities of
X-ray reflexions
p. 393 item 3939

of absorption and reflexions
of beta particles
p. 211 item 2114

of absorption coefficients
for gamma rays
p. 180 item 1809

of absorption coefficients
of 17 and 6.1 mev gamma rays
p. 365 item 3653

of absorption coefficient
of X-rays
p. 96 item 969

of absorption cross sections
for neutrons
p. 166 item 1664

of absorption of 1 and 2
million volt X-rays
p. 330 item 3302
p. 433 item 4337 SR

of alpha rays
p. 80 item 802

of alpha particle energies
p. 53 item 536

of beta and gamma absorption
p. 393 item 3938

MEASUREMENT

of beta and gamma ray dosage
p. 51 item 511, 512

of beta and gamma rays in
radium C

of beta and gamma rays with
scintillation counter
p. 189 item 1899

of beta decay lifetimes
p. 176 item 1765

of beta radiation dosage
p. 103 item 1036

of beta ray depth dose
p. 360 item 3602

of beta ray energy by
absorption
p. 140 item 1406

of beta rays
p. 54 item 544

of beta rays associated with
X-rays
p. 75 item 757

of biological action of
neutrons
p. 6 item 66

of bremsstrahlung from 17 mev
electrons
p. 217 item 2176

of change of wave length of
scattered X-rays
p. 325 item 3259

of the charge of moving
electrons
p. 208 item 2089

of cobalt-60 radiation
p. 231 item 2312

of cyclotron efficiency
p. 41 item 417

MEASUREMENT

of cyclotron induced gamma radiation

p. 7 item 79

of depth dosage by means of goldfish

p. 108 item 1087

metabolic processes with
carbon-14

p. 431 item 4310 SR

prevention of growth in
optical instruments series

p. 422 item 4224 SR

ultraviolet irradiation of
cheese molds and bacteriophage

p. 349 item 3497

use of ultraviolet rays in
the food industry

p. 315 item 3157

MOLECULES

effects of X-rays

p. 308 item 3086

ionization and dissociation
by electron bombardement

p. 441 item 4414 SR

MOLECULES

irradiation

p. 444 item 4447 SR

radiation induced de-
composition

p. 445 item 4457

MOSQUITOS

effect of X-irradiation on
immunity to malarial infection

p. 440 item 4403 SR

NEUTRONS

absorption and velocity

p. 104 item 1049

action on enzymatic activity

p. 185 item 1857, 1858

angular distribution of
neutrons scattered from various
materials

p. 380 item 3807

artificial production

p. 80 item 801

bactericidal action

p. 225 item 2252, 2254

biological action on barley
and wheat

p. 201 item 2017

biological effects and
possible applications

p. 241 item 2412

biological effectiveness

p. 51 item 513

biological effectiveness in
relation to effects of cobalt-
60 gamma rays

p. 368 item 3687

chemical and biological effects

p. 106 item 1067

comparative studies of bio-
logical effects of X-ray,
neutron and other irradiations

p. 150 item 1501

NEUTRONS

- comparison of effects of
X-rays and neutrons on
barley seeds
p. 400 item 4000 SR
- comparison of the effects
of X-rays, neutrons and mustard
compounds on corn seedling
p. 409 item 4091 SR
- cysteine protection against
irradiation
p. 277 item 2777
- cytogenetic effects
compared with X-ray effects
p. 138 item 1384
- decomposition of water and
aqueous solutions
p. 9 item 96
- degradation of polymers
p. 370 item 3704
- diffraction
p. 328 item 3280
- diffuse scattering
p. 205 item 2056
- diffusion
p. 186 item 1866
- distinction from gamma rays
p. 27 item 279
- dosimetry
p. 169 item 1692
- effect in irradiated
permanganates
p. 16 item 165
- effect of cathode rays
3000 kv
p. 142 item 1428
- effect of irradiation on
tin
p. 121 item 1219

NEUTRONS

- effects of neutron irradiation
on growth of potatoes
p. 337 item 3371
- effects of radiation on chromo-
somes in datura
p. 425 item 4259 SR
- effect on cereal seeds
p. 4 item 40
- effect on metallic diffusion
p. 39 item 397
- elastic scattering
p. 284 item 2843
p. 378 item 3787
- elastic scattering by deuterons
p. 68 item 683
- emission by action of alpha
particles on light elements
p. 82 item 829
- emission of gamma rays by
nuclei excited by neutrons
p. 160 item 1607
- emulsion techniques for
measurement of energy spectra
p. 450 item 4508
- energy of gamma rays excited
by neutrons
p. 202 item 2023, 2024
- energy spectra
p. 73 item 735
- experiments in barley
p. 237 item 2379
- experiments on scattering
p. 133 item 1330
- fast dosimetry
p. 181 item 1818
- gamma-neutron radiation chamber
for biological studies
p. 397 item 3974 SR

NEUTRONS

gamma radiation from interaction
of 14 mev neutrons with iron
p. 317 item 3175

gamma radiation from scattering
of 2.7 mev neutrons
p. 317 item 3174

gamma ray detector
p. 37 item 371

gamma rays from interaction with
various materials
p. 317 item 3173

generator and ion source of
high intensity
p. 260 item 2603

genetic effects on crop seeds
p. 419 item 4199 SR

high energy yields from targets
bombarded with protons and deuterons
p. 206 item 2069

inelastic scattering
p. 276 item 2764

interaction of 14 mev neutrons
with protons and deuterons
p. 10 item 108

interaction with nuclei
p. 383 item 3833

interpretation of fast scattering
p. 127 item 1272

ionization chamber for measurement
in biological experiments
p. 115 item 1157

lethal effect on drosophila
p. 20 item 202

lethal injuries to drosophila
eggs
p. 118 item 1185

measurement of absorption
cross sections
p. 166 item 1664

NEUTRONS

measurement of biological
action
p. 6 item 66

measurement of coexisting
radiations
p. 161 item 1613

measurement of neutron and gamma
interactions
p. 401 item 4019 SR

mechanism of enzymatic in-
activation
p. 185 item 1356

mechanism of fermentation
p. 185 item 1855

neutron-deuteron scattering
at 4.5 and 5.5 mev
p. 372 item 3721

neutron-electron interaction
p. 332 item 3326

90-mev neutron-proton
scattering
p. 370 item 3709

nuclear reactions of chlorine
p. 137 item 1378

nuclear scattering 300-mev
neutrons
p. 20 item 206

number of gamma rays per
neutron capture
p. 264 item 2642

physiological effects
p. 6 item 67

producing gamma rays
p. 17 item 173

proton-neutron reactions in
light elements
p. 334 item 3342

NEUTRONS

radiation effects in biology
p. 63 item 639

radioactive decay
p. 334 item 3343

of
reaction/oxygen
p. 202 item 2027

recoil effects
p. 451 item 4510

relative effects of neutron
and X-rays on cells in same
organism
p. 395 item 3959

scattering
p. 18 item 183

scattering by bound
protons
p. 231 item 2314

scattering by molecules
p. 313 item 3138

scattering of gamma rays
p. 313 item 3136

scattering by protons
p. 221 item 2219

slow neutron absorption
cross sections of elements
p. 306 item 3067

slow-neutron-capture gamma
rays
p. 359 item 3590

slowing down by heavy nuclei
p. 284 item 2842

small angle scattering
p. 376 item 3763

NEUTRONS

small angle scattering
p. 376 item 3763

somatic crossing over in
drosophila
p. 226 item 2262

status of dosimetry
p. 307 item 3072

structure
p. 313 item 3135

theory of scattering and
capture
p. 377 item 3773

theory of slow-neutron
scattering
p. 284 item 2841

time limit between fission
and neutron emission
p. 334 item 3347

use of nuclear emulsions for
neutron dosimetry
p. 329 item 3298

velocity measurements
p. 163 item 1631

NITRIFICATION

by ultraviolet rays
p. 32 item 327

NITROGEN

biological nitrogen fixation
with isotope tracers
p. 444 item 4444 SR

small angle scattering of
X-rays by nitrogen
p. 382 item 3829

NITROGEN COMPOUNDS

kinetics and specificities of
deamination by X-rays
p. 86 item 869

NITROGEN COMPOUNDS

structure and sensitivity
to X-rays

p. 86 item 865

NUCLEAR DATA

p. 373 item 3735

NUCLEAR DYNAMICS

p. 232 item 2321

NUCLEAR ENERGY

utilization

p. 101 item 1014

NUCLEAR EXCITATION

by particles which do not
penetrate barrier

p. 119 item 1190

NUCLEAR FISSION

asymmetry

p. 171 item 1718

NUCLEAR FORCES

charge independence

p. 359 item 3598

derivation from field
theories

p. 119 item 1191

effect of retardation

p. 102 item 1025

from extended sources

p. 166 item 1667

saturation

p. 187 item 1874

NUCLEAR INDUCTION

method

p. 275 item 2759

theory of different equations

p. 372 item 3720

NUCLEAR INTERACTIONS

high energy pairs of
particles

p. 316 item 3169

NUCLEAR INTERACTIONS

velocity depended interactions

p. 38 item 382

NUCLEAR PHYSICS

Birmingham Conference (1953)

p. 446 item 4461

conference on biological
applications

p. 401 item 4016 SR

lectures at Zurich, (1931)

p. 51 item 515

studies on instrumentation
problems

p. 441 item 4416 SR

NUCLEAR PRODUCTS

directory of nuclear and allied
products

p. 445 item 4451

NUCLEAR QUANTITIES

integral relations to atomic
quantities

p. 387 item 3871

NUCLEAR RADIATIONS

effect on bacteria infesting
potato bags

p. 342 item 3429

in well logging

p. 144 item 1445

study of directional correlation
in successive radiations

p. 116 item 1169

NUCLEAR RAYS

comparison of nuclear and gamma
ray energy scales

p. 191 item 1913

NUCLEAR REACTIONS

comparison of methods

p. 355 item 3553

NUCLEAR REACTIONS

- determination of energies
 - p. 117 item 1172
- effect of charge symmetry
 - p. 212 item 2126
- energies
 - p. 277 item 2778
- energies as integral multiples of a natural unit
 - p. 387 item 3872
- excitations functions in the range 0-100 mev
 - p. 173 item 1730
- high energy particle interactions
 - p. 411 item 4118 SR
 - p. 412 item 4120 SR
- investigation of reactions involving charged particles
 - p. 365 item 3650

NUCLEAR REACTORS

- catalog
 - p. 448 item 4485, 4486
- legal aspects
 - p. 453 item 4536

NUCLEAR TRANSFORMATION

- ohemical effects
 - p. 398 item 3980 SR

NUCLEATE

- effects of X-rays on sodium thymus nucleate
 - p. 353 item 3532

NUCLEI

- acceleration of multiply charged nuclei
 - p. 360 item 3600
 - p. 403 item 4037 SR
- artificial radioactivity after alpha ray bombardement
 - p. 253 item 2538
- effects of irradiation on enzymatic activities of cell nuclei
 - p. 411 item 4115 SR
- emission of gamma rays during decay
 - p. 206 item 2065
- energy levels
 - p. 222 item 2225
- energy levels of light nuclei
 - p. 419 item 4197 SR
- energy of alpha particles from radioactive nuclei
 - p. 292 item 2925
- high energy electron scattering by nuclei
 - p. 282 item 2829
- excitation by X-rays
 - p. 119 item 1196

NUCLEI

- inflation of heavy nuclei
 - p. 288 item 2881
- interaction with electrons
 - p. 155 item 1556
- interaction with fast neutrons
 - p. 383 item 3833
- interaction with gamma rays
 - p. 341 item 3412
- observations on the irradiated cell nucleus
 - p. 376 item 3767
- preferred ratios of energies of excited states
 - p. 297 item 2973
- radiations from atomic nuclei
 - p. 310 item 3105
- radiation properties
 - p. 376 item 3764
- radiation widths
 - p. 143 item 1430
- reaction of light nuclei and penetration of charged particles through matter
 - p. 405 item 4057 SR
- regularities among heavy nuclei
 - p. 364 item 3645
- stability against beta disintegration
 - p. 127 item 1278
- use of microbeam for biological investigations
 - p. 405 item 4058 SR

NUCLEIC ACIDS

- absorption of ultraviolet rays
 - p. 74 item 747

NUCLEIC ACIDS

- action of X-rays on metabolism
 - p. 7 item 70
- biological significance of ionizing radiations
 - p. 375 item 3756
- chemical action of ionizing radiations
 - p. 319 item 3196
- chemical action of X-rays
 - p. 319 item 3195, 3197
- disturbance of metabolism by X- and gamma radiation
 - p. 258 item 2582
- effect after X-irradiation
 - p. 87 item 876
- effect of irradiation on formation
 - p. 198 item 1981
- effect of ultraviolet rays
 - p. 79 item 792
- effect of X-rays
 - p. 5 item 59
 - p. 276 item 2762
 - p. 353 item 3533
- effect of X-rays on incorporation of carbon-14
 - p. 170 item 1701
- formation of phosphate esters on X-irradiation
 - p. 319 item 3194
- microbiological assay on constituents produced by radiation injury
 - p. 421 item 4211 SR
- radiation induced changes and hydrolysis products
 - p. 398 item 3987 SR

NUCLEIC ACIDS

synthesis in ultraviolet-
irradiated escherichia coli
p. 198 item 1983

X-ray studies

p. 15 item 159

NUCLEONS

nucleon-nucleon scattering
p. 238 item 2380

passage through matter
p. 40 item 406

transport

p. 204 item 2047

NUCLEUS

atomic nucleus and alpha
radiation
p. 388 item 3886

comparative effect of X- and
radium rays on nucleus and
cytoplasm
p. 298 item 2988

NUTRITION

use of radioactive substances
in research
p. 260 item 2605

OATS

irradiated, effect
on animals

p. 33 item 338

OILS

action of ultraviolet
rays

p. 126 item 1267

action of ultraviolet
rays on vegetable oils

p. 351 item 3518

behavior in ultraviolet
light

p. 157 item 1578

effect electron bursts
on vegetable and fish
oils

p. 16 item 162

effect of irradiation on
olive oil

p. 210 item 2105

effects of radiation

p. 344 item 3449

effect of ultraviolet
rays on soybean oil

p. 183 item 1830

influence of ultraviolet
rays on hardened oils

p. 365 item 3654

inhalation of irradiated
oils

p. 339 item 3398

irradiation of peanut oil
with ultraviolet rays

p. 305 item 3056

OILS

physical and chemical
changes by ultraviolet
irradiation

p. 183 item 183

treating with ultraviolet
rays to produce vitamins or
enzymes

p. 198 item 1982

vitamin content of ultra-
violet irradiated olive oil

p. 303 item 3031

OLIVE OIL

effect of irradiation

p. 210 item 2105

vitamin content of ultra-
violet irradiated oil

p. 305 item 3031

ORGANIC COMPOUNDS

action of radium rays and
reactions

p. 193 item 1938

action of ultraviolet rays

p. 32 item 328

effect of alpha, beta, gamma
and X-rays

p. 404 item 4046

ORGANIC REACTIONS

effect of C-14 on their
course

p. 420 item 4207

ORGANIC SOLUTIONS

radiation chemistry

p. 257 item 2575

ORGANIC SUBSTANCES

radiation chemistry

p. 257 item 2574

ORGANISM

see also: microorganisms

action of ultraviolet rays
p. 172 item 1729

action of ultraviolet
rays with simple and complex
reactions
p. 167 item 1670

effect of irradiation on
thermophilic organisms in
sugar
p. 158 item 1583

effect of radiations on
genetic systems
p. 431 item 4311

effect of X-rays
p. 206 item 2061

excitability by ultraviolet
rays
p. 167 item 1672

general effect of ultraviolet
rays
p. 319 item 3191

lethal effects of X-rays on
; planktons
p. 439 item 4399

primary effect of radium
p. 266 item 2668

OXIDASE

effect of ionizing radiation
on potato tuber
p. 349 item 3496
400 4003 SR

OXYGEN

effect of concentration
on sensitivity of barley
to gamma rays
p. 352 item 3520

effect on a radioreduction
reaction
p. 360 item 3605

effect on chromosome
aberrations produced by alpha
rays
p. 357 item 3574

effect on rate of X-ray
induced mutations in
drosophila
p. 437 item 4377

influence on effects of
ionizing radiation
p. 409 item 4094

relation of biological action of
oxygen and X-rays
p. 281 item 2813

PACKAGING

and processing beef slices
treated with cathode rays
p. 290 item 2901
291 2918
433 4338, 4339

contamination of containers
by radioactive substances
p. 287 item 2872

electronic destruction of
insects in packaged rations
and packaging materials
p. 291 item 2916
431 4319

PACKAGING

electronic inspection
p. 151 item 1516

electronic sterilization in
the package
p. 327 item 3273

electronic treatment of
packaged materials against
insects
p. 414 item 4148

effect of cathode rays
on packages made of
polyethylene-coated paper
p. 432 item 4320

effect of X-, ultraviolet and
nuclear radiation of bacteria
infesting potato bags
p. 342 item 3429

food and drug sterilization
after packaging by cathode
rays
p. 363 item 3631

gamma-ray sterilization
p. 198 item 1989

irradiation of food wrappers
p. 199 item 1990

process calculations for
food sterilization in final
containers
p. 290 item 2906

sterilization of food in
final containers
p. 415 item 4155

PACKAGING

sterilization of closures
and containers by irradiation
p. 250 item 2500

sterilization of packaged
pharmaceuticals
p. 416 item 4165

ultrament, a paper
preventing ultraviolet
rays.
p. 239 item 2399

ultraviolet absorption
in plastic foils
p. 227 item 2271

use of irradiated poly-
thene ("irradhene")
p. 0 item 8

use of soft X-rays
p. 3 item 38

PAPAIN

effect of X-rays
p. 442 item 4425

inactivation by ultraviolet
rays
p. 196 item 1964

PARAFFIN

passage of electric current
during X-irradiation
p. 363 item 3638

PARAFFIN WAX

X-irradiation
p. 386 item 3865

PATENTS

Atomic Energy Commission
owned patents
p. 434 item 4341, 4344 SR

PEANUT OIL

irradiation with
ultraviolet rays
p. 305 item 3056

PEANUTS

effects of irradiation
p. 420 item 4204

PENICILLIN

inactivation by deuterium
bombardment
p. 90 item 907

PENICILLIUM

biochemical mutations
p. 44 item 443

PEPSIN

absorption of ultraviolet
rays
p. 134 item 1346

effect of radium
radiations
p. 182 item 1824

effect of ultraviolet
rays
p. 182 item 1822

inactivation by radium
beta and gamma rays
p. 270 item 2708

PEPTIDES

effects of cathode and
ultraviolet rays
p. 239 item 2396

PERCHLORIC ACID

action of X-rays
p. 257 item 2570

PERMANGANATES

effect of neutron-
irradiation
p. 16 item 165

PETROLATUM

BACTERICIDAL PROPERTIES
after ultraviolet
irradiation
p. 323 item 3232

PHARMACEUTICALS

cold sterilization
p. 348 item 3489

influence on irradiation
effects
p. 108 item 1086

literature of radiations
in food and pharmaceu-
tical fields
p. 290 item 2900

literature pertaining
to irradiation
p. 414 item 4149

sterilization
p. 410 item 4104

sterilization of
packaged goods
p. 416 item 4165

use of fission products
for sterilization
p. 414 item 4145

use of irradiated
polythene for packaging
p. 0 item 8

PHARMACOLOGY

application of isotopes
p. 130 item 1304

PHENYLALANINE

action of cathode rays
p. 289 item 2895

PHOSPHITES

effect of ionizing
radiation
p. 78 item 787

PLANKTON

vitamin content after
irradiation
p. 310 item 3101

PLANTS

action of alpha, beta
and gamma radiation on
cell protoplasm
p. 346 item 3463

action of radium on cells
p. 384 item 3841

applications of atomic
energy in plant science
p. 436 item 4363

effects of alpha radiation
p. 395 item 3958

effect of beta radiation
isotopes in fruit trees
p. 106 item 1066

effect of gamma rays on
ascorbic acid
p. 76 item 767

effect of irradiation
on growth
p. 421 item 4216

PLANTS

effect of irradiation on
tissues
p. 425 item 4255

effect of light on
irradiated plants
p. 25 item 255

effect of neutron
radiation on chromosomes
p. 425 item 4259

effects of radioactive
substances on pathogens
p. 418 item 4187

effects of ultraviolet
radiation on lemna minor
p. 371 item 3719

histological and
physiological effects of
irradiation on tradescantia
p. 425 item 4256

influence of X-rays on
field bean seeds and
development of plants
p. 281 item 2819

influence of X-rays on
vegetative system
p. 307 item 3079

investigation of radiant
energy
p. 426 item 4261

ionizing radiation for
plant disease
p. 408 item 4087, 4088

irradiation of plant
viruses
p. 244 item 2440

PLANTS

irradiation of viruses

p. 104 item 1041

lethal effect of
radioisotopes

p. 339 item 3395

radiation effects

p. 46 item 466

radiation effects on
growth

p. 293 item 2931

somatic mutations in
antirrhinum by gamma
irradiations

p. 337 item 3373

structural changes in
microspores of tradescantia
by alpha rays

p. 210 item 2104

vegetative and floral
development of irradiated
and non-irradiated tradescantia

p. 401 item 4011

X- and gamma ray induced
chromosomal aberrations
in tradescantia

p. 203 item 2034, 2035
2036

X-ray susceptibility of differ-
ent varieties of a plant genus

p. 281 item 2812

PLASMA

changes in volume by total
body X-radiation

p. 437 item 4375

PLASMA

effect of alpha rays on
nucleus and plasma of
the cell

p. 281 item 2810

stabilization of albumin
during ultraviolet
irradiation

p. 172 item 1728

PLASTICS

effect of gamma radiation

p. 313 item 3132

effect of irradiation

p. 2 item 27

effect of radiation on
physical properties

p. 397 item 3979

effect of X-rays

p. 91 item 911, 914

toughened by electrons

p. 2 item 22

ultraviolet absorption
in foils

p. 227 item 2271

X-ray irradiation of
polystyrene, polythene
and paraffin wax

p. 386 item 3865, 3866

POLYMERIZATION

by cathode rays

p. 233 item 2339

of vinyl monomers and
styrene by gamma radiation

p. 399 item 3995, 3996,
3997

POLYMERS

degradation by gamma
rays and neutrons
p. 370 item 3704

effect of high energy
radiation
p. 67 item 670, 671

effect of ionizing radiation
p. 410 item 4105

high energy radiation
and long chain polymers
p. 410 4101

irradiation
p. 231 item 2317

irradiation by electrons
p. 224 item 2241

POLYSTYRENE

X-ray irradiation
p. 386 item 3865

POLYTHRENE

p. 386 item 3865

POSITRON

annihilation in flight
p. 137 item 1371

annihilation in solids
p. 285 item 2859

backscattering
p. 323 item 324

from gamma rays
p. 12 item 125

specific ionization produced
by positrons and electrons
p. 308 item 3084

theory
p. 365 item 3656

POTASSIUM

action of X-rays on
potassium of blood of man
p. 316 item 3164

POTATOES

effect of ionizing radiations
on respiration and oxidases
p. 400 item 4003

effect of X-ray, neutron
and gamma irradiation
p. 337 item 3371

PROTECTION

against radiation hazards
and maximum allowable
values
p. 261 item 2610

against X-rays
p. 18 item 188

against X- and beta rays
p. 14 item 144

agents protecting against
radiation
p. 8 item 83

chemical nature of the
radiation protection
factor in mouse spleen
p. 441 item 4411

control of radiation
hazards
p. 437 item 4376

effect in radiochemistry
p. 86 item 867

from effects of radiation
p. 2 item 28

from injury by radium
p. 113 item 1134

PROTECTION

gamma ray studies
for gamma ray shield
p. 432 item 4329

general information
concerning radiation
p. 434 item 4349

hood for radioactivity
work
p. 374 item 3746a

measurements of protection
against X- and gamma rays
p. 293 item 2939

mechanism of protection
against radiation
p. 422 item 4227

protective measures in
body irradiation
p. 440 item 4408

radiation hazards in
industry
p. 383 item 3835

radiation physics as
related to protection
and dosimetry
p. 433 item 4330

radiation protection
p. 260 item 2609

radiation protection in
industry
p. 335 item 3354

radiation shielding
p. 433 item 4333

PROTECTION

scintillation-safeguard
for cobalt-60 source
p. 98 item 985

shield for use with
radium gamma rays
p. 367 item 3675

shielding calculations
for gamma rays
p. 433 item 4335

use of oxygen
p. 0 item 7

ventilating the atomic
energy plant
p. 453 item 4535

X-ray radiation exposure
survey
p. 451 item 4511

PROTEINS

a respiration substance
in irradiated protein
p. 377 item 3771

absorption of amino acids
by ultraviolet rays
p. 155 item 1558

action of ionizing
radiations
p. 23 item 239

biological synthesis with
isotopes
p. 402 item 4023

coagulation by ultraviolet
rays
p. 47 item 472

PROTEINS

coagulation of egg
albumin by ultraviolet
rays

p. 71 item 710

effect of gamma rays
on wheat protein

p. 24 item 246

effect of ionizing
radiation on denaturation

p. 128 item 1280, 1282

effect of ionizing radiation
on ribosenucleo-protein fibres

p. 308 item 3085

effect of irradiation

p. 15 item 150
137 1370

effect of radiant energy

p. 257 item 2578

effect of radiation from
a quartz mercury vapor arc

p. 343 item 3433

effect of short wave
radiation

p. 293 item 2938

effect of ultraviolet rays

p 15 item 151
259 2591, 2592
338 3389
339 3390, 3392

effect of X-rays

p. 5 item 59
23 236
308 3086
377 3770, 3772

PROTEINS

formation acetaldehyde

p. 174 item 1741

irradiation by ultraviolet
rays

p. 62 item 624

mechanism of polymerization
by X-rays

p. 62 item 628

new type of X-ray evidence
on molecular structure

p. 303 item 3033

of lymphoid tissue and
their radiation sensitivity

p. 420 item 4209

pharmacological action
on irradiation

p. 176 item 1768

proteolytic cleavage by
irradiation

p. 162 item 1625

splitting of molecules
ultraviolet and alpha rays

p. 451 item 4514

X-ray analysis

p. 48 item 487

PROTON SYNCHROTRON

see: accelerators

PROTONS

accelerations

p. 159 item 1590

bremsstrahlung at 145 mev

p. 308 item 3081

PROTONS

coincidences with gamma
rays

p. 83 item 836

Compton effect and
bremsstrahlung

p. 287 item 2873

cross sections for the
scattering of protons by
protons

p. 280 item 2803

ejected from nuclei by
gamma rays

p. 229 item 2290

elastic scattering by
deuterons

p. 133 item 1333

energy loss of 18-mev
protons in materials

p. 313 item 3134

helix as linear accelerator

p. 68 item 686

high energy proton studies

p. 406 item 4066

407 4079

high-velocity protons by
repeated accelerations

p. 94 item 941

homogeneous source for
biological research

p. 322 item 3228

inelastic scattering

p. 153 item 1536

PROTONS

interaction of 14 mev
neutrons

p. 10 item 108

interpretation of proton-
proton scattering data

p. 184 item 1847

low energy reactions

p. 402 item 4021

90-mev neutron-proton
scattering

p. 370 item 3709

precision reaction

p. 413 item 4135

production of high-speed
protons without high
voltages

p. 223 item 2231

proton bremsstrahlung
at 140 mev

p. 385 item 3854

proton-neutron reactions
in light elements

p. 334 item 3342

proton-proton scattering
at 5 mev

p. 251 item 2511

proton-proton scattering
at 5.86 mev

p. 395 item 3954

proton-proton scattering
in range of 3.4 to 7.5 mev

p. 308 item 3082

PROTONS

range-energy relations
for protons and alpha particles

p. 307 item 3076

range energy studies

p. 403 item 4035

scattering by deuterons

at 7 mev

scattering of gamma rays

p. 313 item 3137

scattering of protons by
protons

p. 294 item 2940

scattering of 31.8 mev protons
by protons

p. 190 item 1907

single scattering of beta
particles by protons

p. 296 item 2960

stopping power for protons
in metals

p. 372 item 3726

synchrocyclotron for 450-
mev protons

p. 12 item 123

van de Graaff accelerator
for 5.5 -mev protons

p. 303 item 3039

PROTOPLASM

action of alpha and beta
rays

p. 119 item 1193

PROTOPLASM

action of alpha, beta and
gamma rays on plant cell

p. 346 item 3463

action of irradiation

p. 164 item 1645

changes in beta-irradiated
nereis eggs

p. 123 item 1239

changes in permeability
by radiation

p. 169 item 1690

effect of beta and gamma
rays

p. 275 item 2756

effect of Schumann rays

p. 47 item 470

influence of ultraviolet
rays

p. 296 item 2962

lethal effects of irradiation

p. 353 item 3534

reactivation of irradiated
escherichia by pyrovate

p. 440 item 4407

sensitization to heat
on irradiation

p. 47 item 473

PROTOZOA

effect of radium

p. 56 item 560

RADIATION

see also: irradiation

radiation

p. 269 item 2699

a new radiation of
unknown origin

p. 97 item 978

absence of penetration
during chemical reactions

p. 52 item 527

action of two radiations
of different specific
ionizations

p. 397 item 3972

action on aqueous solutions

p. 224 item 2243

375 3757

action on bacteria

p. 225 item 2253

action on bacterium coli

p. 236 item 2369

action on living cells

p. 224 item 2244

action on viruses and
bacteria

p. 224 item 2245

analysis of biological
structures

p. 320 item 3207

analyzing by means of
absorption

p. 219 item 2198

RADIATION

angular correlation of
delayed radiation

p. 236 item 2366

applications in food
processing

p. 289 item 2893

artificial production
of a neutral radiation

p. 153 item 1538

bactericidal action

p. 225 item 2252, 2254

biochemical ray reactions

p. 321 item 3219

biological action

p. 277 item 2776

biological action and
time factor

p. 276 item 2763

biological aspects

p. 440 item 4401

biological effects

p. 70 item 708

84 840

103 1039

388 3883

404 4042

biological effects by use
of iodine-131

p. 398 item 3986

biological effects of
pile radiations

p. 168 item 1681

RADIATION

biological effects of
short radiations
p. 275 item 2755

biological effects with
reference to mutation
p. 264 item 2646

biological measurement
p. 275 item 2753

cell permeability and
colloidal changes
p. 354 item 3548

changes in nucleic acids and
hydrolysis products
p. 398 item 3987

chemical actions
p. 390 item 3905

chemical and biological
action
p. 375 item 3758, 3759

chemical changes in
bacterial pigments
p. 1107 item 1076

chemical radiation,
biochemical and chemical effects
p. 112 item 1122

Cherenkov radiation
p. 409 item 4095

correction for collision
loss of particles
p. 187 item 1875

cosmic origin
p. 179 item 1794

RADIATION

cytological effects
p. 316 item 3161

cytological and genetical
effects of combined
radiations
p. 174 item 1748

cytological and histo-
chemical studies
p. 404 item 4044

damage effects
p. 404 item 4049

damage in insulators
p. 288 item 2884

damage, probability
model
p. 298 item 2982

damage studies
p. 423 item 4236

degradation and range
straggling
p. 433 item 4334
detection from a micro-
biological point of view
p. 175 item 1757
effects
p. 406 item 4062

effects in plant nutrition
p. 46 item 466

effects in solids
p. 400 item 4005

effect of chemicals on
radiation damage to
chromosomes

RADIATION

effects of different
radiation levels on fats
and fatty acids
p. 396 item 3965

effect of different radiation
levels on meat, their enzymes
and flavor
p. 396 item 3966

effect of final state
interactions on action
cross sections
p. 373 item 3732

effect of oxygen on a
radioreduction reaction
p. 360 item 3605

effect on bacteria
p. 104 item 1040

effects on bacteria and
molds
p. 411 item 4110

effects on biological
systems
p. 337 item 3372, 3374
401 4013

effect on blood
p. 404 item 4047

effect on chick embryo
p. 99 item 994

effect on enzyme systems
p. 247 item 2475

effect on enzymes
p. 182 item 1821 - 1825

effect on fungi
p. 353 item 3530

RADIATION

effect on galactozymase
formation in yeast
p. 49 item 499

effect on indole solutions
p. 11 item 111

effect on long chain
polymers
p. 67 item 670

effect on materials
p. 9 item 95
331 3319
439 4397

effect on mitosis
p. 62 item 621

effect on organic compounds
p. 58 item 588

effect on plant growth
p. 293 item 2931

effect on plastics
p. 397 item 3979

effect on salamander larvae
p. 420 item 4208

effect on the normal cell
p. 222 item 2226

effect on virus-host cell
relationship
p. 422 item 4225

effect on water and
aqueous solutions
p. 212 item 2122

electronic blanching
p. 246 item 2465

RADIATION

energy range relations
p. 304 item 3048

energy study on biological
action
p. 177 item 1770

energy studies
p. 388 item 3884

exposure in the U. S.
p. 258 item 2586

factors governing
biological action
p. 48 item 480

formation of solid bodies
with radio elements
p. 65 item 659

from atomic nuclei
p. 310 item 3105

fundamentals and applications
to food technology
p. 290 item 2904

general information concerning
public safety
p. 434 item 4348, 4349

genetic and cytological effects
p. 402 item 4024
408 4089

genetic effects
p. 63 item 635
202 2025
330 3304

genetics

RADIATION

hazards
p. 170 item 1700

high energy primary
interactions
p. 406 item 4065

hypothesis of biological
action
p. 202 item 2020

in living matter
p. 261 item 2617

inactivation of bacteriophage
p. 224 item 2248

inactivation of vaccinia
virus
p. 224 item 2249

inactivation of viruses
p. 224 item 2246
225 2250, 2251

induced by alpha particles
in thin films
p. 270 item 2704

influence of nuclear
dimensions due to particle
retardation
p. 313 item 3133

influence on vegetation
p. 346 item 3465

influence on velocity of
sound in gases
p. 214 item 2143, 2144

interaction energies
p. 181 item 1819

RADIATION

interval between departure of
disintegration particle and
gamma radiation

p. 390 item 3908

isotopic radiation and matter

p. 123 item 1230

laws of black radiation

p. 82 item 821

lethal effects

p. 339 item 3396

limits on the target

theory of biological action

p. 293 item 2937

materialization of energy

p. 329 item 3293

measurement

p. 267 item 2679

mechanism of biological action

p. 258 item 2580

320 3203

mutagenic effects of different
types of radiation

p. 418 item 4184

of accelerated electrons

p. 322 item 3223

oxidation-reduction dyes as
indicators

p. 290 item 2907

penetrating power of extensive
shower particles

p. 380 item 3809

RADIATION

penetrating radiations

p. 275 item 2752

penetration

p. 6 item 61

physiological effects

p. 99 item 997

physiological effects
of ultraviolet rays

p. 222 item 2224

photosynthetic processes in
cell-free preparations

p. 435 4359

nuclear reactor types

p. 51 item 510

nuclear power reactor
technology

p. 435 item 4350 SR

nuclear principles

p. 144 item 1442, 1443

nuclear reactor catalog

p. 448 item 4485, 4486

nuclear reactors for
industry and research

p. 260 item 2609

362 3622

plans for five new reactors

p. 0 item 1

problems in operating
a research reactor

p. 449 item 4499

role of multipurpose
reactors

p. 451 item 4513

solution handling system
for a homogeneous reactor

p. 447 item 4471

testing reactor as an
irradiation facility

p. 434 item 4345

the "swimming pool", a
low cost reactor

p. 446 item 4463

REACTORS

theory terms

p. 436 item 4362

transfer function of Argonne
CP-2 reactor

p. 448 item 4482

wanted: an operating
power reactor

p. 452 4529

RESONANCE RADIATION

p. 125 item 1255

RIBOFLAVIN

destruction and losses
during processing of milk
on ultraviolet irradiation

p. 394 item 3948

effect of ultraviolet
irradiation of milk

p. 131 item 1318

RIBONUCLEASE

p. 176 item 1763

ROENTGEN RAYS

see: X-rays

RUBBER

effect of gamma radiation

p. 313 item 3132

RYE

action of X-rays

p. 51 item 514

SACCHAROMYCES

alterations of the budding process
by ultraviolet rays
p. 361 item 3614

disruption of mitochondria by
ultraviolet irradiation
p. 426 item 4264 SR

x-ray inactivation
p. 236 item 2360

SACCHAROSE

inversion by ultraviolet rays
p. 32 item 324

SALAMANDER LARVAE

radiation effects
p. 420 item 4208 SR

SAUSAGES

irradiation with ultraviolet rays
p. 87 item 877

SCATTERING

p. 158 item 1587

abnormal scattering of alpha rays
p. 155 item 1557

alpha-alpha scattering from 12.88
to 21.62 mev
p. 343 item 3438

analysis of seven mev proton-proton
scattering experiments
p. 275 item 2750

and absorption of gamma rays
p. 147 item 1471
p. 274 item 2748

and energy loss of particles in
gases
p. 273 item 2730

angular distribution of neutrons from
various materials
p. 380 item 3807

anomalous scattering of alpha rays
p. 160 item 1602
p. 259 item 2590

SCATTERING

at high energies
p. 140 item 1401

azimuthal distribution of
scattered x-rays
p. 129 item 1298

backscattering of electrons
and positrons
p. 324 item 3243

backscattering of secondary
electrons
p. 172 item 1726

backscattering of gamma rays
p. 433 item 4332 SR

beta rays associated with
scattered x-rays
p. 271 item 2717

coefficients of x-rays
p. 10 item 100
p. 38 item 386
p. 45 item 454
p. 253 item 2534

coefficients of x-rays in
matter
p. 92 item 929

Compton scattering at 1.25 mev.
p. 249 item 2492

Compton's theory of X-ray
scattering
p. 128 item 1284

corpuscular quantum theory
of x-rays scattering
p. 188 item 1882

correction of measurements
of x-ray scattering
p. 154 item 1545

cross sections for the
scattering of protons by protons
p. 280 item 2803

deuteron-proton scattering
at 10 mev.
p. 195 item 1958

SCATTERING

distribution of x-radiation

p. 80 item 808

p. 81 item 811

during radioactive recoil

p. 240 item 2407

elastic scattering of fast neutrons

p. 284 item 2843

electron-electron scattering

p. 21 item 213

p. 276 item 2761

electron-electron scattering at 15.7 mev

p. 322 item 3229

electron-positron scattering

p. 179 item 1790

elementary particle scattering and decay schemes

p. 441 item 4418 SR

emission of delta and beta rays from a metallic film and relation to x-ray scattering theory

p. 329 item 3299

energy dependence of electron backscattering

p. 349 item 3498

energy of x-radiation

p. 22 item 220

estimate of coherent gamma ray scattering

p. 378 item 3788

exact mathematical theory

p. 153 item 1532

SCATTERING

formal theory

p. 136 item 1365

gamma radiation from 2.7 mev neutrons

p. 317 item 3174

gas scattering in the synchrotron

p. 151 item 1510

high energy electron scattering by nuclei

p. 282 item 2829

importance of gas scattering in accelerators

p. 301 item 3018

inelastic scattering of 18.3 mev protons

p. 153 item 1536

inelastic scattering of slow neutrons

p. 276 item 2764

intensities of fluorescent and scattered x-rays

p. 70 item 701

intensity of total x-ray scattering by gases

p. 389 item 3892

internal scattering of beta rays from radium E

p. 187 item 1876

internal scattering of gamma rays

p. 77 item 775

interpretation of electron scattering

p. 317 item 3176

J-phenomena and quantum theory

p. 104 item 1044

SCATTERING

J phenomena and scattering
p. 21 item 215

J phenomenon in x-rays and
application
p. 22 item 223

J transformation of x-rays
p. 22 item 224

large-angle scattering of gamma
rays
p. 285 item 2850

law for short wave gamma rays
p. 252 item 2528

low angle scattering of x-rays
p. 188 item 1889

measurement of change of wave-
length of x-rays
p. 325 item 3259

multiple Compton scattering
p. 118 item 1187

multiple Compton scattering of
gamma rays
p. 274 item 2740

multiple scattering
p. 224 item 2242

multiply scattered gamma rays
p. 338 item 3381

neutron-deuteron scattering at 4.5
and 5.5 mev
p. 372 item 3721

nucleon-nucleon scattering
p. 238 item 2380

90-mev neutron-proton scattering
p. 370 item 3709

SCATTERING

new phenomena in x-ray scattering
p. 149 item 1495

new type of x-ray scattering
p. 155 item 1553

nuclear resonance scattering of
gamma rays
p. 241 item 2413

number of beta rays associated
with scattered x-rays
p. 188 item 1884

of alpha rays
p. 298 item 2986

of alpha and beta rays and the
nature of the atom
p. 311 item 3113

of alpha particles and the law of
force
p. 310 item 3106

of alpha particles
p. 135 item 1356

of alpha particles by gases
p. 312 item 3122

of alpha particles by light nuclei
p. 35 item 355

of alpha particles by matter
p. 135 item 1358

of alpha rays
p. 246 item 2467

of alpha rays. Theory
p. 89 item 894

of beta particles
p. 319 item 3198

SCATTERING

of beta particles by protons
p. 296 item 2960

of beta rays

p. 45 item 458
p. 65 item 650
p. 81 item 819
p. 146 item 1469
p. 149 item 1493
p. 331 item 3315
p. 385 item 3851

of beta rays by electrons
p. 330 item 3309

of beta rays and the number of
electrons

p. 81 item 812

of beta rays from radium
p. 238 item 2385

of beta rays from radium by air
p. 81 item 816

of cobalt-60 gamma rays
p. 347 item 3475

of electrons
p. 15 item 152

of electrons by heavy nuclei
p. 72 item 725
p. 277 item 2773
p. 333 item 3335

of electrons by large angles
p. 277 item 2779

of electrons by matter
p. 386 item 3864

of electrons from high-energy nuclei
p. 174 item 1744, 1745

of gamma radiation
p. 201 item 2015

of gamma radiation by heavy elements
p. 252 item 2527

SCATTERING

of gamma radiation by heavy elements
p. 252 item 2527

SCATTERING

of gamma rays

p. 7 item 71, 73
p. 71 item 715
p. 150 item 1503
p. 183 item 1839
p. 185 item 1852
p. 207 item 2076
p. 217 item 2170
p. 325 item 3254
p. 341 item 3410
p. 424 item 4243 SR

of gamma rays by bound electrons

p. 54 item 540
p. 152 item 1521

of gamma rays by nucleons
p. 313 item 3136

of gamma rays by protons
p. 123 item 1236
p. 313 item 3137

of gamma rays from radium
p. 64 item 641
p. 148 item 1480

of gamma rays from radium C
p. 268 item 2684

of gamma rays in water
p. 98 item 987

of 17-mev gamma rays
p. 343 item 3432

of neutrons

p. 18 item 183
p. 127 item 1272
p. 133 item 1330
p. 378 item 3787

of neutrons and X-rays
p. 205 item 2056

of neutrons by bound protons
p. 231 item 2314

SCATTERING

- of neutrons by molecules
p. 313 item 3138
- of neutrons by protons
p. 221 item 2219
- of 300-mev neutrons
p. 20 item 206
- of nucleons by deuterons
p. 68 item 683
- of particles by atomic nuclei
p. 126 item 1268
- of protons by deuterons
p. 133 item 1333
- of protons by deuterons at 7 mev
p. 264 item 2641
- of protons by protons
p. 294 item 2940
- of 31.8 mev protons by protons
p. 190 item 1907
- of radiation by atoms
p. 211 item 2117
- of relativistic electrons from nuclei
p. 249 item 2499
- of secondary electrons produced by
gamma rays
p. 172 item 1727
- of x-rays
p. 22 item 222
p. 40 item 407
p. 74 item 748
p. 75 item 751
p. 147 item 1470, 1475
p. 178 item 1786
p. 240 item 2403
p. 274 item 2746
p. 306 item 3069
- of x-rays and Bragg's Law
p. 188 item 1881

SCATTERING

- of x- and gamma rays
p. 147 item 1479
- of x- and gamma rays by rings of
electrons
p. 320 item 3200
- of x-rays at small angles
p. 29 item 294
- of x-rays by atoms
p. 284 item 2840
- of x-rays by bound electrons
p. 295 item 2957
- of x-rays by crystals
p. 187 item 1879
p. 188 item 1880
- of x-rays by free electrons
p. 125 item 1253
- of x-rays by gases
p. 389 item 3890
- of x-rays by hydrogen
p. 319 item 3199
- of x-rays by small particles
p. 270 item 2703
- of x-rays by water and aqueous
solutions
p. 144 item 1441
- of x-rays from a hindered rotator
p. 16 item 166
- of x-rays from identical particles
p. 127 item 1271
- of x-rays from protein solutions
p. 303 item 3035
- of x-rays (inhomogeneous)
p. 221 item 2216
- of x-rays of 0.25 to 0.4 A.
p. 18 item 186

SCATTERING

precision particle scattering
 p. 418 item 4188 SR
 p. 422 item 4228 SR

proton-proton scattering at 3.4
 to 7.5 mev
 p. 308 item 3082

proton-proton scattering at 5 mev
 p. 251 item 2511

proton-proton scattering at 5.86 mev
 p. 395 item 3954

proton-proton scattering data
 p. 184 item 1847

quantum scattering of x-rays
 p. 181 item 1813

quantum theory of wave length of
 x-rays
 p. 74 item 749

quantum theory of x-ray scattering
 by light elements
 p. 75 item 752

radiative corrections to Compton
 scattering and bremsstrahlung
 p. 258 item 2583

recoil effect of scattered gamma rays
 p. 331 item 3314

recoil of electrons from scattered
 x-rays
 p. 75 item 756

resonance scattering of alpha rays
 p. 305 item 3058

reconance scattering of x-rays
 p. 102 item 1020

small angle scattering by nitrogen
 p. 382 item 3829

SCATTERING

small angle scattering of electrons
 p. 214 item 2142

small angle scattering of neutrons
 p. 376 item 3763

small angle scattering of x-rays
 p. 97 item 976
 p. 101 item 1017
 p. 102 item 1026
 p. 106 item 1069

theory of beta ray scattering
 p. 377 item 3776

theory of neutron scattering and
 capture
 p. 377 item 3773

theory of slow-neutron scattering
 p. 284 item 2841

theory of multiple scattering
 p. 393 item 3933

theory of x-ray scattering
 p. 158 item 1586

total intensity of x-radiation
 p. 93 item 931

two-body scattering at low energy
 p. 307 item 3077

wave length distribution of
 scattered x-rays
 p. 96 item 962

wave length of scattered x-rays
 p. 214 item 2140

wave statistics treatment of alpha
 scattering
 p. 264 item 2643

x-radiation from different radiators
 p. 81 item 810

STERILIZATION

electron sterilization

p. 67 item 672

electronic pasteurization

p. 227 item 2278

electronic sterilization

p. 4 item 43, 44, and 45

p. 30 item 304

p. 448 item 4480 and 4481

electronic sterilization of food

p. 106 item 1061

electronic and radiobiological
devices

p. 432 item 4321 SR

electronic sterilization progress
report

p. 411 item 4111 SR

electronics for food technology

p. 84 item 841

equipment for cathode ray sterili-
zation

p. 2 item 23

p. 320 item 3201, 3202

evaluation of safety of irradiated
food

p. 226 item 2265

fundamentals of radiation steri-
lization

p. 450 item 4504

fundamentals of x-ray sterilization

p. 450 item 4505

gamma rays for food preservation

p. 2 item 26

industrial methods

p. 1 item 10

irradiation of sausages with ultra-
violet rays

p. 87 item 877

merits of beta and gamma radiations

p. 142 item 1421, 1422

STERILIZATION

method

p. 263 item 2634

new findings in sterilization
of milk

p. 93 item 938

of air by ultraviolet rays

p. 94 item 947

of beer

p. 1 item 14

of biological materials

p. 272 item 2729

of canned foods by irradiations

p. 184 item 1848

of cereal production by irradiati

p. 373 item 3733

of cheddar cheese by irradiation

p. 210 item 2101

of closures and containers by
irradiation

p. 250 item 2500

of drugs

p. 191 item 1917

of food and drugs by cathode rays

p. 180 item 1800, 1801

of food and drugs by electron
beams

p. 58 item 583

of food and drugs by isotopic
sources

p. 80 item 804

of food by cathode rays

p. 432 item 4320 SR

of food by electronic irradiation

p. 453 item 4530, 4531

of food by electronic treatment

p. 165 item 1652

STERILIZATION

- of food by gamma rays
 - p. 416 item 4166 SR
 - p. 418 item 4185 SR
- of food by irradiation is nutritious but costly
 - p. 289 item 2892
- of food in final containers
 - p. 415 item 4155 SR
- of food materials with chlorine and ultraviolet rays
 - p. 361 item 3615
- of food packaging material by gamma rays
 - p. 198 item 1989
- of food using cobalt-60-source
 - p. 415 item 4152 SR
- of food with fission products
 - p. 171 item 1714
- of food with x-ray and cathode rays
 - p. 1 item 18
- of food wrappers by rays
 - p. 199 item 1990
- of fruit juices and sirups with ultraviolet rays
 - p. 99 item 999
- of glass and calomel electrodes
 - p. 404 item 4043 SR
- of liquids by short waves
 - p. 36 item 366
- of liquids with ultraviolet rays
 - p. 296 item 2969
- of meat products with radiation from fission products
 - p. 54 item 548
- of microorganisms by irradiation
 - p. 293 item 2935

STERILIZATION

- of milk by ionization
 - p. 97 item 973
 - p. 98 item 980
- of milk by ultraviolet rays
 - p. 305 item 3055
- of organic tissue by cathode rays
 - p. 251 item 2513
- of packaged foods and drugs by the cathode ray technique
 - p. 363 item 3631
- of pharmaceutical products
 - p. 410 item 4104 SR
- of selected perishable foods by cathode rays
 - p. 291 item 2917
- of sugar liquids with ultraviolet rays
 - p. 105 item 1051, 1052
- of water by irradiation of amoebae
 - p. 65 item 656
- of water by ultraviolet rays
 - p. 189 item 1895
- possible use of fission products
 - p. 163 item 1638
- possible vitamin loss in irradiated food
 - p. 2 item 20
- potentials of soft x-rays
 - p. 450 item 4507
- prevention of flavor and chemical changes in irradiated food and tissues
 - p. 292 item 2921

p. 46 item 469

STERILIZATION

use of van de Graaff accelerators

p. 125 item 1254

x-rays for food

p. 3 item 38

STEROIDS

effect of gamma rays in radi-
ation sterilization

p. 352 item 3527

p. 400 item 4007 SR

STEROLS

irradiation

p. 302 item 3023

physical and biological properties
after irradiation

p. 114 item 1149

"STERN-FOCUSING" PRINCIPLE

p. 79 item 790

STYRENE

polymerization by gamma radiation

p. 399 item 3997 SR

SUCROSE

action of ultraviolet rays

p. 35 item 357

hydrolysis by ultraviolet rays

p. 35 item 358

SUGARS

action of radium rays upon
sterilized solutions

p. 193 item 1937

action of ultraviolet rays on
solutions

p. 85 item 850

effect irradiation on thermophilic
organisms

p. 158 item 1583

photolysis by ultraviolet rays

p. 32 item 325, 326

SUGARS

"Ray Table" unit curbs bacteria
p. 38 item 381

sterilizing of sugar liquids with
ultraviolet rays

p. 105, item 1051, 1052

SYNCHROBETATRON. SYNCHROCYCLOTRON, SYNCHROTRON

see: accelerators

TARTARIC ACID

decomposition by ultraviolet
rays

p. 112 item 1127

TEA

treatment with ultraviolet light

p. 69 item 692

TEMPERATURE

effect on radioactive trans-
formations

p. 111 item 1112

TERMINOLOGY

used in radioactive measurements

p. 453 item 4534

THIOLS

oxidation by ionizing radiations

p. 24 item 240

TIN

effect of neutron irradiation

p. 121 item 1219

TISSUES

chemical changes in mackerel tissues
by ionizing radiation

p. 269 item 2693, 2697

diffusible substance in irradiated
tissues

p. 191 item 1910

effect of cathode rays on amino
acids in fish muscle

p. 289 item 2896

effects of irradiation

p. 413 item 4134 SR

TISSUES

effect of radioactive material
and x-irradiation

p. 408 item 4086 SR

effects of x-rays

p. 233 item 2335

effect of x-rays and ultra-
violet rays

p. 18 item 187

energy dissipation of moving
ions

p. 437 item 4372 SR

influence of cathode rays

p. 278 item 2780

irradiation effects on plant
tissues

p. 425 item 4255 SR

irradiation of mixed tissues

p. 235 item 2352

physical methods of breaking down
cells and tissues

p. 31 item 3100

prevention of chemical changes
in irradiated tissues

p. 292 item 2921

production of radioactivity
by x-rays

p. 247 item 2474

radioactivity induced by
betatron

p. 192 item 1923

sterilization by cathode rays

p. 251 item 2513

use of fission products for
sterilization

p. 414 item 4145 SR

TOBACCO

ultraviolet irradiation

p. 48 item 482

TOBACCO BEETLE

effect of a new form of X-ray
p. 309 item 3092

TOXIC ACTION

ultra violet irradiated
substances
p. 299 item 2993

TOXICITY

action of ultraviolet rays on
toxic characteristics of
bacteria
p. 362 item 3625

biological effectiveness of radiations
as shown by the radiotoxicity of Na-
24
p. 334 item 3345

hazard from inhaled radioactive
matter
p. 422 item 4226 SR

of inhaled or ingested radio-
active products
p. 419 item 4192 SR

of radioactive products
p. 73 item 736

study of toxic changes produced
by body x-irradiation and by
drugs
p. 440 item 4405 SR

toxic effect of irradiation
p. 418 item 4189 SR

TOXINS

effect of x-rays on bacterial
toxins
p. 111 item 1114

influence of medium on inactiv-
ation by x-ray irradiation
p. 111 item 1115

TRADESCANTIA

chromosome aberrations produced
by x-rays
p. 343 item 3437

TRADESCANTIA

effect of irradiation
p. 5 item 54

effects of ultraviolet radi-
ation on gamma induced aberrations
p. 235 item 2353

histological and physiological
effects of irradiation
p. 425 item 4256 SR

structural changes in microspores
by alpha rays
p. 210 item 2104

tolerance to continuous cobalt-
60 gamma rays
p. 336 item 3369

vegetative and floral develop-
ment of irradiated and non-
irradiated tradescantia
p. 401 item 4011 SR

TRICHINA

effect of cobalt-60 irradiation
p. 143 item 1436

TRICHINA LARVAE

effects of x-rays
p. 447 item 4477

TRICHINELLA

biological effects of radiation
p. 8 item 86

effect of x-ray radiation
p. 8 item 85

TRICHINOSIS

irradiation of pork
p. 143 item 1435

prevention by gamma irradiation
p. 447 item 4476

TROCHOTRON

see: Accelerators

TRYPANOSOMES

effect of ultraviolet irradiation
in a fluorescent medium
p. 228 item 2281

TRYPSIN

effect of electrons
p. 35 item 356

effect of radium radiation
p. 182 item 1825

inactivation by ultraviolet
rays
p. 196 item 1964

TRYPTOPHANE

action of cathode rays
p. 289 item 2895

TYROSINE

action of cathode rays
p. 289 item 2895

effects of X-rays
p. 344 item 3448

ULTRASONICS

in food processing
p. 348 item 3488

treatment of milk
p. 451 item 4519

ULTRAVIOLET RAYS

absorption and reflection by
human skin
p. 120 item 1206

absorption by acetone
p. 35 item 351

absorption by acetylene
p. 167 item 1673

absorption by acids of fatty
acids
p. 35 item 350, 352

ULTRAVIOLET RAYS

absorption by alcohol, acids,
ethers, aldehydes, ketones
p. 35 item 353

absorption by amino acids
p. 155 item 1558

absorption by crystalline
p. 134 item 1346

absorption by living cells
p. 110 item 1108

absorption by nucleic acids
p. 74 item 747

absorption by organic substances
p. 199 item 1998
p. 242 item 2428

absorption by radioactive elements
and disintegration products
p. 394 item 3944

absorption in cells
p. 55 item 556

absorption in plastic foils
p. 227 item 2271

absorption of living cells
p. 48 item 481

absorption of polyphenolic
substances from fruits
p. 190 item 1905

ULTRAVIOLET RAYS

absorption spectra of biologically
important compounds

p. 54 item 541

absorption spectra of compounds
derived from cells

p. 171 item 1716

a chemical for measurement

p. 201 item 2014

action in relation to chemical
constitution of media

p. 367 item 3672

action on alcoholic fermentation
and yeast

p. 118 item 1188

action on antigenic, toxic and
immunization characteristics
of bacteria

p. 362 item 3625

action on ascaris eggs

p. 323 item 3235

action on bacteria

p. 57 item 571, 576

p. 133 item 1331

p. 155 item 1555

action on bacteria and absorption
by amino acids

p. 161 item 1611

action on bacteria and technique

p. 242 item 2426 & 2427

action on bacteriophage and viruses

p. 249 item 2498

action on butter

p. 235 item 2357

action on cane sugar solutions

p. 85 item 850

action on dangerous organisms
in brewery

p. 318 item 3189

ULTRAVIOLET RAYS

action on DDT

p. 121 item 1218

action on egg albumin solutions

p. 207 item 2073

action on egg of ascaris
megalocephala (worm)

p. 118 item 1186

action on emulsions

p. 330 item 3306

action on enzyme solutions

p. 265 item 2653

action on enzymes

p. 6 item 69

p. 394 item 3947

action on fermentation and yeast

p. 231 item 2310

action on living organisms

p. 172 item 1729

action on must and wine

p. 280 item 2808

action on organic compounds

p. 32 item 328

action on paratyphoid bacillus

p. 219 item 2190

action on protein solutions

p. 259 item 2591, 2592

p. 338 item 3389

p. 339 item 3390, 3392

action on spores and vegetative
forms

p. 168 item 1684

action on starch

p. 35 item 354

p. 183 item 1838

p. 245 item 2457 & 2458

ULTRAVIOLET RAYS

- action on sucrose
 - p. 35 item 357
- action on vaccine virus
 - p. 139 item 1391
- action on vegetable oils
 - p. 126 item 1267
 - p. 351 item 3518
- action of very short rays on gases
 - p. 227 item 2275
- action on wine
 - p. 167 item 1674
- action on wine in fermentation
 - p. 265 item 2652
- action on yeast-like fungi
 - p. 120 item 1201
 - p. 352 item 3522
- action on yeast sucrase, protease, catalase, lipase, proteinase, amylase and invertase
 - p. 265 item 2654
 - p. 266 item 2661 to 2665
- activation of fats and lipoids
 - p. 329 item 3295
- adaptive enzyme formation in irradiated escherichia coli
 - p. 195 item 1952
- air disinfection
 - p. 306 item 3066
- air irradiation
 - p. 222 item 2222
 - p. 318 item 3183
 - p. 344 item 3445
- sterilization
 - p. 253 item 2539
- transformations of the budding process of saccharomyces
 - p. 361 item 3614

ULTRAVIOLET RAYS

- apparatus for intensifying radiations
 - p. 14 item 145
- apparatus for irradiation of viruses
 - p. 123 item 1233
- arrangements for irradiating foodstuffs
 - p. 226 item 2267
- as accelerators of the velocity of reaction
 - p. 287 item 2871
- bacteria as a source
 - p. 44 item 449
- bacterial action
 - p. 25 item 257
- bacterial action
 - p. 134 item 1347, 1348 & 1350
 - p. 224 item 2247
 - p. 232 item 2329
 - p. 369 item 3694
- bactericidal effect of radiation by mercury lamp
 - p. 209 item 2091
- bactericidal effect on air-borne organisms
 - p. 299 item 2991 & 2992
- bactericidal effect on escherichia coli
 - p. 175 item 1752
- bactericidal effectiveness in terms of energy absorbed by milk.
 - p. 57 item 579
- bactericidal power
 - p. 190 item 1902
- bactericidal properties of irradiated petrolatum
 - p. 323 item 3232

ULTRAVIOLET RAYS

bacteriocidal uses

p. 357 item 3579

bacteriostatique

p. 44 item 441

behavior of bacteriophage in a
fluorescent medium

p. 227 item 2279

behavior of fats and oils

p. 157 item 1578

behavior of vaccine virus on
irradiation in a fluorescent
medium

p. 228 item 2280

biochemical effect

p. 102 item 1023

biochemical reactions

p. 112 item 1126

biological action

p. 166 item 1669

biological applications

p. 236 item 2362

biological effect of fats and
chocolate

p. 302 item 3024

biological measuring of radiation

p. 69 item 691

breakage of chromosomes in
drosophila

p. 258 item 2589

characteristics of induced mutations
in aspergillus

p. 295 item 2951

chemical and biological action

p. 234 item 2346

ultraviolet rays

chemical effect

p. 13 item 135

ULTRAVIOLET RAYS

chemical lability and absorption

p. 167 item 1671

chemical method for standardization

p. 262 item 2628

chemistry of biological after-
effects

p. 183 item 1836

comparison of x-ray and ultra-
violet effects on mutation

p. 340 item 3400

coagulation of egg albumin

p. 71 item 710

coagulation of protein

p. 47 item 472

comparison of action on organisms
with simple and complex reactions

p. 167 item 1670

comparison of methods for
determining intensity

p. 138 item 1386

control of fungi

p. 266 item 2669

decomposition of lactic and
tartaric acids

p. 112 item 1127

denaturation of egg albumin

p. 70 item 709

destruction of bacteria and
molds in meat

p. 30 item 306

destruction of mold spores on
bread

p. 296 item 2965

destruction of riboflavin in
milk during processing on
irradiation

p. 394 item 3948

ULTRAVIOLET RAYS

- destruction of vitamin A
 - p. 68 item 681
 - p. 270 item 2705
- destruction of vitamin A in milk
 - p. 359 item 3597
- destruction of yeast
 - p. 236 item 2363
- differences in absorption
 - p. 166 item 1668
- dispersion of water
 - p. 103 item 1035
- disruption of mitochondria of
saccharomyces
 - p. 426 item 4264 SR
- effect in a fluorescent medium
on trypanosomes, bacteria and
enzymes
 - p. 228 item 2281
- effect of blue and dark light on
reactivation of irradiated microorganisms
 - p. 405 item 4055 SR
- effect of different agents on
irradiated escherichia coli
 - p. 111 item 1116
- effect of light on irradiated
plants
 - p. 25 item 254
- effect of radiation
 - p. 174 item 1749
- effect of radiation and temperature
on fusarium
 - p. 333 item 3333
- effect of sodium azide on radiation
damage
 - p. 31 item 310

ULTRAVIOLET RAYS

- effect of sodium azide on radiation
damage
 - p. 31 item 310
- effect of sub-lethal doses on
bacteria
 - p. 175 item 1753, 1754
- effect of visible light on
recovery of irradiated
streptomyces griseus
 - p. 198 item 1985
- effect on accessory food
substances
 - p. 394 item 3949
 - p. 395 item 3950
- effect on accessory substances
 - p. 339 item 3394
- effect on alkylcoumaric acids
 - p. 345 item 3459
- effects on amino acids,
dipeptides and derivatives
 - p. 239 item 2396
- effect on amoebae in sterili-
zation of water
 - p. 65 item 656
- effect on amylase
 - p. 357 item 3579
- effect on bacteria content of
milk and water
 - p. 368 item 3688
- effect on bacteria in air
 - p. 325 item 3256 & 3258
- effect on bacteria infesting
potato bags
 - p. 342 item 3429
- effect on bacteria in milk
 - p. 18 item 180 & 181

ULTRAVIOLET RAYS

effect on bacteriophage action
against streptococcus lactis
p. 151 item 1511

effect on catalase
p. 325 item 3250

effect on chemical and nutritive
properties of baked products
p. 296 item 2966

effects on cell lipids and their
physiological action
p. 409 item 4093 SR

action on cells
p. 212 item 2121

effect on citric acid in milk
p. 98 item 981

effect on enzymes and viruses
p. 401 item 4018 SR

effect on enzymic reactions.
Diastase
p. 21 item 211

effect on enzymic reactions.
Pepsin.
p. 21 item 210

effect on escherichia coli
p. 175 item 1750

effect on escherichia coli and
its reversal
p. 287 item 2878

effect on eye
p. 57 item 577

effect on fermentation efficiency
of yeast
p. 274 item 2749

effect on flour
p. 95 item 950 to 954

ULTRAVIOLET RAYS

EFFECT ON FOOD PROCESSING AND STORAGE

p. 143 item 1433

effect on gamma-induced aberrations
in chromosomes
p. 235 item 2353

effect on gases
p. 294 item 2944

effect on glomerella
p. 345 item 3453

effect on hemagglutinin and
Newcastle virus
p. 16 item 164

effect on hydrogen and oxygen
p. 20 item 201

effect on influenza virus
p. 351 item 3519

effect on keeping quality of
frozen pork
p. 369 item 3693

effect on keeping qualities of
food
p. 127 item 1275

effects on lemna minor
p. 371 item 3719

effect on living tissues
p. 18 item 187

effect on metabolism
p. 137 item 1379

effect on microorganisms
p. 29 item 291

effect on milk
p. 27 item 274

effect on pathogene germs in
milk
p. 348 item 3481

ULTRAVIOLET RAYS

effect on pepsin

p. 182 item 1822

effect on permeability of yeast

p. 170 item 1708

effect on phosphate turnover of yeast cells

p. 414 item 4143 SR

effect on proteins

p. 15 item 151

p. 137 item 1370

effects on resistance of bacteria to antibiotics

p. 316 item 3163

effect on ribonucleic acid

p. 79 item 792

effect on saccharomyces

p. 274 item 2744

effect on soybean oil

p. 183 item 1830

effects on spores:

p. 99 item 990

effect on spores compared with x-irradiation

p. 124 item 1242

effects on spores of aspergillus niger

p. 394 item 3940

effect on spores of mucoraceae

p. 237 item 2373

effect on various fungi

p. 345 item 3454

effect of viability of spores and decay in cherries

p. 111 item 1113

effect on vitamin A, carotene and riboflavin of milk

p. 131 item 1318

ULTRAVIOLET RAYS

effect on vitamin A of butter

p. 327 item 3279

effects on vitamin B

p. 174 item 1746

p. 419 item 4191 SR

effect on vitamin C in milk

p. 320 item 3206

effect on yeast

p. 50 item 501

p. 392 item 3924

effect on yeast and cell enzymes

p. 5 item 58

effect on yeast cells

p. 90 item 902

effect on yeast culture media

p. 389 item 3898

efficacy in killing bacteria in air

p. 380 item 3806

enriching yeast with vitamin D by irradiation

p. 366 item 3664

esterifications

p. 345 item 3458

excitability of organisms

p. 167 item 1672

extension into x-ray spectrum

p. 348 item 3482

extension of x-ray spectra toward ultraviolet

p. 89 item 897

extreme ultraviolet and very soft x-region

p. 328 item 3282

food irradiation

p. 338 item 3387

ULTRAVIOLET RAYS

for preservation of fish
p. 352 item 3529

for preservation of health and
working capacity
p. 226 item 2266

fungicidal action
p. 132 item 1321
p. 378 item 3784

general effects on organisms
p. 319 item 3191

germicidal action
p. 72 item 728
p. 333 item 3334

growth of T2 virus on killed
host cells
p. 13 item 133

growth, respiration and nucleic
acid synthesis in irradiated
escherichia coli
p. 198 item 1983

heat reactivation of inactivated
bacteria
p. 12 item 128

hydrolysis of sucrose
p. 35 item 358

improvement in streptomycin producing
strains
p. 315 item 3159

in the mill
p. 323 item 3238
inactivation of bacteriophage
p. 219 item 2193 & 2194

inactivation of tobacco mosaic
virus
p. 274 item 2742

inactivation of trypsin and papain
p. 196 item 1964

ULTRAVIOLET RAYS

induction of sterility mutation
in drosophila
p. 106 item 1063

induced mutations
p. 175 item 1755 & 1756

influence of light upon
action on paramecium aurelia
p. 202 item 2026

influence of vitamin C on
enzymes by irradiation
p. 139 item 1390

influence on animals
p. 296 item 2961

influence on antibodies
p. 169 item 1699
p. 287 item 2870

influence on baking value of
flavor and fatty substances
p. 238 item 2388 & 2389
p. 239 item 2390 to 2393

influence on growth of yeasts
and molds
p. 447 item 4475

influence on nutrition
p. 165 item 1659

influence on nutritive value
of hardened oils
p. 365 item 3654

influence on production of pigment
in bacteria
p. 271 item 2711

influence on protein of milk
p. 164 item 1648

influence on protoplasm
p. 296 item 2962

ULTRAVIOLET RAYS

influence on velocity of sound
in gases
p. 214 item 2143 & 2144

inversion of saccharose
p. 32 item 324

ionizing effect of rays from
sunlight
p. 93 item 934

irradiation of air
p. 323 item 3238 & 3239

irradiation of bacteria
p. 36 item 367

irradiation of caverns
p. 362 item 3623

irradiation of cheese molds and
bacteriophage
p. 349 item 3497

irradiation of cocoa and chocolate
p. 211 item 2119
p. 302 item 3025

irradiation of food
p. 73 item 730
p. 159 item 1595
p. 186 item 1868 & 1869
p. 279 item 2793 & 2794

irradiation of liquids
p. 315 item 3158

irradiation of milk
p. 316 item 3168
p. 359 item 3591

irradiation of milk or constituents
p. 349 item 3492 & 3493

irradiation of milk, etc., for vitamin
D production
p. 101 item 1010

irradiation of peanut oil
p. 305 item 3056

irradiation of proteins
p. 62 item 624

ULTRAVIOLET RAYS

irradiation of proteins
p. 62 item 624

irradiation of sausages
p. 87 item 877

irradiation of tobacco
p. 48 item 482

irradiation of vitamin C and
metabolism
p. 192 item 1927

irradiation of wine
p. 239 item 2394

junction between x-ray region
and ultraviolet
p. 89 item 898

killing germs
p. 59 item 598

killing of colon bacilli
p. 392 item 3920

lethal action on pathogenic
bacteria
p. 325 item 3257

lethal effects in irradiation
of milk
p. 349 item 3495

lethal effects on protozoa
p. 127 item 1274

lethal mutation in neurospora
conidia
p. 17 item 170

lethal mutations in drosophila
p. 274 item 2743

lethal mutations produced in
fungal spores
p. 124 item 1241

liberation of bacteriophage
by staphylococci
p. 230 item 2301

ULTRAVIOLET RAYS

light reactivation of inactivated bacteria
p. 271 item 2714

nature of action on bacteria
p. 272 item 2724

measure of intensity from the nitrite formation
p. 138 item 1385

measurement of small intensities
p. 378 item 3785

measurement of the abiotic activity
p. 449 item 4490

measuring the intensity
p. 127 item 1273

mechanism of action
p. 195 item 1954

mechanism of action on the cell
p. 354 item 3549

mechanism of bacteriocidal action
p. 107 item 1071

method for investigating the action of bacteria
p. 245 item 2455

methods of measuring
p. 72 item 727

microscopy of irradiated bacteria and action with bacteriophage
p. 215 item 2150

milk irradiation
p. 315 item 3150

modification of x-ray induced chromosomal rearrangements in drosophila
p. 196 item 1968

mutation in streptomyces and actinomyces flaveolus
p. 198 item 1987 & 1988

ULTRAVIOLET RAYS

new applications
p. 286 item 2865

nitrification
p. 32 item 327

odor control
p. 348 item 3487

phage resistance in escherichia coli
p. 56 item 563

penetrating power of bacteriocidal rays emitted by carbon
p. 369 item 3695

photolysis of sugars, bioses and trioses
p. 32 item 325 & 326

photoreversal of induced effects on echerichia coli
p. 269 item 2690

physical and chemical changes in soybean oil
p. 183 item 1831

physico-chemical nature of biological effects
p. 173 item 1735

physiologic effects
p. 222 item 2224

physiological changes in yeast
p. 13 item 134

product sanitation through air irradiation
p. 245 item 2459

production of phenocopies in aerobacter aerogenes
p. 403 item 4034 SR

production of radiations between ultraviolet and x-region
p. 296 item 2968

ULTRAVIOLET RAYS

protection of butter against
light

p. 318 item 3182

protection of escherichia coli
by carbon monoxide

p. 251 item 2514

radiation

p. 209 item 2090

radiation and metabolism

p. 60 item 606

radiations and life

p. 138 item 1381

radiation effects on living organisms

p. 9 item 92

radiation in the food industry

p. 293 item 2934

"ray table" unit curbs bacteria
on sugar

p. 38 item 381

reaction of individual bacteria

p. 134 item 1349

reactivation of irradiated
bacteriophages

p. 104 item 1042 & 1043

reactivation of sterilized bacteria

p. 259 item 2594

reactivation of ultraviolet in-
activated bacteria

p. 227 item 2272

reactivation of virus depending
on wavelength used for inactivation

p. 123 item 1232

rearrangement of unsaturated acids

p. 346 item 3460

recovery from irradiation in
excherichia coli

p. 303 item 3038

ULTRAVIOLET RAYS

recovery of irradiated arbacia
eggs

p. 41 item 410

recording meter in irradiation
of milk

p. 349 item 3494

reduction of spoilage losses

p. 72 item 726

reflection from snow

p. 211 item 2116

relation of oxygen to reactivation
of bacteria

p. 190 item 1903

relations as germicidal agents

p. 114 item 1145

resistance of bacteria

p. 7 item 75

resistance of bacteriophage

p. 121 item 1210

resistance of individual cells
of same species of microorganisms

p. 27 item 270

resistance of spores and spore-
forming organisms

p. 216 item 2164

respiratory illness

p. 101 item 1015

restauration of viability of
irradiated bacteria

p. 164 item 1646

retention of vitamin C in
canning of fruits and vegetables

p. 240 item 2409

secondary radiation and biological
effects

p. 339 item 3391

ULTRAVIOLET RAYS

sensitizing bacterial spores
to heat

p. 83 item 837

spectrum of ultra radiation

p. 297 item 2978

splitting of protein molecules

p. 451 item 4514

stabilization of albumin during
irradiation of plasma

p. 172 item 1728

stability of vitamin A in butter
fat to radiation

p. 343 item 3436

sterilization

p. 227 item 2270

sterilization of air

p. 94 item 947

sterilization of food materials with
chlorine and ultraviolet rays

p. 361 item 3615

sterilization of fruit juices and
sirups

p. 99 item 999

sterilization of glass and calomel
electrodes

p. 404 item 4043 SR

sterilization of liquids

p. 296 item 2969

sterilization of liquids of low permeability

p. 25 item 256

sterilization of milk

p. 306 item 3055

sterilization of sugar liquids

p. 105 item 1051 and 1052

sterilization of water

p. 189 item 1894

ULTRAVIOLET RAYS

stimulating effect of irradiated
bacterial cells

p. 93 item 931

stimulating effect on recombination in bacterium coli

p. 163 item 1636

stimulation of yeast respiration

p. 138 item 1382

structure of ultra radiation

p. 282 item 2820

survival of bacteria in dust:
bacteriocidal action of irradiation

p. 229 item 2295

temperature coefficient of
coagulations

p. 47 item 471

theory and practice of germ-killing

p. 226 item 2269

toxic action of irradiated milk
and other substances

p. 299 item 2993

treatment of beverages

p. 265 item 2651

treatment of chocolate

p. 273 item 2736

treatment of coffee

p. 199 item 1996

treatment of grapes, bananas,
nuts, etc.

p. 249 item 2497

treatment of ingredients of
jams and jellies

p. 249 item 2496

treatment of oils, fats or
emulsions to produce vitamins
of enzymes

p. 198 item 1982

ULTRAVIOLET RAYS

treatment of orange juice
p. 390 item 3906

treatment of tea
p. 69 item 692

treatment of
vegetable extracts
p. 279 item 2794

ultrament, a paper preventing
ultraviolet rays
p. 239 item 2399

ultraviolet induced mutations in
aspergillus
p. 176 item 1762 a

use against molds in the food industry
p. 315 item 3157

use for improvement of cheese
p. 141 item 1416

use of dairies
p. 58 item 585

use in detection of food substitutes
p. 261 item 2615

use in food and drug inspection
p. 341 item 3415

use in food storage
p. 114 item 1146

use of eosin and fluorescein in water
sterilization
p. 376 item 3766

vitamin content of irradiated olive oil
p. 303 item 3031

vitamin D in irradiated milk
p. 98 item 982
p. 316 item 3167
p. 369 item 3699

ULTRAVIOLET RAYS

variants of streptomyces griseus
by ultraviolet radiations
p. 283 item 2839

velocities of electrons
p. 180 item 1808

velocities of electrons set
free by light
p. 19 item 196

action of ultraviolet rays

p. 249 item 2498

action of ultraviolet rays
in the presence of dyes

p. 139 item 1391

activation effects with
X-rays on tobacco mosaic
virus

p. 196 item 1969

apparatus for ultraviolet
irradiation

p. 123 item 1233

behavior of vaccine virus
on ultraviolet irradiation
in a fluorescent medium

p. 228 item 2280

correlation of radiation
effects with physical and
chemical changes

p. 422 item 4229 SR

423 4231SR

cyclotron bombardement

p. 285 item 2853

direct effect of X-rays and
relation to the target
theory

p. 421 item 4211

effect of deuteron bombarde-
ment on tobacco masaic virus

p. 285 item 2851

effects of radiation on
vaccinia virus

p. 314 item 3147

effect of radiation on
virus-host cell relationship

p. 422 item 4225

VIRUSES

- effect of radium emanation
p. 105 item 1058
- effect of ultraviolet radiation
p. 401 item 4018
- effect of ultraviolet rays on influenza virus
p. 351 item 3519
- effect of ultraviolet rays on Newcastle virus
p. 16 item 164
- effect of X-rays on aphthous virus
p. 43 item 433
- electron bombardement
p. 332 item 3324
- growth on ultraviolet-killed host cells
p. 13 item 133
- inactivation by radiation
p. 5 item 51
- inactivation of tobacco mosaic virus by ultraviolet rays
p. 274 item 2742
- inactivation of vaccinia virus by irradiation
p. 224 item 2249
- influence of host on radiation sensitivity
p. 129 item 1296

VIRUSES

- influence of temperature on activation of a bacterial virus by X-rays
p. 397 item 3975
- interference between inactivated and active bacterial virus
p. 237 item 2370
- ionization effects
p. 6 item 65
- irradiation
p. 444 item 4447 SR
- irradiation by soft X-rays
p. 153 item 1539
- irradiation of plant viruses
p. 104 item 1041
244 2440
- protection against irradiation
p. 421 item 4210
- reactivation depending on wavelength of ultraviolet used for inactivation
p. 123 item 1232
- thermal inactivation of bacterial viruses
p. 285 item 2854

VITAMINS

- action of ionizing radiations on vitamin A
p. 65 item 654

VITAMINS

action of radium emanation
on vitamins in yeast
p. 329 item 3292

changes in vitamin A
under irradiation
p. 68 item 682

content of planktons
after irradiation
p. 310 item 3101

destruction by rays
p. 3 item 32

destruction of vitamin A
by ultraviolet rays
p. 68 item 681
270 2705
359 3597

effect of cathode rays on
ascorbic acid
p. 291 item 2914

effect of electrons on
ascorbic acid and other
vitamins
p. 180 item 1803

effect of gamma rays in
milk
p. 181 item 1814
214 2141

effect of irradiation of
milk on vitamin A
p. 42 item 426
136 1366

effect of irradiation on
vitamin A
p. 384 item 3843

effect of radiations on
vitamin B-12
p. 243 item 2437

VITAMINS

effect of radium emanation
p. 132 item 1322

effect of soft X-rays on
niacin, riboflavin and
ascorbic acid
p. 290 item 2908

effect of ultraviolet
irradiation on vitamin A
in milk
p. 131 item 1318

effect of ultraviolet rays
on vitamin A of butter
p. 327 item 3279

effect of ultraviolet rays
on vitamin B
p. 174 item 1746 SR
419 4191 SR

effect of ultraviolet
rays on vitamin C in milk
p. 320 item 3206

effect of X- and cathode
rays
p. 142 item 1424

effect of X- and cathode
rays on niacin
p. 291 item 2911

effect of X-rays on
ascorbic acid
p. 13 item 131

enriching yeast with
vitamin D by ultraviolet
irradiation
p. 366 item 3664

food irradiation to increase
vitamin content
p. 338 item 3386

VITAMINS

influence of vitamin C
on the inactivation of
enzymes by ultraviolet rays
p. 139 item 1390

irradiated yeast as a
source of vitamin D
p. 20 item 200

irradiation does not destroy
vitamin A or B-1
p. 319 item 3193

irradiation of vitamin D
cereals
p. 154 item 1547

loss in irradiated food
p. 2 item 20
3 32

radar energy for rapid food
cooking and effect on vitamin
content
p. 291 item 2912

radiation-resisting vitamins
p. 180 item 1804

retention in canning of fruits
and vegetables by ultraviolet
irradiation
p. 240 item 2409

stability of vitamin A in
butter fat to ultraviolet
radiation
p. 343 item 3436

treating oils, fats or
emulsions with ultraviolet
rays to produce vitamins
p. 198 item 1982

VITAMINS

ultraviolet irradiation
of milk, etc. for vitamin
D production
p. 101 item 1010

ultraviolet irradiation
of vitamin C and metabolism
p. 192 item 1927

vitamin content of ultra-
violet irradiated olive oil
p. 303 item 3031

vitamins A and B-1 not
destroyed in irradiated
milk
p. 443 item 4439

vitamin D and irradiation
p. 359 item 3594

vitamin D and irradiation
of food
p. 122 item 1221

vitamin D content in
ultraviolet irradiated milk
p. 98 item 982
369 3699

vitamin D in relation to
irradiated food
p. 164 item 1644

vitamin D in ultraviolet
irradiated milk
p. 316 item 3167

vitamin D potency of
germicidal radiation
p. 286 item 2863

WASPS

effect of X-rays
p. 452 item 4525

WASTE

disposal
p. 412 item 4121

in drosophila

p. 276 item 2768

attenuation by X-rays of
virulence of tubercle
bacilli

p. 101 item 1018

attenuation of virulence
of tubercle bacilli

p. 101 item 1018

bacterial action

p. 348 item 3485

bactericidal action

p. 225 item 2252

p. 258 item 2588

p. 278 item 2781

p. 361 item 3618

bactericidal action in the
presence of dyes

p. 179 item 1797

bactericidal fluorescence

p. 269 item 2691

bacteriostatique

p. 44 item 441

basic research with 300 mev
synchrotron

p. 424 item 4241 SR

X-RAYS

beginning of the K and L series

p. 258 item 2587

beta ray analysis

p. 28 item 282

bioelectric potentials as an
index of action

p. 38 item 388

biological action

p. 55 item 558

p. 76 item 763

p. 152 item 1527

p. 193 item 1932

p. 235 item 2355

p. 246 item 2462

p. 268 item 2682

p. 307 item 3070

p. 322 item 3225

p. 388 item 3832

p. 415 item 4154 SR

p. 439 item 4396 SR

biological action a function of
intensity

p. 38 item 389

biological action, increase with
secondary irradiation

p. 109 item 1090

biological action of an inter-
mittent radiation

p. 387 item 3874

biological action of rays of
different lengths

p. 89 item 899

p. 100 item 1001, 1002

biological action, increasing
and limiting

p. 108 item 1089

biological action on barley and
wheat

p. 201 item 2017

X-RAYS

- biological action on phycomyces
p. 125 item 1250, 1251
- biological action. Review
p. 80 item 807
- biological action, sensitization
to rays by thorium salts
p. 108 item 1088
- biological action on substances
associated with X-rays
p. 137 item 1375
- biological effectiveness as
shown by the radiotoxicity of
Na-24
p. 334 item 3345
- biological effectiveness of
200 kv and 23.5 mev radiation
p. 359 item 3592, 3593
- biological effectiveness
of wave lengths
p. 275 item 2754
- biological effects
p. 104 item 1048
- biological effects are nuclear
p. 15 item 158
- biological indifference against
artificial cultures
p. 195 item 1956
- biological effects. Dependence
of emission on structure of
irradiated material
p. 30 item 308
- biological measurement of
gamma rays in X-rays
p. 167 item 1677
- branching sparks on tubes
p. 386 item 3862
- breakdown products of
aminobenzoic acid
p. 430 item 4301 SR

X-RAYS

- broadening of spectrum lines
p. 323 item 3233
- calculating machine for
structure factors
p. 367 item 3673
- calculation of dose
p. 91 item 912
- calculation of penetrations
and distributions
p. 337 item 3377, 3378,
3379
p. 338 item 3380, 3382
- cause of action on cells
p. 95 item 957
- calibrated film badge dosimeter
p. 360 item 3604
- cell division in giant ameba
after X-irradiation
p. 406 item 4064 SR
- change of wave length in
absorbing medium
p. 77 item 778
- change of wave length on
reflection from crystals
p. 188 item 1885
- change in cell and plasma
volumes by body radiation
p. 437 item 4375 SR
- changes in yeast cells
p. 112 item 1128
- checking liquid levels
p. 144 item 1446
- characteristic phenomena in
radiation of edges
p. 220 item 2208, 2209
p. 221 item 2210, 2211
- characteristic radiations
p. 21 item 219

X-RAYS

- characteristic rays excited by beta particles
 - p. 106 item 1064
- characteristic rays from light elements
 - p. 228 item 2283
- characteristic rays of the first element
 - p. 176 item 1767
- characteristic rays produced by cathode rays
 - p. 26 item 266
- characteristic rays produced by protons 1.7 to 3.0 mev energy
 - p. 229 item 2292
- characteristics
 - p. 373 item 3736
- chemical action on non-aqueous solution
 - p. 52 item 522
- chemical action on nucleic acids
 - p. 319 item 3195, 3197
- chemical and biological effects
 - p. 106 item 1067
- chemical and nutritional aspects of radiation injury
 - p. 398 item 3981 SR
- chemical determination of dosage
 - p. 327 item 3277
- chemical effects
 - p. 154 item 1549
 - p. 327 item 3277
- chemical effects and energy relations
 - p. 70 item 704
 - p. 71 item 711

X-RAYS

- chemical reactions and method for studying them
 - p. 372 item 3729
- chemical reactions under influence of X-rays
 - p. 280 item 2805
- chemical studies
 - p. 228 item 2282
- chromosomal aberrations
 - p. 316 item 3162
- chromosome aberrations in drosophila
 - p. 392 item 3929
- chromosome aberrations in tradescantia
 - p. 343 item 3437
- chromosome breaks in drosophila
 - p. 236 item 2368
- coefficient of Diffusion by organic substances
 - p. 154 item 1541
- combined effects of total body X-irradiation
 - p. 441 item 4410 SR
- combined with sulfanilamide. Action on bacteria
 - p. 122 item 1225
- compact source
 - p. 2 item 21
- comparative investigations on effects following irradiation in tissue cultures
 - p. 134 item 1340
- comparative studies of biological effects of X-ray, neutron and other irradiations
 - p. 150 item 1501
- comparison of effects of 200-kv 700-kv and gamma rays
 - p. 116 item 1160

X-RAYS

comparison of 700,000 volt
X-rays with gamma rays
p. 116 item 1161

comparison of effects of
X-rays and neutrons on barley
seeds
p. 400 item 4000 SR

comparison of effects of
X-rays, neutrons and mustard
compounds on corn seedling
p. 409 item 4091 SR

comparison of heat and X-ray
effects on cereal seeds
p. 333 item 3336

comparison of sensitivity to
X-rays and nitrogen mustard
of wasp
p. 381 item 3819

comparison of X- and gamma
ray dosage
p. 354 item 3543

comparison of X-ray and ultra-
violet effects on mutation
p. 340 item 3400

comparison of X- and gamma
ionization
p. 113 item 1137

complex X-ray characteristic
spectra
p. 314 item 3144

Compton effect
p. 234 item 2348

Compton effect and measurement
p. 141 item 1412

Compton effect with hard rays
p. 374 item 3745

X-RAYS

Compton's theory of scattering
p. 128 item 1284

conditions of the biological
action
p. 281 item 2814, 2815

continuous spectra from thick
targets
p. 203 item 2039

continuous spectrum and Planck's
radiation
p. 242 item 2425

continuous spectrum with various
discharge frequencies
p. 195 item 1957

conversion of gamma and X-rays
from radium D
p. 11 item 119

corpuscular hypothesis of gamma,
X- and beta rays
p. 49 item 491

corpuscular quantum theory
p. 188 item 1882

correction of measurements of
scattering
p. 154 item 1545

crossing over in drosophila
p. 226 item 2261, 2262

crystal space-lattice
p. 364 item 3647

cysteine protection against
irradiation
p. 277 item 2777

cytogenetic effects compared
with neutron effects
p. 138 item 1384

X-RAYS

cytological effects of X-
radiation and Colchicine combined
p. 403 item 4039 SR

cytological effects with or
without cholchicine
p. 318 item 3181

deamination of amino acids
p. 344 item 3443

deamination of nitrogenous
compounds
p. 86 item 869

deamination of serine solutions
p. 86 item 863

decomposition of hydrogen
peroxide
p. 226 item 2263

degradation of energy in liquids
p. 187 item 1871

denaturation of X-rayed egg
albumin
p. 127 item 1279

dependence of intensity on
voltage
p. 348 item 3483

depth dose for 5, 10, 15 and
20-mv rays
p. 207 item 2070

depth dose measurements
p. 48 item 485

depth dose studies with 20-100 mev
p. 67 item 674

detection of diffusion
p. 81 item 813

X-RAYS

determination of absolute
intensities
p. 393 item 3939

determination of particle size
p. 332 item 3329

development of
bacteriophage in inactivated
bacteria
p. 214 item 2148, 2149

deviation from the surface of a
substance and the effect of a
slit
p. 388 item 3880

deviations in ionization
measurements
p. 338 item 3383

diffraction
p. 328 item 3280
p. 335 item 3357

diffraction and reflection
p. 52 item 525, 526

diffraction by liquid oxygen
p. 326 item 3260

diffraction by plane gratings
p. 288 item 2889

diffraction by triethanolamine
laurate
p. 244 item 2448

diffraction by smectic
substances
p. 52 item 528

diffraction fringes from single
slits
p. 371 item 3712

X-RAYS

diffraction in liquids

p. 197 item 1976

p. 345 item 3457

diffraction in liquids
and solutions

p. 288 item 2888

diffraction in liquids,
fluid crystals and amorphous
solids

p. 294 item 2942

diffraction in long-chain
liquids

p. 372 item 3724

diffraction in various
substances

p. 357 item 3572

diffraction of liquid films

p. 217 item 2179

diffraction of organic
substances

p. 352 item 3521

diffraction pattern given
by bacterial flagella

p. 375 item 3750

diffraction patterns of
mixtures

p. 73 item 738

diffraction study of
bacterial flagella

p. 16 item 160

diffuse scattering

p. 205 item 2056

diffuse scattering by
crystals

p. 187 item 1879

p. 188 item 1880

X-RAYS

diffusion and the Bragg Law

p. 387 item 3879

direct effect on bacterial
viruses and relation to the
target theory

p. 421 item 4211 SR

discussion on soft rays

p. 177 item 1772

dispersion

p. 92 item 924

dissociation of staphylococci

p. 156 item 1562, 1563
1564

distribution and intensity of
70-mev rays

p. 20 item 205

distribution of energy in
spectrum

p. 30 item 302

distribution of scattered
radiation

p. 385 item 3852

distribution of scattered rays

p. 129 item 1298

distribution of secondary rays

p. 22 item 221

disturbance of nucleic acid
metabolism

p. 258 item 2582

disymmetrical distribution of
secondary rays

p. 80 item 809

dosage determinations on
different 400 kv generators

p. 139 item 1394

X-RAYS

dose distribution measurement
of 25 mev rays

p. 222 item 2221

dose estimates in biological
irradiated objects

p. 243 item 2430

dosimeters

p. 139 item 1393

dosimetry

p. 29 item 296

p. 273 item 2731

dosimetry with solid
substances

p. 53 item 537

-rays

effect of an electric field on the
diffraction pattern of a liquid
p. 248 item 2489

effect of biological factors on
survival curves in paramecium
caudatum
p. 18 item 185

effect of certain rays on mobility
of escherichia coli
p. 334 item 3340

effect of chemical combination on
emission lines
p. 334 item 3346

effect of chromate solution
p. 128 item 1285

effect of irradiated food
on mice
p. 267 item 2675

effect of irradiated sea water
on sea urchin
p. 445 item 4459
p. 446 item 4460

effect of magnetic field on
absorption
p. 28 item 283

effect of magnetization on opacity
of iron to X-rays
p. 124 item 1244

effect of oxygen on inactivation
of bacteriophage
p. 171 item 1710

effect of oxygen on mutations in
drosophila
p. 20 item 203
p. 437 item 4377 SR

effect of oxygen on mutation in
Escherichia coli
p. 12 item 127

X-rays

effect of oxygen on X-ray
sensitivity of cells
p. 176 item 1762

effect of oxygen tension on
sensitivity of escherichia coli
p. 176 item 1761, 1762

effect of oxygen tension on
X-ray sensitivity of mutation
p. 176 item 1760

effect of rays at 50 kv on
bacteria
p. 126 item 1266

effect of rays of different
quality on biological objects
p. 259 item 2598

effect of rays of different wave
lengths on a colloidal suspension
p. 100 item 1004

effect of "super-soft" rays on
bacteria
p. 317 item 3170

effect of temperature on ab-
sorption
p. 296 item 2963

effect of temperature on dros-
ophila during radiation
p. 203 item 2030

effect of temperature on trans-
locations in drosophila
p. 255 item 2550

effect of temperatures on induced
mutation
p. 202 item 2029

effect of total body irradiation
on some enzymes
p. 307 item 3078

X-ray

effect of tube size on output
of synchrotron

p. 107 item 1079

effect of 2 megavolts on yeast

p. 104 item 1047

effects of X-radiation from the
rear of the anticathode

p. 157 item 1579

effect of absorption of glycerides

p. 426 item 4263

effect on acetylcholine solutions
showing protection phenomena found
for enzymes

p. 85 item 859

effect on acrylonitrile solutions

p. 85 item 852

effect on adsorption

p. 160 item 1606

effect on amino acid oxidase

p. 86 item 861

effect on aminobenzoic acid

p. 355 item 3550

effect on aphthous virus

p. 43 item 433

effect on arbacia eggs

p. 167 item 1678

effects on arginase

p. 451 item 4517

effect on ascaridia galli

p. 18 item 182

effect on ascorbic acid

p. 13 item 131

effect on bacillus subtilis

p. 38 item 383

X-rays

effect on bacteria

p. 69 item 699

p. 190 item 1909

p. 206 item 2060

p. 257 item 2573

p. 302 item 3026, 3027

p. 387 item 3875

effects on bacteria (bibliography)

p. 304 item 3044

p. 398 item 3984 SR

effect on bacteria infesting
potato bags

p. 342 item 3429

effect on bacteria count of
ground meat

p. 289 item 2897

p. 415 item 4156 SR

effect on bacteria growth and
phage production

p. 228 item 2285

effects on bacterial toxemia

p. 37 item 370

effect on bacteriophage

p. 199 item 1992

effect on bacteriophage and
bacteria

p. 28 item 288

effect on biologically active
compounds

p. 86 item 860

effect on catalase

p. 376 item 3769

effect on cell division

p. 7 item 76

effect on cell metabolism

p. 130 item 1301

X-rays

effect on cell nucleus
p. 390 item 3902

effect on cell structure and
growth
p. 69 item 697

effects on cells in vitro
p. 298 item 2983

effect on cellular division
p. 170 item 1703

effect on cereal seeds
p. 4 item 40

effect on chemical reactions
p. 272 item 2728

effect on chloroforms and
similar bonds
p. 155 item 1552

effects on chromosomes
p. 44 item 444

effect on colloidal carbon
p. 82 item 820

effect on cytochrom C
p. 23 item 237
p. 407 item 4071 SR

effect on diseases of bacterial
origin
p. 199 item 1991

effect on drosophila
p. 5 item 55

effect on eberthella typhosa
p. 146 item 1465

effect on enzyme action
p. 299 item 2995

effect on enzyme catalase in peas
p. 450 item 4506

effects on enzyme systems of tissues
p. 120 item 1209

X-rays

effect on enzymes
p. 86 item 862
p. 182 item 1821-1825

effect on exhalation of
carbon dioxide
p. 170 item 1704

effect on fat balance, lipids
and vitamins
p. 76 item 761

effect on fermentation of glucose
p. 326 item 3267

effect on fibrinogen
p. 448 item 4489

effect on formation of formic
hydrogenlyase in escherichia
coli
p. 36 item 362
p. 436 item 4369 SR

effect on formation of lactase
in escherichia coli
p. 393 item 3931

effect on glucose
p. 176 item 1769

effects on growth of potatoes
p. 337 item 3371

effect on habrobracon
p. 12 item 122
p. 69 item 693
p. 348 item 3486

effect on hemolysis
p. 77 item 777

effects on histamine and bac-
terial vaccine
p. 325 item 3253

effect on human erythrocytes
p. 438 item 4388 SR

effect on incorporation of
carbon-14 into nucleic acid
p. 170 item 1701

X-rays

effect on influenza virus in eggs

p. 41 item 412

effect on infusoria

p. 18 item 189

effect on Leishmania

p. 119 item 1195

effect on living cell

p. 237 item 2372

effects on living cells and tissues

p. 233 item 2335

effect on living tissues

p. 18 item 187

effect on malaria parasites

p. 30 item 305

effect on matter

p. 138 item 1387

effect on metabolism of phosphorus containing compounds

p. 397 item 3973 SR

effect on microbes

p. 228 item 2284

effect on microsporium audouini

p. 234 item 2340

effect on migration velocity, viability and pH of escherichia coli

p. 101 item 1016

effects on mitosis

p. 347 item 3470

effect on mosquitos

p. 440 item 4403 SR

effects on mutations in drosophila

p. 162 item 1622

effect on new tissue

p. 408 item 4086 SR

X-rays

effect on niacin

p. 291 item 2911

effect on niacin, riboflavin and ascorbic acid

p. 290 item 2908

effect on nuclease of tetrahymena

p. 107 item 1073

effect on nucleic acid and protein synthesis

p. 5 item 59

effect on nucleic acids in liver

p. 276 item 2762

effect on nucleus and cytoplasm in comparison with effect of radium

p. 298 item 2988

effect on organic compounds

p. 404 item 4046 SR

effect on oxygen uptake in eggs

p. 152 item 1520

effect on pandorina colonies

p. 158 item 1581

effect on papain

p. 442 item 4425 SR

effect on permeability of yeast

p. 170 item 1708

effect on phosphorus metabolism in spleen mitochondria

p. 246 item 2464

effect on plastics

p. 91 item 911, 914

effects on polypoid series of yeast cultures

p. 426 item 4265 SR

Rays

effect on proteins

p. 23 item 236
p. 339 item 3390
p. 377 item 3770, 3772

effects on proteins, molecules and micro-organisms

p. 308 item 3086

effect on proteolytic processes

p. 134 item 1344

effects on reproduction of fowl

p. 430 item 4306 SR

effect on respiration of bacterial cells

p. 436 item 4368 SR

effect on riboflavin and carotene

p. 142 item 1424

effect on rickettsia Mooseri in eggs

p. 151 item 1519

effects on size of yeast cells

p. 47 item 478

effect on single-celled organisms

p. 206 item 2061

effects on sodium thymus nucleate and nucleic acid

p. 353 item 3532, 3533

effect on solutions of sodium thymonucleate

p. 59 item 596

effect on spores compared with ultraviolet irradiation

p. 124 item 1242

effect on spores of mucoraceae

p. 237 item 2373

effect on staphylococcus aureus and microsporon audouini

p. 33 item 330

X-rays

effect on survival of cells

p. 320 item 3204

effect on synthesis of fatty acids in bone marrow homogenates

p. 11 item 116

effect of temperature on re- flection

p. 37 item 379

effect on tobacco or cigaret beetle using a new form of X-ray

p. 309 item 3092

effect on tradescantia microspores

p. 91 item 919

effects on trichina larvae

p. 447 item 4477

effect on trichinella spiralis

p. 8 item 85

effect on trypanosoma cruzi

p. 111 item 1110

effect on trypanosomes

p. 158 item 1580

effect on tubercle bacilli

p. 156 item 1561

p. 217 item 2172

effect on turnover of phos- phatides

p. 170 item 1702

effect on typhus bacilli

p. 124 item 1243

effects on tyrosine and cystine

p. 344 item 3448

effects on urease and catalase

p. 365 item 3651

effects on water

p. 43 item 430, 435-437

X-rays

effect on water and ice
p. 155 item 1550

effect on wheat seeds
p. 30 item 303

effect on yeast
p. 392 item 3924
p. 394 item 3945

effect on yeast cells of different
ploidy
p. 262 item 2620

effect on yeast fermentation
p. 152 item 1529

electrometric measurement of
energy
p. 372 item 3728

electro micrographs of irradiated
escherichia cells
p. 107 item 1075

electron emission from various
substances
p. 30 item 309

electron transitions in spectra
p. 40 item 402

electronic exchanges in water
p. 234 item 2345

electrons
p. 379 item 3793

emission and absorption of gas
residues in tubes
p. 61 item 619

emission and chemical bond
p. 115 item 1150

emission law for homogeneous rays
p. 220 item 2206

emission of delta and beta rays
from a metallic film and relation
to X-ray scattering theory
p. 329 item 3299

X-rays

emission quanta of characteristic
rays
p. 374 item 3741, 3742

energy
p. 26 item 265
p. 356 item 3560

energy and ionizing action at
different wave lengths
p. 213 item 2139

energy balance for absorption
p. 45 item 455

energy characteristic of the
X-levels
p. 62 item 627

energy consumption of ioniza-
tion of air
p. 150 item 1508

energy distribution
p. 74 item 743

energy levels by the Fermi-
Dirac theory
p. 301 item 3015

energy measurements
p. 309 item 3091
p. 386 item 3863

energy measurements with
X-rays
p. 203 item 2037

energy of scattered radiation
p. 22 item 220

energy relations with beta rays
p. 147 item 1477

energy spectrum from a 70-mev
synchrotron
p. 248 item 2486

energy transformations
p. 49 item 494

X-rays
equipment for biological work
p. 54 item 542

evaluation of microradiography
p. 50 item 508

evidence in atoms and solid
bodies
p. 104 item 1045

evidence of J-transformation
p. 201 item 2018
p. 328 item 3284

examination of bacteria
p. 125 item 1256

exceptional X-ray dose-mutation
relationship
p. 268 item 2687

excitation of bacterial fluorescence
p. 278 item 2785

excitation of nuclei
p. 119 item 1196

excitation of soft rays
p. 300 item 3008

experiments in barley
p. 237 item 2379

experiments on velocity
p. 126 item 1269

experiments with very hard rays
p. 95 item 959

explanation of tertiary line
spectra
p. 373 item 3739

extension into ultraviolet
spectrum
p. 348 item 3482

X-rays
extension of spectra toward
ultraviolet
p. 89 item 897

extreme ultraviolet and very
soft X-region
p. 328 item 3282

eye color mutation in wasp
p. 381 item 3818

X-RAYS

factors influencing
biological effects
p. 442 item 4426

fatigue effect in production
of secondary radiation
p. 66 item 666

fine structure of spectra
p. 335 item 3355, 3356

fission product for food
preservation
p. 408 item 4085

fluorescence and quantum
theory
p. 21 item 217

fluorescent rays of radium B
and C
p. 363 item 3636

forbidden lines
p. 196 item 1965

form of spots in interference
patterns
p. 221 item 2217

formation and decomposition
of peroxide
p. 105 item 1059

formation of phosphate esters
by irradiated nucleic acids
p. 319 item 3194

frequency and quanten hypotesis
p. 394 item 3946

X-RAYS

fringe system
p. 22 item 225

from radioactive sources
p. 106 item 1065

Geiger Counter as dosimeter
p. 132 item 1320

general action
p. 387 item 3876

generation of soft rays
p. 93 item 932, 933

genesis and absorption
p. 358 item 3583

genetic changes in
drosophila
p. 370 item 3706
392 3928

"green fluorescence" of
tubes
p. 184 item 1846

growth factor requirements in
bacteria
p. 150 item 1506

haemolysis and fixation
of erythrocytes
p. 158 item 1582

hard rays
p. 77 item 772

heat and X-rays effects
on cereal seeds
p. 431 item 4318

X-RAYS

high voltage experiments
p. 45 item 452

history

342 item 3423

history of dosimetry

293 item 2933

identification of higher fatty acids

p. 260 item 2608

illumination of eggs

p. 220 item 2205

improvement in streptomycin-producing strains

p. 315 item 3159

inability to decompose water

p. 128 item 1286

inactivation of bacteriophage

p. 237 item 2371

inactivation of bacteriophage and catalase

p. 153 item 1537

inactivation of enzymes

p. 153 item 1538

inactivation of enzyme substrates

p. 247 item 2476

inactivation of peptidase

p. 176 item 1763

X-RAYS

inactivation of ribonuclease

p. 176 item 1763

inactivation of saccharomyces

p. 236 item 2360

inactivation of toxic bacterial filtrates

p. 62 item 623

increased bactericidal effect of inorganic compounds

p. 270 item 2706

independence of absorption from temperature

p. 26 item 264

induction of cell division

p. 167 item 1675

induction of mutation by a 23-mev betatron

p. 297 item 2977

industrial applications of sterilization

p. 450 item 4505

influence of medium on inactivation of tetanus toxin

p. 111 item 1115

influence of nuclear size on structure

p. 316 item 3165

X-RAYS

influence of temperature on
activation of virus
p. 397 item 3975

influence of temperature on
biological action
p. 100 item 1000

influence of temperature on
sensitivity of yeast
p. 389 item 3896

influence of temperature upon the
interference phenomena
p. 221 item 2214, 2215

influence of wave length on genetic
effects
p. 128 item 1287

influence on bacterial
agglutination
p. 72 item 724

influence on field bean seeds
and development of plants
p. 281 item 2819

influence on isolated cell
nuclei
p. 112 item 1123

influence on microorganisms
p. 309 item 3090

influence on nitrogen fixation
by azotobacter
p. 379 item 3791

influence on "protective enzymes"
of Abderhalden
p. 197 item 1979

X-RAYS

influence on recessive
lethals in drosophila
p. 196 item 1967

influence on the conden-
sation of water vapor
p. 347 item 3477

influence on the disrup-
tive discharge
p. 159 item 1593

influence on the vegetative
system
p. 307 item 3079

influence on yeast cells
p. 112 item 1124

influence on velocity
of sound in gases
p. 214 item 2143, 2144

inhibition of enzymes
p. 24 item 241

inner conversion in
spectra
p. 353 item 3536

intensities
p. 235 item 2351

intensities in spectra
p. 377 item 3774

intensities of fluorescent
and scattered rays
p. 70 item 701

intensities of X-rays lines
p. 179 item 1795

X-RAYS

intensity and hardness
p. 212 item 2128

intensity at upper
frequency limit
p. 28 item 284

intensity measurements
p. 8 item 81

intensity measurements on
Compton effect
p. 367 item 3676

intensity of reflection
p. 162 item 1629

intensity of secondary
radiations
p. 66 item 668, 669

intensity of spectra
p. 374 item 3743

intensity of spectral lines
p. 201 item 2016

intensity of total scattering
by gases
p. 389 item 3892

intercellular growth of
bacteriophage by irradiation
p. 218 item 2187

interference
p. 391 item 3915

interference and crystal
structure
p. 141 item 1413

X-RAYS

interference and
diffraction phenomena
p. 198 item 1980

interference and heat
motion
p. 92 item 925

interference phenomena
p. 129 item 1297
130 1300

international comparison
of standards
p. 354 item 3542

investigation of biological
effects
p. 160 item 1603

investigation of fatty
acids
p. 137 item 1377
264 2644

investigations at high
pressures
p. 73 item 737

investigations by the
cloud method
p. 384 item 3844

ion concentration and
biological effectiveness
p. 395 item 3956

ionization by X-rays
p. 225 item 2258

ionization crossing the
walls of a small sphere
p. 264 item 2648

X-RAYS

ionization in various carbon compounds

p. 259 item 2597

ionization of gases

p. 50 item 509

319 3192

ionization of heavy gases

p. 26 item 267

ionization of hydrogen

p. 326 item 3262

ionization of liquids

p. 354 item 3544

ionizing potential of an X-ray tube

p. 102 item 1021

irradiated milk stays fresh

p. 445 item 4456

irradiation of biological materials

p. 363 item 3630

irradiation of cellulose acetate

p. 386 item 3866

irradiation of cysteine and glutathione

p. 86 item 864

irradiation of milk

p. 390 item 3900

irradiation of neurospora crassa

p. 315 item 3154

X-RAYS

irradiation of polystyrene, polythene and paraffin wax

p. 386 item 3865

irradiation of viruses

p. 153 item 1539

J-phenomena

p. 21 item 214, 215

J-phenomena and quantum theory of scattering

p. 104 item 1044

J-phenomenon and application

p. 22 item 223

J-transformation

p. 22 item 224

junction between X-ray region and ultraviolet

p. 89 item 898

killing of certain bacteria

p. 392 item 3922

killing of colon bacilli

p. 392 item 3921

killing of drosophila eggs

365 item 3657, 3658
3659

law of biologic action

154 item 1542

laws of absorption

p. 94 item 949

lethal action on micro-organisms

p. 57 item 578

X-RAYS

lethal and sublethal
effects on effects on
escherichia coli
p. 305 item 3045

lethal effects on bacillus
coli
p. 72 item 720

lethal effects on colpidium
colpoda
p. 70 item 707

lethal effects on escherichia
coli
p. 99 item 996
404 4040

lethal effects on planktons
p. 439 item 4399

lethal injuries to drosophila
eggs
p. 118 item 1185

lethal mutations in
drosophila
p. 347 item 3478

lethal mutations produced
in fungal spores
p. 124 item 1241

lines of modified frequency
according to ray
p. 364 item 3648

long ray pulses from
betatron
p. 197 item 1973

X-RAYS

loss of chromosomes in
drosophila
p. 114 item 1148

low angle scattering
p. 188 item 1889

lower biological activity
of rays freed of electrons
p. 364 item 3649

low-velocity electrons
p. 330 item 3300

maximum frequency at
constant voltages between
30,000 to 100,000
p. 181 item 1811

mean depth of rays
originating in silver
target
p. 90 item 900

mechanic of biological
action
p. 281 item 2816

mechanism of action on
enzymes
p. 124 item 1247

mechanism of effect on
bacterial toxins
p. 111 item 1114

measurement from radium
elements
p. 244 item 2442

X-RAYS

measurement of absolute intensity

p. 343 item 3434

measurement of absorption by
matter

p. 96 item 968

measurement of absorption
coefficient

p. 96 item 969

measurement of beta rays
associated with X-rays

p. 75 item 757

measurement of change of
wavelength of scattered rays

p. 325 item 3259

measurement of depth

p. 23 item 230

measurement of depth dose

p. 40 item 400

measurement of emission wave
lengths

p. 387 item 3873

measurement of energy

p. 82 item 822, 823

measurement of hardness

p. 205 item 2059

measurement of intensity

p. 71 item 716

103 1038

measurement of intensity by
ionization method

p. 316 item 3166

X-RAYS

measurement of intensity
of 0.14 to 1.0 A. rays

p. 9 item 98

measurement of ionizing
radiation

p. 68 item 688

measurement of low-dose
rate rays in terms of the
r-unit

p. 358 item 3587

measurement of low-voltage
intensities

p. 354 item 3546

measurement of protection

p. 293 item 2939

measurement of radiation
over wide energy range

p. 26 item 263

measurement of X- and
gamma rays in Roentgens

p. 222 item 2223

measurement with liquid
ionization chambers

p. 354 item 3540

measurements in range of
0.7 to 2.5 million volt

p. 16 item 168

measuring the production
in the range of 0.8 to
2.0 million volt

p. 16 item 167

metabolic effects of
therapeutic doses

p. 258 item 2581

X-RAYS

microbicidal action
p. 218 item 2182

microscopy of the cell's
response to lethal irradiation
p. 259 item 2596

mode of action on bacteriophage
p. 177 item 1775

modification of action on
paramecium
p. 437 item 4371

modification of radiation
damage in bacteria
p. 175 item 1759

modification of X-ray
induced mutation in fungi
p. 175 item 1758

mortality of irradiated
bacteria
p. 215 item 2159, 2160
p. 216 2161
multiple ionization and
the absorption
p. 301 item 3011

multiple ionization of
light atoms
p. 364 item 3646

mutant strains of
escherichia coli
p. 25 item 252

mutants
p. 237 item 2375

X-RAYS

mutation in *streptomyces*
and *actinomyces flaveolus*
p. 198 item 1987,
1988

mutation of *phytomonas*
p. 230 item 2303

mutations in bacteria
p. 97 item 970

mutations in *drosophila*
p. 370 item 3707

X-RAYS

natural breadth of
X-ray lines
p. 107 item 1070

natural spectrum of
radium B
p. 312 item 3127

nature
p. 181 item 1817

nature of soft rays
p. 89 item 896

nature of the maxima
in the interference
p. 391 item 3916

negative result on
reflection
p. 66 item 665

new effect
p. 294 item 2941

new effect on bacter-
iophage
p. 11 item 114

new form of X-ray used in
experiments with tobacco
beetle
p. 309 item 3092

new forms of eutorulpsis
dubia by radiation
p. 77 item 776

new method for study
p. 305 item 3053

new phenomena in scattering
p. 149 item 1495

new secondary radiation
p. 45 item 456, 457

new type of evidence on
molecular structure of
globular protein
p. 303 item 3033

X-RAYS

new type of scattering
p. 155 item 1553

new X-ray non-diagram line
p. 306 item 3068

nondiagram lines
p. 94 item 945

nuclear cross sections from
Berkeley synchrotron
p. 165 item 1651

nuclear excitation by means
of X-rays
p. 107 item 1078

number emitted from radium B
and C
p. 210 item 2106

number of beta rays associated
with scattered X-rays
p. 188 item 1884

origin of biological effect in
single-celled organisms
p. 319 item 3190

origin of gamma ray spectra
and the X-ray series
p. 350 item 3508

origin of the spark lines in
spectra
p. 295 item 2958

O-series of X-ray spectra
p. 328 item 3287

outer energy levels
p. 65 item 655

oxidation of ferrocyanide,
arsenite and selenite
p. 128 item 1289

oxidation of ferrous ion to
ferric ion
p. 129 item 1291

X-RAYS

oxidation of nitrite to nitrate
ion
p. 129 item 1290

oxidation of non-saturated
fatty acids
p. 362 item 3621

oxidations and reductions
induced by alpha and X-rays
p. 157 item 1574

O₂ consumption in irradiated
bacteria
p. 126 item 1263

oxygen removal in protection
against X-inactivation of
bacteria
p. 342 item 3420

passage of electric current
through paraffin during
irradiation
p. 363 item 3638

passage through gases
p. 274 item 2745

passage through metals
p. 181 item 1816
p. 206 item 2066

passage through narrow
apertures
p. 353 item 3535

penetration and diffusion
through thick barriers
p. 118 item 1180, 1181
p. 195 item 1959

penetration into homogeneous
and non-homogeneous substances
p. 386 item 3868

peripheral levels of heavy
elements
p. 108 item 1083

penetration to great depths
p. 117 item 1175

X-RAYS

physical characteristics of
soft rays
p. 362 item 3628

physical measurement
p. 53 item 533

physical properties
p. 368 item 3682

physicochemical action
p. 229 item 2297

physicochemical action on the
organism
p. 229 item 2296
p. 298 item 2987

photochemical effect of various
wave lengths
p. 141 item 1414

physicochemical effects
p. 207 item 2071

photochemical reduction
p. 70 item 700

photographic measurement of
hardness
p. 377 item 3779

physiological effects during
metamorphoses in drosophila
p. 246 item 2463

physiological and cytological
changes in escherichia coli
p. 36 item 363, 364, 365

polarization
p. 158 item 1589

polarization compared with their
power of exciting cathode rays
p. 368 item 3680

polymerization and depolymeriza-
tion
p. 8 item 82

X-RAYS

polymerization of
acrylonitrile
p. 74 item 744

polymerization of
proteins
p. 62 item 628

polymerization of serum
albumin
p. 62 item 629

potentials of soft rays
in sterilization
p. 450 item 4507

preservation of food
p. 79 item 797

precision measurements in
the soft region
p. 335 item 3353

probability curves of the
effect on bacilli
p. 83 item 833

problems of emission
p. 374 item 3740

producing beta rays
p. 17 item 175, 176,
177

producing cathode rays.
Dissymmetry in emission
p. 26 item 268

production and absorption
and secondary electrons
p. 308 item 3089

production and relation
to natural phenomena
p. 383 item 3834

production by cathode rays
p. 216 item 2165

production by slow neutrons
p. 84 item 849

X-RAYS

production in the range 1250-
2350 kilovolts
p. 56 item 569

production of acids by
irradiated aspergillus
p. 267 item 2672

production of cathode rays
p. 26 item 269

production of characteristics
rays
p. 380 item 3801, 3803

production of hard rays
p. 96 item 961

production of high intensity
beams
p. 303 item 3032

production of interference
fringes
p. 349 item 3491

production of radiation
p. 250 item 2507

production of radiations
between ultraviolet and X-
region
p. 296 item 2968

production of radioactivity in
animal tissues
p. 247 item 2474

production of soft radiation
p. 380 item 3802

production of wave movements
by impulses
p. 394 item 3943

production of X-radiation by
impact of positive and cathode
rays
p. 358 item 3585

X-RAYS

protection
p. 14 item 144

protection of bacterio-
phage by neutral salts
p. 421 item 4212 SR

protection of catalase
by fat emulsions
p. 107 item 1074

protection of organisms
by chemical means
p. 124 item 1246

protection with mercapto-
ethylamine
p. 18 item 188

protective action of
cysteine on lethal effect
p. 34 item 342

publications by Staff of
National Bureau of Standards
p. 433 item 4335 SR

pulse theory
p. 350 item 3502

quantum physics of biological
action
p. 95 item 955
p. 141 item 1411

quantum scattering
p. 181 item 1813

quantum theory of
reflection
p. 102 item 1027

quantum theory of scattering
p. 75 item 752

quantum theory of wave length
p. 74 item 749

radiation by retardation of
electrons
p. 213 item 2138

X-RAYS

radiation-catalase-sodium
nitrate relationship
p. 18 item 184

radiation damage to drosophila
p. 130 item 1306, 1307

radiation exposure survey and
isotopes personnel
p. 336 item 3366
p. 451 item 4511

radiation from cathode partioles
traversing a gas
p. 379 item 3797

radiation from hot sparks
p. 37 item 374

radiation from vapors
p. 66 item 667

radiation produced
p. 220 item 2207

radiobiologic action and killing
effects on achromobacter
p. 234 item 2349

radiochromism of organic
substances
p. 154 item 1543

radiosensitivity in relation
to temperature during exposure
p. 272 item 2721

radiosensibility of bacillus
prodigiosus
p. 177 item 1774

Raman effect
p. 196 item 1960

range and ionization density
of electrons
p. 369 item 3698

ray measurement of the cyclotron
of dee voltage
p. 160 item 1609

X-RAYS

reactions in aqueous solutions,
oxidation of ferrous sulfate
p. 256 item 2565, 2566

reactions of organic compounds
with activated water
p. 129 item 1294

reactivation of irradiated
colon bacteria
p. 217 item 2173

recessive lethal mutations
in yeast
p. 262 item 2621

recessive lethals in
habrobracon (insect)
p. 164 item 1641, 1642,
1643

recoil of electrons
p. 75 item 756

recombination of ions
p. 284 item 2844

recovery of X-radiated
bacteria at suboptimal
temperatures
p. 341 item 3419

reducing action on
methylene blue
p. 117 item 1171

reduction in facet number
in drosophila
p. 235 item 2358, 2359

reduction of O_2 to H_2O_2 by
irradiation of solution
p. 128 item 1283

reduction of sensitivity
of escherichia coli by
sulfur compounds
p. 58 item 581, 582

reflection
p. 22 item 226

X-RAYS

reflection

p. 62 item 626
p. 114 item 1142
p. 186 item 1860
p. 189 item 1893
p. 262 item 2623, 2624

reflection and refraction
p. 328 item 3283

refraction by small particles
p. 267 item 2676

reflections and related
phenomena
p. 52 item 529

reflections from fatty acids
p. 289 item 2890

relation between absorption
and wave lengths
p. 328 item 3285

relation between photographic
and ionizing effects
p. 32 item 329

relation of atmosphere to
biological effects
p. 163 item 1634

relation of recessive lethals
to chromosomal breakage
p. 168 item 1688

relation of the biological
action of X-rays
p. 281 item 2813

relation of 22.5 mev betatron
rays to ionization measurement
p. 222 item 2220

relation of wave lengths to
absorption
p. 48 item 489

relation to cathode rays
p. 379 item 3796

-RAYS

relative biological
effectiveness of X-
and gamma rays
p. 116 item 1162

relative effects of
neutron and X-rays on
cells in same organism
p. 395 item 3959

report on standardization
of measurements
p. 354 item 3541

research at Bose Institute
in India
p. 0 item 3

research on rays of large
wave lengths
p. 177 item 1773, 1777

resonance absorption
p. 286 item 2866

resonance scattering by
atomic nuclei
p. 102 item 1020

responses of drosophila
pupae
p. 168 item 1680

response of melanoplus
(locust)
p. 351 item 3517

reversible effects and
other ionization radia-
tions
p. 427 item 4278 SR

role in atomic disintegration
p. 251 item 2518

scattered radiation
p. 80 item 808
p. 81 item 811

scattered radiation from
different radiators
p. 81 item 810

X-RAYS

scattered rays
p. 22 item 222
p. 147 item 1476
p. 221 item 2212, 2213
p. 306 item 3069

scattering
p. 74 item 748
p. 75 item 751
p. 147 item 1470, 1475, 1479
p. 178 item 1786
p. 240 item 2403
p. 274 item 2746
p. 374 item 3744

scattering and absorption
coefficient
p. 38 item 386

scattering and Bragg's law
p. 188 item 1881

scattering at small angles
p. 29 item 294

scattering by atoms
p. 284 item 2840

scattering by bound electrons
p. 295 item 2957

scattering by free electrons
p. 125 item 1253

scattering by gases
p. 389 item 3890

scattering by hydrogen
p. 319 item 3199

scattering by rings of
electrons
p. 320 item 3200

scattering by water and aqueous
solutions
p. 144 item 1441

scattering coefficient and
direct measurement
p. 253 item 2534

X-RAYS

scattering coefficients

p. 10 item 100

p. 45 item 454

scattering coefficients

in matter

p. 92 item 929

scattering from a hindered
rotator

p. 16 item 166

scattering from protein
solutions

p. 303 item 3035

scattering in water and
origin of penetration

p. 173 item 1738

scattering of inhomogeneous
rays

p. 221 item 2216

scattering of rays of 0.25
to 0.4 Å

p. 18 item 186

second radiations from
salts

p. 140 item 1400

secondary corpuscular rays

p. 304 item 3040

secondary effects

p. 369 item 3690, 3691

p. 374 item 3747a

secondary electron and
excitation of soft rays

p. 300 item 3006

secondary radiations and
their use

p. 75 item 750

secondary radiations around
radiator

p. 81 item 814

X-RAYS

secondary rays from crystals

p. 188 item 1883

selenium for energy measurement

p. 132 item 1323

p. 369 item 3692

sensitivity of metaphase and
interphase chromosomes

p. 337 item 3370

sensitivity of nitrogenous
compounds

p. 86 item 865

sensitivity of yeast

p. 13 item 132

sensitization to heat by X-rays

p. 138 item 1383

sensitometry

p. 364 item 3640

shape, wave length and width
of absorption limit

p. 301 item 3013

spectroscopic methods without
slit

p. 323 item 3234

600-kv X-ray plant

p. 301 item 3014

similar effects produced by
absence of vitamins and by
irradiation

p. 79 item 798

similar to radium gamma rays

p. 96 item 960

similarity with primary gamma
rays

p. 148 item 1482

simple micro-beam technique

p. 336 item 3368

X-RAYS

small angle scattering

p. 97 item 976
p. 101 item 1017
p. 102 item 1026
p. 106 item 1069

small angle scattering
by nitrogen

p. 382 item 3829

small angle scattering by
small particles

p. 270 item 2703

small angle scattering
from identical particles

p. 127 item 1271

soft rays

p. 236 item 2365

sources

p. 154 item 1548

spectra

p. 48 item 488
p. 60 item 600
p. 181 item 1812
p. 274 item 2747
p. 396 item 3962

spectra and chemical
combination

p. 94 item 946
p. 366 item 3667

spectra and periodic
system

p. 42 item 424

spectra levels of the
chemical elements

p. 371 item 3711

spectra of the lower
elements

p. 358 item 3588

X-RAYS

spectra reflected from fatty
acids

p. 53 item 531

spectral series in soft X-ray
region

p. 305 item 3052

spectrometer for soft X-rays

p. 305 item 3051

spectroscopic analysis with
secondary rays

p. 170 item 1709

spectroscopy of ultra-soft
rays

p. 328 item 3288

spectrum obtained by fibrous
substances

p. 270 item 2700

spectrum of secondary rays

p. 139 item 1392

specular reflection

p. 49 item 490

speed of electrons produced

p. 324 item 3242

spreading of X-ray pulses

p. 189 item 1897

standard absorption curves
for qualification

p. 354 item 3545

standard measurements of wave
lengths in X-range

p. 328 item 3286

standardization of dosage by
methylene blue

p. 344 item 3446, 3447

X-RAYS

sterility and lethal
mutation after irradiation
in drosophila

p. 400 item 4009 SR

sterilization of food

p. 1 item 18

p. 3 item 38

sterilization of screw-
worm files

p. 59 item 593

structure and diffraction
in liquids

p. 20 item 209

structure of absorption
edges

p. 78 item 786

structure of radiation

p. 65 item 658

studies in nuclear
reactions

p. 347 item 3473

studies on biochemical
compounds

p. 117 item 1173

studies of nucleic acids

p. 15 item 159

study of toxic changes
produced by body X-irradiation
by drugs

p. 440 item 4405 SR

susceptibility of different
varieties of a plant genus

p. 281 item 2812

symmetry of interferences

p. 114 item 1143

X-RAYS

table of critical absorption
energies

p. 172 item 1722

technique of measurement

p. 186 item 1863

temperature coefficient of
action on ascaris eggs

p. 100 item 1003

temperature dependence of
bacterial inactivation

p. 341 item 3417

term values, absorption
limits and critical
potentials

p. 346 item 3468

tertiary radiation

p. 70 item 702

theoretical and experimental
intensities

p. 166 item 1663

theoretical efficiencies
of production

p. 204 item 2040, 2041

theory of absorption

p. 178 item 1785

theory of biological effect

p. 268 item 2683

theory of continuous spectrum

p. 367 item 3671

X-RAYS

theory of dispersion

p. 212 item 2129

theory of geneses

p. 76 item 766

theory of measuring
methods

p. 355 item 3556

theory of polarization

p. 55 item 557

theory of radiation

p. 21 item 216

theory of reflection

p. 89 item 891, 893
371 3710

theory of scattering

p. 158 item 1586

theory of spectra

p. 217 item 2171

thermal measurement of
energy

p. 81 item 818

time lag

p. 203 item 2038

total intensity of
scattered X-radiation

p. 93 item 930

toxin-producing variants

p. 156 item 1562

X-RAYS

transformation of
biological substances
p. 28 item 285

transformation of cathode
ray energy into X-ray energy
p. 120 item 1200

transformation of energy
into corpuscular radiation
p. 313 item 3139

transmission through
fibrous and granular
substances
p. 270 item 2702

transmission through metals
p. 197 item 1975

treatment of diphtheria
carriers
p. 377 item 3777

ultraviolet fluorescence
excited by X-rays
p. 280 item 2801

ultraviolet microscopy of
the cell's response to
X-radiation
p. 404 item 4045

unsymmetrical emission
p. 342 item 3425

use for detection of insect
infestation of grain
p. 257 item 2572

X-RAYS

use for determination
of structure of liquids
p. 92 item 927

use in analytical chemistry
p. 3 item 34

use in infestation control
p. 190 item 1906

use of selenium in the
radiometry
p. 154 item 1540

useful data
p. 283 item 2832

variation of intensity
p. 335 item 3358

variation of the potential
in roentgen tubes
p. 374 item 3748

velocities of electrons
expelled
p. 22 item 227

velocity
p. 245 item 2454

velocity of secondary
cathode particles ejected
by characteristic X-radiations
p. 379 item 3798, 3799

versatility
p. 69 item 698

X-RAYS

- viability of drosophila
p. 145 item 1457, 1458
- volume increase of bacteria
p. 98 item 986
- wave length distribution
in a scattered medium
p. 151 item 1515
- wave length distribution
of scattered rays
p. 96 item 962
- wavelength measurements
with crystal
p. 278 item 2782
- wave lengths
p. 103 item 1031
215 2154
392 3928
- wavelengths of scattered
rays
p. 214 item 2140
- wave lengths of secondary
p. 70 item 703
- width of spectrum lines
p. 75 item 753
- yields of nuclear reactions
p. 279 item 2798

YEAST

- action of cold on repair of
radio-lesions
p. 218 item 2189
- action of radium emanation on
vitamins
p. 329 item 3292
- action of ultraviolet rays
p. 118 item 1188
p. 231 item 2310
- action of ultraviolet rays on
sucrase, protease, catalase,
lipase, proteinase, amylase
and invertase
p. 265 item 2654
p. 266 item 2661-2665
- action of ultraviolet rays on
yeast-like fungi
p. 352 item 3522
- action of X-rays on yeast and
constituents.
p. 112 item 1129

YEAST

alteration of the budding process
of *saccharomyces* by ultraviolet
rays
p. 361 item 3614

biological actions of various radi-
ations
p. 215 item 2158

changes in cells by X-rays
p. 112 item 1128

comparison of lethal effects of
x-radiation for yeast
p. 359 item 3592

destruction by ultraviolet rays
p. 236 item 2363

effect of ionizing radiations on
enzyme activities of yeast cells
p. 3268 item 3269

effect of radiation on galactozymase
formation
p. 49 item 499

effect of radium rays
p. 288 item 2880

effect of 2 megavolts x-rays
p. 104 item 1047

effect of ultraviolet rays
p. 5 item 58
p. 50 item 501
p. 90 item 902

effect of ultraviolet rays culture
media
p. 389 item 3898

effect of ultraviolet rays on fer-
mentation
p. 274 item 2749

effect of ultraviolet rays on phosphate
turnover
p. 414 item 4143 SR

YEAST

effect of x-rays
p. 394 item 3945

effect of x- and ultraviolet
rays on permeability
p. 170 item 1708

effects of x-rays and cathode
rays and ultraviolet rays
p. 392 item 3924

effects of x-rays on cells of
different ploidy
p. 262 item 2620

effect of x-rays on fermentation
p. 152 item 1529

effect of x-rays on glucose fer-
mentation by yeast
p. 326 item 3267

effects of x-rays on polyploid
series
p. 47 item 478

enriching with vitamin D by
ultraviolet irradiation
p. 366 item 3664

influence of light on sulfhydryl
content after irradiation
p. 432 item 4327 SR

influence of temperature on X-
ray sensitivity
p. 389 item 3896

influence of ultraviolet rays
p. 447 item 4475

influence of x-rays
p. 112 item 1124

irradiation
p. 158 item 1584

irradiated as vitamin D source
p. 20 item 200

YEAST

lethal effect of sonic energy
p. 28 item 287

mathematical theory of lethal
action of radiation

p. 382 item 3828 & 403

p. 403 item 4032 SR

physiological changes by ultra-
violet rays

p. 13 item 134

sensitivity to x-rays

p. 13 item 132

YEAST

stimulation of respiration by
ultraviolet rays

p. 138 item 1382

x-ray inactivation of
saccharomyces

p. 236 item 2360

x-ray induced recessive lethal
mutations

p. 262 item 2621
